G. Jung's Thought Andrew Kuzmicki, Ilona Błocian, 2018-11-26 The book is a volume of the collected works of sixteen different authors They reflect the contemporary meaning of C G Jung s theory on many fields of scientific activity and in a different cultural context Japanese South American and North American as well as European English Italian and Polish The authors consider a specific milieu of Jung s theory and his influence or possible dialogue with contemporary ideas and scientific activity A major task of the book will be to outline the contemporary direct or indirect usefulness and applicability of Jung s ideas at the beginning of the twenty first century while simultaneously making a critical review of this theory *The World in the Mind and Sculpture of*

*Deafblind People* Ewa Anna Niestorowicz, 2017-05-11 The World in the Mind and Sculpture of Deafblind People discusses the creative capabilities of people with simultaneous impairment of sight and hearing It is a pioneering interdisciplinary study combining theories from the fields of pedagogy psychology semiotics and theory of art It presents a study of the act of creation performed by deafblind people which makes it possible to propose a vision of reality as conveyed through their sculptures and which forms a base for the scrutiny of the specific and individual ways of understanding the world and its visualisation in the minds of deafblind artists The key to the model of the analysis of the creative act proposed here is the concept of a sign developed by semiotics as proposed by Morris and Peirce The study indicates the fact that creative challenges can become the means of transgressing barriers of disabilities can serve as therapy and can influence social attitudes resulting in conscious studying of participating in and transforming reality This book will aid specialists working within the fields of pedagogy special education psychology and fine arts as well as teachers students researchers art therapists and workshop instructors

*Modelling in Medicine and Biology X* R. Kiss, 2013 This book contains the proceedings of the tenth in a series of biennial conferences on the topic of advances in medical and biological computation that began in 2001 The advances covered in the computer modelling and computational methods and measurements and their integration have applications in the study of orthopaedics cardiovascular systems biomechanics and electrical simulation amongst others and are leading to progress in medical care and treatment The conference topics cover a broad spectrum including the simulation of biomedical problems ranging from cardiovascular modelling to virtual reality and simulation in surgery

*Rethinking Teacher Education for the 21st Century* Wioleta Danilewicz, Alicja Korzeniecka-Bondar, Marta Kowalczyk-Walędziak, Gracienne Maria Louisa Veronica Lauwers, 2019-09-09 This book focuses on current trends potential challenges and further developments of teacher education and professional development from a theoretical empirical and practical point of view It intends to provide valuable and fresh insights from research studies and examples of best practices from Europe and all over the world The authors deal with the strengths and limitations of different models strategies approaches and policies related to teacher education and professional development in and for changing times digitization multiculturalism pressure to perform

*The Field Study in Social Psychology* Tomasz Grzyb, Dariusz Dolinski, 2021-09-08 This unique book offers a comprehensive introduction to field studies as a research method in social psychology demonstrating that field studies are an important element of contemporary social psychology and encourages its usage in a methodologically correct and ethical manner The authors demonstrate that field studies are an important and a much needed element of contemporary social psychology and that abandoning this method would be at a great loss for the field Examining successful examples of field studies including those by Sherif and Sherif studies of obedience by Hofling or the studies of stereotypes of the Chinese by LaPiere they explore the advantages and limitations of the field study method whilst offering practical guidance on how it can be used in experiments now and in the future Covering the history and

decline of the field study method particularly in the wake of the replication crisis the text argues for the revival the field study method by demonstrating the importance of studying the behaviour of subjects in real life rather than laboratory conditions In fact the results point to certain variables and research phenomena that can only be captured using field studies In the final section the authors also explain the methods to follow when conducting field studies to make sure they are methodologically correct and meet the criteria of contemporary expectations regarding statistical calculations while also ensuring that they are conducted ethically This is an essential reading for graduate and undergraduate students and academics in social psychology taking courses on methodology and researchers looking to use field study methods in their research
