**Serial and Mass Murder** Elizabeth A. Gurian, 2021-09-30 This book reframes the study of multicide that is serial and mass murder to use objective measures and aims to expand our understanding of multicide offending through descriptive and inferential statistical analyses of different homicide patterns of the offenders Criminal homicide and multiple murders are rare occurrences that typically account for a very small percentage of all violent crimes in most countries Despite this low occurrence homicide continues to be an area of intense study with a focus on subjective measures and classifications The research and analysis based on a database of over 1 300 cases contributes to the criminological study of violence and draws distinctions between the types of offenders partnered and solo serial and mass male and female etc from a range of different countries and across decades Traditionally studies of homicide focus on male offenders and theories of offending are then applied to females and co offenders The research presented in this book reveals that women and partnered offenders have very different homicide patterns from men Looking at the history of multicide offending this book uses descriptive and inferential statistical analyses to directly compare differences in offending and outcome patterns across multicide offender types This exploration of the multidimensionality of homicide at an international level is useful for scholars and students interested in criminal justice criminology psychology sociology or law

### **Opera as Hypermedium**

Tereza Havelková, 2021-02-15 Drawing on the concept of hypermediacy from media studies this book situates opera within the larger context of contemporary media practices and particularly those that play up the multiplicity awareness and enjoyment of media It is driven by the underlying question of what politics of representation and perception opera performs within this context This entails approaching operas as audiovisual events rather than works or texts and paying attention to what they do by visual means along with the operatic music and singing The book concentrates on events that foreground their use of media and technology drawing attention to opera s inherently hypermedial aspects It works with the recognition that such events nevertheless engender powerful effects of immediacy which are not contingent on illusionism or the seeming transparency of the medium It analyzes how effects like presence liveness and immersion are produced contesting some critical claims attached to them It also sheds light on how these effects often perceived as visceral or material in nature are related to the production of meaning in opera The discussion pertains to contemporary pieces such as Louis Andriessen and Peter Greenaway s Rosa and Writing to Vermeer as well as productions of the canonical repertory such as Wagner s Ring Cycle by Robert Lepage at the Met and La Fura dels Baus in Valencia

**(Mis)Representation of Queer Lives in True Crime** Abbie E. Goldberg, Danielle C. Slakoff, Carrie L. Buist, 2023-08-25 This book examines the representation and misrepresentation of queer people in true crime addressing their status as both victims and perpetrators in actual crime as well as how the media portrays them The chapters apply an intersectional

perspective in examining criminal cases involving LGBTQ people as well as the true crime media content surrounding the cases. The book illuminates how sexual orientation, gender, race, and other social locations impact the treatment of queer people in the criminal legal system and the mass media. Each chapter describes one or more high profile criminal cases involving queer people, e.g., the murders of Brandon Teena and Kitty Genovese, serial killer Aileen Wuornos, the Pulse nightclub mass shooting. The authors examine how the cases are portrayed in the media via news, films, podcasts, documentaries, books, social media, and more. Each chapter discusses not only what is visible or emphasized by the media but also what is invisible in the accounting or societal focus surrounding the case. Lesser known but similar cases are used in the book to call attention to how race, gender, sexuality, sexual orientation, social class, and/or other features influence the dominant narrative surrounding these cases. Each chapter addresses teachable moments from each case and its coverage, leaving readers with several considerations to take with them into the future. The book also provides media resources and supplemental materials so that curious readers, including scholars, students, content creators, and advocates, can examine the cases and media content further. The book will appeal to scholars and students of criminology, psychology, sociology, law, media studies, sexuality studies, and cultural studies, and people with an interest in true crime.

