stages are able to penetrate into a mammalian host cell where they multiply several times and thus amplify the infection and  
3 evasion from the immune system using several mechanisms This book with 13 chapters has been organized in four major  
sections 1 Basic Biology 2 Biochemistry and Molecular Biology 3 Parasite/Host Cell Interaction and 4 Chemotherapy The  
chapters include basic biological information on the protozoan lifecycle including new information on parasite genomics and  
proteomics In addition they analyze the interaction with host cells as well the immune response and evasion ending with  
information on experimental chemotherapy against Chagas disease Cell Signaling, Transcription, and Translation as
