Hemminger, 2021-09-22 The study of religion by the humanities and social sciences has become receptive for an evolutionary perspective Some proposals model the evolution of religion in Darwinian terms or construct a synergy between biological and non Darwinian processes The results however have not yet become truly interdisciplinary The biological theory of evolution in form of the Extended Evolutionary Synthesis EES is only sparsely represented in theories published so far by scholars of religion Therefore this book reverses the line of view and asks how their results assort with evolutionary biology How can the subject area religion integrated into behavioral biology How is theory building affected by the asymmetry between the scarce empirical knowledge of prehistoric religion and the body of knowledge about extant and historic religions How does hominin evolution in general relate to the evolution of religion Are there evolutionary pre adaptations Subsequent versions of evolutionary biology from the original Darwinism to EES are used in interdisciplinary constructs Can they be integrated into a comprehensive theory The biological concept most often used is co evolution in form of a gene culture co evolution However the term denotes a process different from biological co evolution Important EES concepts do not appear in present models of religious evolution e g neutral evolution evolutionary drift evolutionary constraints etc How to include them into an interdisciplinary approach Does the cognitive science of religion CSR harmonize with behavioral biology and the brain sciences Religion as part of human culture is supported by a complex multi level behavioral system How can it be modeled scientifically The book addresses graduate students and researchers concerned about the scientific study of religion and biologist interested in interdisciplinary theory building in the field **Archaeological Concepts, Techniques, and**

Terminology for American Prehistoric Lithic Technology Wm Jack Hranicky, 2013-06-03 Archaeological Concepts Techniques and Terminology for American Prehistory Lithic Technology by Wm Jack Hranicky is a 600 page comprehensive publication that encompasses the study of American prehistoric stone tools and implements It is a look up volume for

studying the material culture of prehistoric people and using its concepts and methods for researching this aspect of archaeology There are over 3000 entries which are defined and illustrated It also has an extensive set of references and an overview for the study of stone tools **French Bibliographical Digest** ,1953 Old Norse Religion in Long-Term Perspectives Anders Andrén,Kristina Jennbert,2006-01-12 Consisting of more than 70 papers written by scholars concerned with pre Christian Norse religion the articles discuss subjects such as archaeology art history historical archaeology history history of ideas theological history literature onomastics Scandinavian languages and Scandinavian studies The interdisciplinary aim of the book brings together text based and material based researchers to improve scholarly exchange and dialogue and provide a variety of contributions that elucidate topics such as worldview and cosmology ritual and religious practice myth and memory as well as reception and present day use of old Norse religion **The Emergence of Religion in Human Evolution** Margaret Boone Rappaport,Christopher J. Corbally,2019-12-09 Religious capacity is a highly elaborate neurocognitive human trait that has a solid evolutionary foundation This book uses a multidisciplinary approach to describe millions of years of biological innovations that eventually give rise to the modern trait and its varied expression in humanity s many religions The authors present a scientific model and a central thesis that the brain organs networks and capacities that allowed humans to survive physically also gave our species the ability to create theologies find sustenance in religious practice and use religion to support the social group Yet the trait of religious capacity remains non obligatory like reading and mathematics The individual can choose not to use it The approach relies on research findings in nine disciplines including the work of countless neuroscientists paleoneurologists archaeologists cognitive scientists and psychologists This is a cutting edge examination of the evolutionary origins of humanity s interaction with the supernatural It will be of keen interest to academics working in Religious Studies Neuroscience Cognitive Science Anthropology Evolutionary Biology and Psychology **Religion at Work in a Neolithic Society** Ian Hodder,2014-02-10 This book tackles the topic of religion a broad subject exciting renewed interest across the social and historical sciences The volume is tightly focused on the early farming village of atalhyk which has generated much interest both within and outside of archaeology especially for its contributions to the understanding of early religion The volume discusses contemporary themes such as materiality animism object vitality and material dimensions of spirituality while at the same time exploring broad evolutionary changes in the ways in which religion has influenced society The volume results from a unique collaboration between an archaeological team and a range of specialists in ritual and religion **The Reform Advocate** ,1916 **The Bloomsbury Reader in Cultural Approaches to the Study of Religion** Sarah J. Bloesch,M. Cooper Minister,2018-08-23 This is the first reader to gather primary sources from influential theorists of the late 20th and early 21st centuries in one place presenting the wide ranging and nuanced theoretical debates occurring in the field of religious studies Each chapter focuses on a major theorist and contains an introduction contextualizing their key ideas one or two selections representative of the theorist s innovative

