Parenting After the Death of a Child Jennifer L. Buckle, Stephen J. Fleming, 2011-01-19 The death of a child has a

tremendous and overwhelming impact on parents and siblings completely altering the psychological landscape of the family. In the aftermath of such a tragedy, parents face the challenge of not only dealing with their own grief but also that of their surviving children. How can someone attempt to cease parenting a deceased child while maintaining this role with his/her other children? Is it possible for a mother or father to effectively deal with feelings of grief and loss while simultaneously helping their surviving children? Parenting After the Death of a Child: A Practitioner's Guide addresses this complex and daunting dilemma. Following on the heels of a qualitative research study that involved interviewing bereaved parents, both fathers and mothers, Buckle and Fleming have put together several different stories of loss and recovery to create an invaluable resource for clinicians, students, and grieving parents. The authors present the experience of losing a child and its subsequent impact on a family in a novel and effective way, demonstrating the strength and importance of their book for the counseling field.

Healing a Parent's Grieving Heart Alan D. Wolfelt, 2002-04-01. Presenting simple yet highly effective methods for coping and healing, this book provides answers and relief to parents trying to deal with the loss of a child. It offers 100 practical, action-oriented tips for embracing grief, such as writing a letter to the child who has died, spending time with others who will listen to stories of grief, creating a memory book, box, or Web site, and remembering others who may still be struggling with the death. The guide also addresses common problems for grieving parents, including dealing with marital stress, helping surviving siblings deal with hurtful advice, and exploring feelings of guilt. This compassionate resource will aid parents who have been through the death of a child, whether the passing happened recently or many years ago, whether the child was young or an adult.

Healing after Parent Loss in Childhood and Adolescence Phyllis Cohen, K. Mark Sossin, Richard Ruth, 2014-01-31. In *Healing after Parent Loss in Childhood and Adolescence: Therapeutic Interventions and Theoretical Considerations*, experts explore the varied, often complex, and always tragic circumstances under which young people face losing a parent. Profound grief and feelings of powerlessness may accompany loss of a parent at any age, but distinctly so when such loss is experienced during formative years. Whenever these individuals seek help, therapists must be psychically prepared to enter into arenas of trauma, bereavement, and mourning. The children, teens, and adults presented are diverse in age, culture, ethnicity, and socioeconomic status. A diverse group of contributors showcase a wide range of effective approaches, from traditionally structured short- and long-term psychotherapies and psychoanalysis to psychoeducational, supportive, and preventive interventions. The writers in this volume do not shy away from tough matters such as urban violence, AIDS, and war; they address concerns practicing clinicians face, such as when to work with children, adolescents, and adults individually and when and how to involve their surviving parents and families. Included in this book are issues related to the self-care and professional development needs of therapists who take on this difficult but essential work, including peer support and supervision. This volume is likely to spark important re-examinations across all fields of mental health practice. It will equip and empower clinicians of all kinds who undertake work with those who are grieving. *Healing after Parent Loss in*

Finkbeiner,2012-12-11 For a parent losing a child is the most devastating event that can occur Most books on the subject focus on grieving and recovery but as most parents agree there is no recovery from such a loss This book examines the continued love parents feel for their child and the many poignant and ingenious ways they devise to preserve the bond Through detailed profiles of parents Ann Finkbeiner shows how new activities and changed relationships with their spouse friends and other children can all help parents preserve a bond with the lost child Based on extensive interviews and grief research Finkbeiner explains how parents have changed five to twenty five years after the deaths of their children The first half of the book discusses the short and long term effects of the child's death on the parent's relationships with the outside world that is with their spouses other children friends and relatives The second half of the book details the effect on the parents internal world their continuing sense of guilt their need to place the death in some larger context and their inability sometimes to consistently do so their new set of priorities the nature of their bond with the lost child and the subtle and creative ways they have of continuing that bond Finkbeiner's central point is not so much how parents grieve for their children but how they love them Refusing to fall back on pop jargon about recovery or to offer easy solutions or standardized timelines Finkbeiner's is a genuine and moving search to come to terms with loss Her complex profiles of parents resonate with the honesty and authenticity of uncomfortable emotions expressed and most importantly shared with others experiencing a similar loss Finally each profile exemplifies the many heroic ways parents learn to live with their pain and by so doing honor the lives their children should have lived **The Grieving Child** Helen Fitzgerald,2013-09-17 Making a Child's World Whole Again Explaining death to a child is one of the most difficult tasks a parent or other relative can face The
