Chemistry and Biochemistry of the Amino Acids Graham Barrett, 2012-12-06 Amino acids

are featured in course syllabuses and in project and research work over a wide spectrum of subject areas in chemistry and biology Chemists and biochemists using amino acids have many common needs when they turn to the literature for comprehensive information Among these common interests analytical studies in particular have undergone rapid development in recent years All other chemical and biochemical aspects of amino acids synthesis properties and reactions preparation of derivatives for use in peptide synthesis racemization and other fundamental mechanistic knowledge have been the subject of vigorous progress This book offers a thorough treatment of all these developing areas and is structured in the belief that biochemists physiologists and others will profit from access to information on topics such as the physical chemistry of amino acid solutions as well as from thorough coverage of amino acid metabolism biosynthesis and enzyme inhibition and that chemists will find relevant material in biological areas as well as in the analysis synthesis and reactions of amino acids

Peptide Science — Present and Future Yasutsugu Shimonishi, 2007-05-08 In the late 1980s Peptide Societies were established in Europe the United States and Japan and more recently in the Asian and the Pacific Rim regions including Australia China and Korea At the time of the establishment of the American European and Japanese Peptide Societies the International Liaison Organizing Committee representing these Peptide Societies along with the Australian Peptide Society began discussions for holding international conferences which would supercede or be held in lieu of the numerous individual meetings held by the peptide societies of each individual country or region The representative of the Chinese Peptide Society participated in these discussion in the International Liaison Organizing Committee at the meeting of the American Peptide Symposium in Nashville in June 1997 After lengthy discussions over several years we agreed to organize and host the International Peptide Symposium in Japan The First International Peptide Symposium IPS 97 was held on November 30 December 5 1997 in Kyoto and was co sponsored by four Peptide Societies The attendance at this Symposium was 550 participants including representatives from 32 different countries We were very pleased with this outcome and anticipate an even larger attendance for forthcoming Symposia in future years The revolution and advances in science and technology during the past two decades has caused traditional peptide chemistry to expand to peptide science spreading from physical science to biology pharmacology and medicine

highlights in chemistry they remain a must Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry Some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued The current list of Specialist Periodical Reports can be seen on the inside flap of this volume