**Frames of Evil** Caroline Joan Picart, David A. Frank, 2006

Challenging the classic horror frame in American film, American filmmakers appropriate the look of horror in Holocaust films and often use Nazis and Holocaust imagery to explain evil in the world, say authors Caroline Joan Kay S. Picart and David A. Frank. In *Frames of Evil: The Holocaust as Horror in American Film*, Picart and Frank challenge this classic horror frame, the narrative and visual borders used to demarcate monsters and the monstrous. After examining the way in which directors and producers of the most influential American Holocaust movies default to this Gothic frame, they propose that multiple frames are needed to account for evil and genocide. Using *Schindler's List*, *The Silence of the Lambs*, and *Apt Pupil* as case studies, the authors provide substantive and critical analyses of these films that transcend the classic horror interpretation. For example, *Schindler's List*, say Picart and Frank, has the appearance of a historical docudrama but actually employs the visual rhetoric and narrative devices of the Hollywood horror film. The authors argue that evil has a face: Nazism, which is configured as quintessentially innate and supernaturally crafty. *Frames of Evil*, which is augmented by thirty-six film and publicity stills, also explores the commercial exploitation of suffering in film and offers constructive ways of critically evaluating this exploitation. The authors suggest that audiences will recognize their participation in much larger narrative formulas that place a premium on monstrosity and elide the role of modernity in depriving millions of their lives and dignity, often framing the suffering of others in a manner that allows for merely documentary enjoyment.

**Constraints in Discourse 3** Anton Benz, Manfred Stede, Peter Kühnlein, 2012-10-17

The analysis of discourse is probably one of the most complex problems of linguistics. It can be approached from many different directions involving a large variety of different methods. This volume unites psycholinguistic studies, investigations of logical and computational models of discourse, corpus studies, and linguistic case

studies of language specific devices This variety of approaches reflects the complexity of discourse production and understanding and it also reflects the necessity of understanding the complex interplay of diverse parameters which influence these processes The growing importance of corpus based and experimental approaches to discourse analysis is duly reflected in this volume Most of the chapters make use of them in one or the other form This collection of articles grew out of the third installment of the Constraints in Discourse conferences and will be of interest to researchers from linguistics artificial intelligence and cognitive science

**Bridging Inferences** Matthias Irmer, 2011 This book presents work on bridging inferences in discourse interpretation It develops a formalization that permits integrating indirect anaphora in the construction of a structured discourse representation From a broader perspective it provides a suitable dynamic logic framework which can account for underspecifications in cohesion and coherence of discourses by either inferentially resolving or contextually constraining them Special attention is given to the resolution of bridging anaphora by means of integrating encyclopedic knowledge encoded in FrameNet into a formal theory of discourse structure as provided by Segmented Discourse Representation Theory A second focus lies on the discourse effects of Clitic Left Dislocation in Spanish In addition the book provides a synopsis of the problems methods approaches and desiderata of research on text context and discourse interpretation from formal computational cognitive and psychological points of view Central topics include pragmatic inferences and defeasible reasoning the Common Ground cohesion and anaphora resolution coherence and discourse structure and discourse interpretation The volume may thus also serve as a reference book on text meaning and context

**Creepshow** Simon Brown, 2019-07-09 Released in cinemas in 1982 Creepshow is typically regarded as a minor entry in both the film output of George A Romero and the history of adaptations of the works of Stephen King Yet this lack of critical attention hides the fact that Creepshow is the only full collaboration between America's bestselling author of horror tales and one of the masters of modern American horror cinema Long considered too mainstream for the director of Dawn of the Dead 1978 too comic for the author that gave audiences the film versions of Carrie 1976 and The Shining 1980 and too violent for a cinemagoing public turning away from gore cinema in the autumn of 1982 Creepshow is here reassessed by Simon Brown who examines the making and release of the film and its legacy through a comic book adaptation and two sequels His analysis focuses on the key influences on the film not just Romero and King but also the anthology horrors of Amicus Productions body horror cinema and the special make up effects of Tom Savini the relationship between horror and humor and most notably the tradition of EC horror comics of the 1950s from which the film draws both its thematic preoccupations and its visual style Ultimately the book argues that not only is Creepshow a major work in the canons of Romero and King but also that it represents a significant example of the portmanteau horror film of the blending of horror and comedy and finally decades before the career of Zack Snyder Watchmen Man of Steel of attempting to recreate a comic book aesthetic on the big screen
