Metropolitan America In Contemporary Perspective:

Metropolitan America Amos Henry Hawley, 1975 **Metropolitan America in Contemporary Perspective** Amos Henry Hawley, Vincent P. Rock, 1975 **Metropolitan America**, 1975 Urban Geography in America, 1950-2000 Brian J.L Berry, James Wheeler, 2014-05-01 Urban Geography in America offers a comprehensive historiography of this major field. Compiling the best essays from the flagship journal Urban Geography it shows the evolution of the field from the 1950s to 2000 as it shifted from data driven social science modeling in the 1960s to the more critical perspectives of the 1970s to postmodernism in the 1980s to feminism and globalization in the 1990s. It covers all the major trends and figures and features some of the most important names in the field. Ultimately this will be a necessary reference for all scholars in the field and all graduate students taking introductory courses and preparing for their comprehensive exams.

A Tale Of Two Cities Karen Evans, Penny Fraser, Ian Taylor, 2002-11 A Tale of Two Cities is a study of two major cities Manchester and Sheffield. Drawing on the work of major theorists the authors explore the everyday life making contributions to our understanding of the defining activities of life.

Transportation and Behavior Irwin Altman, 2013-06-29 The present volume in our series Human Behavior and Environment is devoted to a specific topic continuing the pattern established in the last two volumes. The current theme is behavioral science aspects of transportation. This topic was chosen to exemplify a problem area of practical import to which psychologists, sociologists and other behavioral and social scientists can make and have been making notable contributions. Our volume includes papers from a variety of psychological perspectives including human factors, environmental psychology and behavior modification along with other contributions from a sociologist and a transportation engineer interested in behavioral science contributions to transportation. Joining us as guest editor for this volume is Peter Everett, an environmental psychologist whose area of specialty is the study of behavioral components of transportation systems. Volume 6 of our series currently in preparation will be devoted to behavior and the natural environment. A provisional table of contents for that volume appears on page v.

Home Environments Irwin Altman, Carol M. Werner, 2013-06-29 The present volume in the series focuses on homes, residences and dwellings. Although many fields have had a long standing interest in different aspects of home environments, the topic has recently come to the forefront in the interdisciplinary environment and behavior field. Researchers and theorists from many disciplines have begun to meet regularly, share ideas and perspectives and move the investigation of psychological

social and behavioral aspects of home environments to the central arena of environment and behavior studies This volume representative though not comprehensive attempts to provide a sampling of contemporary perspectives on the study of home environments As in previous volumes the authors are drawn from a variety of disciplines including environmental design fields of architecture and planning and from the social science fields of psychology sociology anthropology and history This diversity of authors and perspectives makes salient the principle that the study of homes in relation to behavior requires the contributions of many disciplines Moreover the chapters in this volume reflect an array of research and theoretical viewpoints different scales of home environments e g objects and areas the home as a whole the home as embedded in neighborhood and communities etc design and policy issues and necessarily a comparative and cross cultural perspective Home environments are at the core of human life in most cultures and it is hoped that the contributions to this volume display the excitement potential and importance of research and theory on homes

New Towns for the Twenty-First Century Richard Peiser, Ann Forsyth, 2021-01-01 New towns large comprehensively planned developments on newly urbanized land boast a mix of spaces that in their ideal form provide opportunities for all of the activities of daily life From garden cities to science cities new capitals to large military facilities hundreds were built in the twentieth century and their approaches to planning and development were influential far beyond the new towns themselves Although new towns are notoriously difficult to execute and their popularity has waxed and waned major new town initiatives are increasing around the globe notably in East Asia South Asia and Africa *New Towns for the Twenty First Century* considers the ideals behind new town development the practice of building them and their outcomes A roster of international and interdisciplinary contributors examines their design planning finances management governance quality of life and sustainability Case studies provide histories of new towns in the United States Asia Africa and Europe and impart lessons learned from practitioners The volume identifies opportunities afforded by new towns for confronting future challenges related to climate change urban population growth affordable housing economic development and quality of life Featuring inventories of classic new towns twentieth century new towns with populations over 30 000 and twenty first century new towns the volume is a valuable resource for governments policy makers and real estate developers as well as planners designers and educators Contributors Sandy Apgar Sai Balakrishnan Jaap Jan Berg Paul Buckhurst Felipe Correa Carl Duke Reid Ewing Ann Forsyth Robert Freestone Shikyo Fu Pascaline Gaborit Elie Gamburg Alexander Garvin David R Godschalk Tony Green Cheng He Guan Rachel Keeton Steven Kellenberg Kyung Min Kim Gene Kohn Todd Mansfield Robert W Marans Robert Nelson Pike Oliver Richard Peiser Michelle Provoost Peter G Rowe Jongpil Ryu Andrew Stokols Adam Tanaka Jamie von Klemperer Fulong Wu Ying Xu Anthony Gar On Yeh Chaobin Zhou

