Johnson,2010-10-06 This comprehensive set of essays documents the most important criminal civil and political trials in the United States from colonial times to the present examining their impact on both legal history and popular culture Crime and punishment are of perennial interest across the human species Trials of the Century An Encyclopedia of Popular Culture and the Law examines some of the most important and infamous cases in American history placing them in both historical and legal context Among the landmark cases considered in these two volumes are the 1692 Salem Witch Trials the Scopes Monkey Trial and the O J Simpson murder trial A number of civil lawsuits and political trials are also included such as the impeachment trials of Presidents Andrew Johnson and William Jefferson Clinton Entries in the encyclopedia detail the events leading to each trial and introduce the key players with a focus on judges lawyers witnesses defendants victims media and the public In addition the aftermath of the trial and its impact are analyzed from a scholarly yet straightforward perspective emphasizing how the trial affected the law and society at large **Amazing Stories Annual** Edgar Rice Burroughs,Herbert George Wells,Abraham Merritt,Austin Hall,Alpheus Hyatt Verrill,Jacque Lloyd Morgan,1927 Soldiers ,1990 The Police Revolution Peter Evans,2023-03-31 Where are the police going Originally published in 1974 Peter Evans argues that their traditional relationship with the public was being dangerously threatened a situation neither the police themselves nor the public wanted to see worsen In his analysis of the pressures and influences that were leading many policemen to question their role in society Mr Evans looks first at the immense problems created for the police by increasingly violent and sophisticated crime protest and terrorism The attitudes of the police he says are in keeping with their nature They are a minority a semi closed community with astonishing records of long serving families giving police forces something of a tribal flavour They have their own slang Like miners dockers or railwaymen their jobs were established in Victorian times and are now faced with a rapid technological change for the police a revolution Yet there is one important difference the police must remain manpower intensive otherwise precious contact with the public is lost They must also remain craftsmen not become merely technicians Mr Evans concludes that successive governments are to blame for not giving the police the sort of backing they deserve finance for example and not merely pious expressions of support This failure has widened the gap between police and public because of shortage of men has left London in particular dangerously under patrolled and has contributed towards those pressures that tempt some officers to err There is nothing wrong with the traditions of the police although some policemen sometimes do not live up to them The police need more resources and more opportunity to apply these traditions so that the unique

character of British policing is not lost The author felt there was both time and need for reform in the decade before 1984 Today it can be read in its historical context *Shot at Dawn* Julian Putkowski, Julian Sykes, 1990-12-31 The issue of military executions during the war has always been controversial and embargoes have made it difficult for researchers to get at the truth Now these two writers give us a vast amount of information They show that trials were grossly unfair and incompetent Many of the condemned men had been soldiers of exemplary behaviour courage and leadership but had cracked under the dreadful strain of trench warfare This acclaimed book is the authority on this shameful saga *Murder and the Making of English CSI* Ian Burney, Neil Pemberton, 2016-09-18 A history of the origins and development of forensic science in murder investigations in early twentieth century England Crime scene investigation or CSI has captured the modern imagination On television screens and in newspapers we follow the exploits of forensic officers wearing protective suits and working behind police tape to identify and secure physical evidence for laboratory analysis But where did this ensemble of investigative specialists and scientific techniques come from In *Murder and the Making of English CSI* Ian Burney and Neil Pemberton tell the engrossing history of how in the first half of the twentieth century novel routines regulations and techniques from chain of custody procedures to the analysis of hair blood and fiber fundamentally transformed the processing of murder scenes Focusing on two iconic English investigations the 1924 case of Emily Kaye who was beaten and dismembered by her lover at a lonely beachfront holiday cottage and the 1953 investigation into John Christie s serial murders in his dingy terraced home in London s West End Burney and Pemberton chart the emergence of the crime scene as a new space of forensic activity Drawing on fascinating source material ranging from how to investigator handbooks and detective novels to crime journalism police case reports and courtroom transcripts the book shows readers how over time the focus of murder inquiries shifted from a primarily medical and autopsy based interest in the victim s body to one dominated by laboratory technicians laboring over minute trace evidence *Murder and the Making of English CSI* reveals the compelling and untold story of how one of the most iconic features of our present day forensic landscape came into being It is a must read for forensic scientists historians and true crime devotees alike Out of some pretty gruesome parts Burney and Pemberton have assembled a remarkably elegant account of the making of modern murder investigation Their analysis combines scholarly sophistication with a clarity of prose that entertains informs and surprises *Murder and the Making of English CSI* brims with insight about the historical path that led to our forensic present Mario Biagioli UC Davis School of Law author of *Galileo s Instruments of Credit Telescopes Images Secrecy* This nuanced and fascinating history of English crime scene reconstruction has an uncanny prescience for today s debates about how to manage crime scene evidence Simon A Cole University of California Irvine author of *Suspect Identities A History of Fingerprinting and Criminal Identification* *Science and Invention* , 1929
