proposals for ecological urban planning and the appropriate use of technology to create balanced living environments In the final chapters of *The Culture of Cities* he outlines possible paths toward utopian future cities that could be free of the stressors of the Megalopolis in sync with the rhythms of daily life powered by clean energy integrated with agricultural regions and full of honest and comfortable housing for the working class The principles set forth by these visions once applied to Nazi occupied Europe s razed cities are still relevant today as technological advances and overpopulation change the nature of urban life

Environmental Restoration and Design for Recreation and Ecotourism Robert L. France,2011-11-16 A wetland center in London parks in downtown San Francisco a wildlife sanctuary in Arcata and a wetlands park on the outskirts of Las Vegas what do these urban and suburban locations have in common They are leading examples of a new restoration design approach that is squarely placed at the interface of nature and culture

This multidisciplinary paradigm bridges the gap between an ecological approach preoccupied with returning damaged landscapes to an imagined original state and a landscape design approach concerned with creating a place for people to inhabit. *Environmental Restoration and Design for Recreation and Ecotourism* is the first book to provide a detailed examination of the entire process of restoring damaged or abandoned landscapes to benefit both nature and people specifically for the purposes of recreation and ecotourism. With a focus on history planning methodology design and construction it explores five case studies of successful regenerative landscape design projects and gives readers an inside look at the evolution of design projects. Two of the cases offer a particularly comprehensive review of award winning projects: the reparation of the degraded Las Vegas Wash into Clark County Wetlands Park and the transformation of the abandoned Barn Elms Reservoirs into the London Wetland Centre. Supported by extensive photographs tables maps sketches and schematics these case studies trace how ideas are first conceived and then adopted transformed or even abandoned along the way. Each case study also includes a questions and answers discussion with designers and managers. Emphasizing the need for interdisciplinary cooperation the book presents lessons learned from some of the most innovative projects in regenerative landscape design.