When Government Fails Mark Baldassare,1998-06-01 When Orange County California filed for Chapter 9 protection on December 6 1994 it became the largest municipality in United States history to declare bankruptcy In the first comprehensive analysis of this momentous fiscal crisis Mark Baldassare uncovers the many twists and turns from the dark days in December 1994 to the financial recovery of June 1996 Utilizing a wealth of primary materials from the county government and Merrill Lynch as well as interviews with key officials and players in this drama Mark Baldassare untangles the causes of this 1 64 billion fiasco He finds three factors critical to understanding the bankruptcy one the political fragmentation of the numerous local governments in the area two the fiscal conservatism underlying voters feelings about their tax dollars three the financial austerity in state government and in meeting rising state expenditures Baldassare finds that these forces help to explain how a county known for its affluence and conservative politics could have allowed its cities school water transportation and sanitation agencies to be held hostage to this failed investment pool Meticulously examining the events that led up to the bankruptcy the local officials response to the fiscal emergency and the road to fiscal recovery as well as the governmental reforms engendered by the crisis When Government Fails is a dramatic and instructive economic morality tale Eminently readable it underlines the dangers inherent in a freewheeling bull economy and the imperatives of local and state governments to protect fiscal assets As Baldassare shows Orange County need not and should not happen again

Perceiving Environmental Quality Kenneth Craik,2013-03-09 The purpose of this publication is

to report on a series of research workshops which examined the place of environmental perception in a comprehensive system of indices for assessing and monitoring trends in environmental quality The specific objectives of the workshops were to 1 define the state of the art in research on perception of environmental quality and identify salient conceptual and methodological issues 2 delineate potential uses of perceived environmental quality indices PEQIs and related issues regarding ways in which PEQIs might enhance implementation revision or refinement of policy orientations 3 identify the types of research which would assess adequately the efficacy of the development and the application of PEQIs and 4 out line a realistic pragmatic research strategy that relates to potential uses and identified policy issues The workshops were supported by a grant from the National Science Foundation No GSOC75 0782 and were held during the spring and summer of 1975 in Amherst Massachusetts and New York City Contributed chapters for this volume were commissioned with funds from the Institute for Man and Environment University of Massachusetts Scientific contributors to the understanding of environmental perception have increased substantially over the last decade along with recognition that this realm of knowledge is crucial for an informed perspective on the impact of man on the environment At the same time there exists general consensus that the field remains diffuse and uncoordinated Lowenthal 1972b

Walmsley, G.J. Lewis, 2014-09-19 First published in 1994 This book comprises a second edition of Human Geography behavioural approaches first published in 1984 The first edition attempted to synthesize the massive volume of geographical literature to have appeared mainly since 1960 concerned with both how people come to know the environment in which they live and with the way in which such knowledge influences subsequent spatial behaviour As with the first edition the rationale for advantages of and shortcomings with behavioural approaches are explored at length in both substantive chapters and in a number of detailed examinations of particular aspects of life in advanced Western society *An Assessment of Sample Surveys as Feedback Mechanisms for Guiding Local Decision Making* Peter Jeffrey May, 1979 HUD Challenge United States. Department of Housing and Urban Development, 1976 **Investigating Quality of Urban Life** Robert W.

Marans, Robert J. Stimson, 2011-08-31 The study of quality of urban life involves both an objective approach to analysis using spatially aggregated secondary data and a subjective approach using unit record survey data whereby people provide subjective evaluations of QOL domains This book provides a comprehensive overview of theoretical perspectives on QOUL and methodological approaches to research design to investigate QOUL and measure QOL dimensions It incorporates empirical investigations into QOUL in a range of cities across the world **Urban Sociology** William G.

Flanagan, 2010-01-16 The fifth edition of this text presents a balanced review of the ecological arguments that the urban arena produces unique experiential and urban based cultural effects while exploring the broader political and economic contexts that produce and modify the urban environment In addition to examining the urban dimensions of such topics as

community formation and continuity minority and majority dynamics ethnic experience poverty power and crime it provides an analysis of the spatial distribution of population and resources with regard to the metropolitanization of the urban form and the interaction between urban concentration and development and underdevelopment From a first chapter that begins with a discussion of some of the more micrological features of the urban experience the text focuses on the significance of the more macrological cultural social organizational and political dimensions of urban change in an historical span that includes the first cities and concludes with an exploration of the implications of cyberspace transnationalism and global terrorism for the future of urban sociology While the work focuses primarily on the North American case its analytical and integrated discussion makes it applicable to urban societies in general
