systems not only can be used to establish a shared understanding but can also promote the diversity of understanding and identity Part II consists of chapters dealing with design concepts and reflections on cross cultural believability It suggests how an agent s behavior may be adapted to the cultural context of application while maintaining consistency and describes an approach based on the OCC model which is widely known and used in the embodied agents research community Next the section suggests that Affect Control Theory an empirically based mathematically elaborated perspective on microsociology can be incorporated into agents in order to give them a capacity for normative role behaviors and emotional displays Subsequent chapters pass on from more general considerations to the design and implementation of cross cultural characters and present virtual character design from the perspective of the artist and the practitioner in stressing that corporate culture and audience culture s both guide the design choices but the resulting culturally adapted agent is handcrafted It ends with a chapter that reports cross cultural user studies made in the UK Austria and Croatia Part III discusses the potential of agents as mediators in intercultural communication It includes an overview of the ways in which embodied agents are and could be used to coach the acquisition of intercultural communication skills followed by a chapter that suggests agents could be used to intentionally mold intercultural communication The last chapter addresses the need for a shared sense of community in large scale collaboration systems for multi national organizations that transcends any one cultural orientation and that is truly multicultural