methodological approaches discussion questions to extend and deepen reader engagement Divided in three sections the first part includes foundational comparative debates Mary Douglas's articulation of purity and impurity Phyllis Tribble's methods of reading sacred texts Wendy Doniger's comparative mythology Catherine Bell's reimagining of religious and secular ritual The second part focuses on methodological particularity Alice Walker's use of narrative Charles Long's critique of Eurocentricism Caroline Walker Bynum's emphasis on gender and materiality The third section focuses on expanding boundaries Gloria Anzaldúa's work on borders and languages Judith Butler's critique of gender and sex norms Saba Mahmood's expansion on the critique of colonialism's secularizing demands Reflecting the cultural turn and extending the existing canon this is the anthology instructors have been waiting for For further detail on the theorists discussed please consult Cultural Approaches to Studying Religion An Introduction to Theories and Methods edited by Sarah J Bloesch and Meredith Minister

Religion and Society in Middle Bronze Age Greece Helène Whittaker, 2014-05-12 The Middle Helladic period has received little attention partially because of scholars' view of it as merely the prelude to the Mycenaean period and partially because of the dearth of archaeological evidence from the period In this book Helène Whittaker demonstrates that Middle Helladic Greece is far more interesting than its material culture might at first suggest Whittaker comprehensively reviews and discusses the archaeological evidence for religion on the Greek mainland focusing on the relationship between religious expression and ideology The book argues that religious beliefs and rituals played a significant role in the social changes that were occurring at the time The arguments and conclusions of this book will be relevant beyond the Greek Bronze Age and will contribute to the general archaeological debate on prehistoric religion *Prehistoric Art as Prehistoric Culture* Primitiva Bueno-Ramírez, Paul Bahn, 2015-11-30 The diverse papers in this volume published in honour of Professor de Balbín cover a wide variety of the decorated caves which traditionally defined Palaeolithic art as well as the open air art of the period a subject in which he has done pioneering work at Siega Verde and elsewhere Theorizing Religions Past Harvey Whitehouse, Luther H. Martin, 2004-09-15 Historians bound by their singular stories and archaeologists bound by their material evidence don't typically seek out broad comparative theories of religion But recently Harvey Whitehouse's Modes of religiosity theory has been attracting many scholars of past religions Based upon universal features of human cognition Whitehouse's theory can provide useful comparisons across cultures and historical periods even when limited cultural data is present In this groundbreaking volume scholars of cultures from prehistorical hunter gatherers to 19th century Scandinavian Lutherans evaluate Whitehouse's hypothesis that all religions tend toward either an imagistic or a doctrinal mode depending on how they are remembered and transmitted Theorizing Religions Past provides valuable insights for all historians of religion and especially for those interested in a new cognitive method for studying the past *Al-Din* M.A. Draz, 2023-01-26 Originally published in 1952 *al Din* by prominent Egyptian scholar Muhammad Abdullah Draz 1894-1958 has been critically acclaimed as one of the most influential Arab Muslim studies of universal religion and forms of

religiosity in modern times Written as an introductory textbook for a course in the History of Religions at King Fuad I University in Cairo the first of its kind offered at an Egyptian institution of higher learning this book presents a critical overview of classical approaches to the scholarly study of religion While ultimately adapted to an Islamic paradigm the book is a novel attempt to construct a grand narrative about the large methodological issues of Religious Studies and the History of Religions and in relation to modernity and secularism Translated for the first time in English by Yahya Haidar this book demonstrates how the scholarly academic study of religion in the West often described as Orientalist came to influence and help shape a counter discourse from one of the leading Arab Muslim scholars of his time Classical Approaches to the Study of Religion Jacques Waardenburg, 2017-01-23 Waardenburg s magisterial essay traces the rise and development of the academic study of religion from the mid nineteenth to the mid twentieth century outlining the establishment of the discipline its connections with other fields religion as a subject of research and perspectives on a phenomenological study of religion Futhermore a second part comprises an anthology of texts from 41 scholars whose work was programmatic in the evolution of the academic study of religion Each chapter presents a particular approach theory and method relevant to the study of religion The pieces selected for this volume were taken from the discipline of religious studies as well as from related fields such as anthropology sociology and psychology to name a few
