**Modernism, Space and the City** Andrew Thacker, 2019-01-22 This innovative text examines the development of modernist writing in four European cities London Paris Berlin and Vienna The History of the London Underground Map Caroline Roope, 2022-09-21 Few transportation maps can boast the pedigree that London's iconic Tube map can. Sported on t-shirts, keyrings, duvet covers and most recently downloaded an astonishing twenty million times in app form, the map remains a long-standing icon of British design and ingenuity. Hailed by the art and design community as a cultural artifact, it has also inspired other culturally important pieces of artwork and in 2006 was voted second in BBC 2's Great British Design Test. But it almost didn't make it out of the notepad it was designed in. The story of how the Underground map evolved is almost as troubled and fraught with complexities as the transport network it represents. Mapping the Underground was not for the faint-hearted; it rapidly became a source of frustration and in some cases obsession, often driving its custodians to the point of distraction. The solution, when eventually found, would not only revolutionise the movement of people around the city but change the way we visualise London forever. Caroline Roope's wonderfully researched book casts the Underground in a new light, placing the world's most famous transit network and its even more famous map in its wider historical and cultural context, revealing the people not just behind the iconic map but behind the Underground's artistic and architectural heritage. From pioneers to visionaries, disruptors to dissenters, the Underground has had them all, as well as a constant stream of often disgruntled passengers. It is thanks to the legacy of a host of reformers that the Tube and the diagram that finally provided the key to understanding it have endured as masterpieces of both engineering and design. *Selling Places* Stephen Ward, 2005-10-09 *Selling Places* explores the fascinating development of the place marketing and promotion over the last 150 years, drawing on examples from Northern America, Britain and continental Europe. The processes involved and the promotional imagery employed are meticulously presented and richly illustrated. *The Railway and Modernity* Matthew Beaumont, Michael J. Freeman, 2007 Most research and writing on railway history has been undertaken in a way that disconnects it from the wider cultural milieu. Authors have been very effective at constructing specialist histories of transport but have failed to register the railway's central importance in the representation and understanding of modernity. This book brings together contributions from a range of established scholars in a variety of disciplines with the central purpose of exploring the railway less as a transport technology than as a key signifier of capitalist modernity. It examines the complex social relations in which the railway became historically embedded, identifying it as a central problematic in the cultural experience of modernity. It avoids the limitations of both the close-sighted empiricism typical of many transport historians and the long-sighted generalizations of cultural commentators who view the railway merely as a shorthand for the concept of progress over the nineteenth and twentieth centuries. The book draws on a diverse range of materials, including literary and historical forms of representation. It is also informed by a creative application of various critical theories. Semi-Detached

Empire Todd Kuchta, 2010-04-29 In the first book to consider British suburban literature from the vantage point of imperial and postcolonial studies Todd Kuchta argues that suburban identity is tied to the empire's rise and fall. He takes his title from the type of home synonymous with suburbia. Like the semi-detached house which joins separate dwellings under one roof, suburbia and empire were geographically distinct but imaginatively linked. Yet just as the semi conceals two homes behind a single facade, suburbia's apparent uniformity masks its defining oppositions between country and city, civilization and savagery, master and slave. While some people saw the suburbs as homegrown colonies, others viewed them as a terra incognita beyond the pale of British culture. Surveying a range of popular and canonical texts, Kuchta reveals the suburban foundations of a variety of unexpected fictional locales: the Thames Valley of H. G. Wells's Martian attack and the gaslit London of Arthur Conan Doyle's Sherlock Holmes, but also the tropical backwaters of Joseph Conrad's Malay Archipelago and the imperial communities of Raj fiction by E. M. Forster and George Orwell. This capacious view demonstrates suburbia's vital role in science fiction, detective tales, condition of England novels, modernist narratives of imperial decline, and contemporary multicultural fiction. Drawing on postcolonial theory, urban studies, and architectural scholarship, this book will appeal to readers interested in Victorian, modern, and contemporary British literature and cultures, especially those concerned with how place shapes class and masculine identity in the nineteenth and twentieth centuries. **The Investor's Monthly Manual**

, 1925 *City Record* Boston (Mass.), 1928 International Exhibitions and Urbanism Javier Monclús, 2017-05-15

International Exhibitions and Urbanism provides an insightful and comprehensive historical review of international exhibitions in its first half, which is then illustrated with a thorough technical analysis of the Zaragoza 2008 project in its second half. The first half offers a comparative analysis of nearly 50 events which have taken place over the past 150 years, as well as exploring the relationships with urbanism from a planning perspective. Underpinned by the first-hand information that the author has as one of the event's organizers, the second half is devoted to the Zaragoza project for the 2008

Exposition. After giving contextual historical and demographic information, the Expo's master plan and building projects are then described. Shasore, 2022-08-22 *Designs on Democracy* examines a pivotal period in the formation of the modern profession of architecture in Britain. It shows how architects sought to meet the newly articulated demands of a mass democracy in the wake of the First World War. It does so by providing a vivid picture of architectural culture in interwar London, the Imperial metropolis, drawing on histories of design practice, professionalism, and representation. Most accounts of this period tend to deal exclusively with the emergence of Modernism; this study takes a different approach, encompassing a much broader perspective on the liberal professional consensus that held sway, including architecture's mainstream and its so-called avant

garde Readers will encounter a number of unexpected narratives episodes and projects from the British Empire Exhibition at Wembley to the rebuilding of Waterloo Bridge from the impact of the Great Slump to the passing of the first Architects Registration Act 1931 from Trystan Edwards's radical housing campaigns to the Londoners League's unorthodox preservationism Pulling in a range of evidence and sources periodicals exhibitions photographs and films alongside architecture it evokes architectural culture by listening carefully to the tenor of its discourse Architecture's public realm is thus analysed through sometimes surprising phrases manners to understand ideals of public propriety vigilance to explore public proprietorship slump to contextualise the emergence of public relations machine craft to understand the forging of public institutions The volume spans the excitable discussions about the reconstruction of the profession for a democratic age after WWI to reconstruction and planning following WWII providing an ambitious revision of how we can understand twentieth century architecture in Britain

**London Underground** David Ashford, 2013-05-10 Surveying an unusually wide variety of material ranging from the Victorian triple decker novel to Modernist art and architecture to Pop music and graffiti this book suggests that the tube network is a transitional form linking the alienated spaces of Victorian England to the virtual spaces of our contemporary consumer capitalism

**Buildings of Empire** Ashley Jackson, 2013-11-28 Buildings of Empire takes the reader on an exciting journey through thirteen territories of the British Empire From Dublin Castle to the glass and steel of Sir Norman Foster's Hong Kong and Shanghai Bank skyscraper these buildings capture the essence of the imperial experience painting an intimate portrait of the biggest empire the world has ever seen the people who made it and the people who resisted it as well as the legacy of the imperial project throughout the world Ashley Jackson visits classic examples of the buildings that the British governed from the forts they often brutally imposed their rule from the railway stations they travelled from the banks they traded from the educational establishments they spread their values from as well as the grand colonial hotels they stayed in the sporting clubs and botanical gardens where they took their leisure and the monumental exhibition spaces in which they celebrated the achievements of settlement and imperial endeavour The history of these buildings does not end with the

empire that built them Their story in the aftermath of empire highlights the continuing legacy of many of the structures and institutions the British left behind as well as the sometimes unexpected role that these former symbols of alien rule have played in the establishment of new national identities in the years since independence
