Partners of the Heart Vivien T. Thomas, 1998-01-29 Visitors to the Blalock Building at the Johns Hopkins University Medical Center are greeted by portraits of two great men One of renowned heart surgeon Alfred Blalock speaks for itself The other of highschool graduate Vivien Thomas is testimony to the incredible genius and determination of the first black man to hold a professional position at one of America's premier medical institutions Thomas's dreams of attending medical school were dashed when the Depression hit After spending some time as a carpenter's apprentice Thomas took what he expected to be a temporary job as a technician in Blalock's lab The two men soon became partners and together invented the field of cardiac surgery *Partners of the Heart* is Thomas's extraordinary autobiography Trained in laboratory techniques by Alfred Blalock and Joseph W Beard Thomas remained Blalock's principal technician and laboratory chief for the rest of Blalock's distinguished career Thomas very rapidly learned to perform surgery to do chemical determinations and to carry out physiologic studies He became a phenomenal technician and was able to carry out complicated experimental cardiac operations totally unassisted and to devise new ones In addition to telling Thomas's life story *Partners of the Heart* traces the beginnings of modern cardiac surgery crucial investigations into the nature of shock and Blalock's methods of training surgeons

Partners of the Heart Vivien Thomas, 1995 **A Scientific Revolution** Ralph H. Hruban, William Linder, 2022-05-03 A prismatic examination of the evolution of medicine from a trade to a science through the exemplary lives of ten men and women Johns Hopkins University one of the preeminent medical schools in the nation today has played a unique role in the history of medicine When it first opened its doors in 1893 medicine was a rough and ready trade It would soon evolve into a rigorous science It was nothing short of a revolution This transition might seem inevitable from our vantage point today In recent years medical science has mapped the human genome deployed robotic tools to perform delicate surgeries and developed effective vaccines against a host of deadly pathogens But this transformation could not have happened without the game changing vision talent and dedication of a small cadre of individuals who were willing to commit body and soul to the advancement of medical science education and treatment *A Scientific Revolution* recounts the stories of John Shaw Billings Max Br del Mary Elizabeth Garrett William Halsted Jesse Lazear Dorothy Reed Mendenhall William Osler Helen Taussig Vivien Thomas and William Welch This chorus of lives tells a compelling tale not just of their individual struggles but how personal and societal issues went hand in hand with the advancement of medicine *The Open Heart Club* Gabriel Brownstein, 2019-10-22 This absorbing and poignant book is not merely the story of one writer's flawed heart It is a history of cardiac medicine a candid personal journey and a profound reflection on mortality Born in 1966 with a congenital heart defect known as the tetralogy of Fallot Gabriel Brownstein entered the world just as doctors were learning to operate on conditions like his He received a life saving surgery at five years old and since then has ridden wave after wave of medical innovation a series of interventions that have kept his heart beating *The Open Heart Club* is both a memoir of a

life on the edge of medicine's reach and a history of the remarkable people who have made such a life possible. It begins with the visionary anatomists of the seventeenth century, tells the stories of the doctors, all women, who invented pediatric cardiology, and includes the lives of patients and physicians struggling to understand the complexities of the human heart. *The Open Heart Club* is a riveting work of compassionate storytelling, a journey into the dark hinterlands between sickness and health, lit by bright moments of humor and inspiration.

Bay State Road Robert Allan Hill, 2025-09-11 *Bay State Road* is a collection of sermons offered during the twenty years of Robert Allan Hill's deanship at Boston University's Marsh Chapel. Some sermons reflect on milestones such as the first time Hill preached at Marsh Chapel as its dean, his 2023 university baccalaureate address, and a remembrance of the grief following the 2013 bombing of the Boston Marathon. But most were preached on regular Sundays, whose very ordinariness is the canvas on which the extraordinary is made visible. This volume contributes to the 2025 celebration of Marsh Chapel's seventy-fifth anniversary, which honors the chapel's historic legacy while readying the chapel for the seventy-five years ahead.

Signaling in the Heart José Marín-García, 2011-06-21 Signal transduction pathways are at the core of most biological processes and are critical regulators of heart physiology and pathophysiology. The heart is both a transmitter and dynamic receptor of a variety of intracellular and extracellular stimuli, playing a critical role as an integrator of diverse signaling mechanisms. Alterations in signaling pathways are contributing factors in the development and progression of a broad spectrum of diseases, ranging from dysrhythmias and atherosclerosis to hypertension and the metabolic syndrome. Targeting specific components of these signaling pathways has been shown to be effective in preclinical studies with significant therapeutic impact. This book brings together current knowledge in cardiovascular cell signal transduction mechanisms, advances in novel therapeutic approaches to improve cardiac function, and discussion of future directions. Presented from a post-genomic perspective, this exciting book introduces important new ideas in cardiovascular systems biology. It is an invaluable reference for cardiology researchers and practitioners.

Partners in Pleasure Paul Pearsall, 2001 This sequel to Pearsall's bestselling *The Pleasure Prescription* shows couples the way to true happiness. Drawing on 2,000-year-old Polynesian wisdom, *Partners in Pleasure* shows how to go beyond self-fulfillment to selfless shared pleasure. The Foreword features rare written wisdom from a well-respected kapuna, Hawaiian elder.

Partners for Life Mrs. Newton Crosland, 1847 **Partners for life** Camilla Crosland, 1847 **A Heart Afire** Patricia Meisol, 2023-12-12 A deeply compelling biography of the pioneering children's heart doctor Helen Taussig, who helped start heart surgery and became a global force against preventable suffering. In *A Heart Afire*, Patricia Meisol renders a moving portrait of the indomitable pediatrician and global patient activist Helen Taussig (1898-1986), who famously gathered and publicized evidence linking thalidomide to birth defects, leading to US drug safety laws. Taussig also developed the Blalock-Taussig shunt, along with Alfred Blalock, for infants with congenital heart defects. Spanning Taussig's childhood in Boston, her struggle with dyslexia, her progressive hearing loss, her research contributions, and the founding of her own

fledgling children's heart clinic this book chronicles Taussig's ambition, tenacity, and formidable work ethic. As Meisler shows, Taussig not only saved lives but also set a bold precedent for other women doctors in the twentieth century who were largely excluded from medicine. Meticulously researched and intimately told, *A Heart Afire* is unique in its use of a fifty-year-long campaign by Taussig's followers for a worthy memorial portrait and shows how views of women doctors have evolved. Meisler reveals Taussig as an authentic American hero, one who embodies the Emersonian ethic of developing oneself following the processes of nature and serving the public. A fiercely independent thinker, Taussig infused herself and her ideas into the medical culture, paving the way not only for other professional women but also for patients then and now to advocate for themselves. Offering an indispensable look at health care as a universal human right, *A Heart Afire* is a beacon and a blueprint for creating a more just and compassionate world of medicine.
