field of cardiovascular medicine Every Patient Tells a Story Lisa Sanders, 2009-08-11 A riveting exploration of the most difficult and important part of what doctors do by Yale School of Medicine physician Dr Lisa Sanders author of the monthly New York Times Magazine column Diagnosis the inspiration for the hit Fox TV series House M D The experience of being ill can be like waking up in a foreign country Life as you formerly knew it is on hold while you travel through this other world as unknown as it is unexpected When I see patients in the hospital or in my office who are suddenly surprisingly ill what they really want to know is What is wrong with me They want a road map that will help them manage their new surroundings The ability to give this unnerving and unfamiliar place a name to know it on some level restores a measure of control independent of whether or not that diagnosis comes attached to a cure Because even today a diagnosis is frequently all a good doctor has to offer A healthy young man suddenly loses his memory making him unable to remember the events of each passing hour Two patients diagnosed with Lyme disease improve after antibiotic treatment only to have their symptoms mysteriously return A young woman lies dying in the ICU bleeding jaundiced incoherent and none of her doctors know what is killing her In Every Patient Tells a Story Dr Lisa Sanders takes us bedside to witness the process of solving these and other diagnostic dilemmas providing a firsthand account of the expertise and intuition that lead a doctor to make the right diagnosis Never in human history have doctors had the knowledge the tools and the skills that they have today to diagnose illness and disease And yet mistakes are made diagnoses missed symptoms or tests misunderstood In this high tech world of modern medicine Sanders shows us that knowledge while essential is not sufficient to unravel the complexities of illness She presents an unflinching look inside the detective story that marks nearly every illness the diagnosis revealing the combination of uncertainty and intrigue that doctors face when confronting patients who are sick or dying Through dramatic stories of patients with baffling symptoms Sanders portrays the absolute necessity and surprising difficulties of getting the patient s story the challenges of the physical exam the pitfalls of doctor to doctor communication the vagaries of tests and the near calamity of diagnostic errors In Every Patient Tells a Story Dr Sanders chronicles the real life drama of doctors solving these difficult medical mysteries that not only illustrate the art and science of diagnosis but often save the patients lives *The Hepatitis E Virus* Harry Dalton, 2019-02-28 This volume is an account of scientific discovery related to the hepatitis E virus HEV HEV was first identified in Afghanistan in 1982 by a remarkably courageous act of self experimentation by a Russian scientist Following this it was found that in some developing countries in Asia and Africa HEV was the cause of enormous outbreaks of hepatitis spread by infected drinking water with a 25% death rate in pregnant women For many years HEV was thought not to be an issue in high income countries and was only seen in travellers returning from high risk areas it was considered a back packers disease We now know that this was hopelessly wrong as HEV is very common in developed countries with currently over 2 million infections per year in Europe Here HEV is found in pigs and spread mainly via consumption of contaminated pork meat There has been a major increase in cases of HEV in many developed countries

including patients who have suffered liver failure some of whom have died We now know that HEV can also cause severe damage to the nervous system This book describes an English doctor s contribution to the discovery of the impact of HEV in humans Recent cases in the UK appear to have originated from pigs in Continental Europe and HEV was as a consequence dubbed by the international press as the Brexit Virus perhaps an early leaving present from our friends in the EU Accessible to lay readers the text includes case histories and stories from a health service increasingly under pressure and given context by examples of medical discoveries from the past The role of the meat production industry including questionable on going high risk virological practices is put under the spotlight leading to inevitable comparisons with the BSE crisis of the 1980s HEV continues to exact a heavy toll in some low income countries most notably with multiple large outbreaks in African refugee camps Despite the best efforts of organisations such as Médecins Sans Frontières each year pregnant women continue to die by the score This is particularly poignant as these deaths may be avoidable as there is a safe and effective vaccine However the HEV vaccine is only licensed for use in China and so far efforts to introduce it to Africa have hit a brick wall of politics and red tape
