Metropolitan Phoenix Place Making And Community Building In The Desert:

Metropolitan Phoenix Patricia Gober, 2006 *Metropolitan Phoenix* explores the efforts to build a sustainable desert city in the face of environmental uncertainty rapid growth and increasing social diversity **Desert Visions and the Making of Phoenix, 1860-2009** Philip VanderMeer, 2010-12-16 Whether touted for its burgeoning economy affordable housing and pleasant living style or criticized for being less like a city than a sprawling suburb Phoenix by all environmental logic should not exist Yet despite its extremely hot and dry climate and its remoteness Phoenix has grown into a massive metropolitan area This exhaustive study examines the history of how Phoenix came into being and how it has sustained itself from its origins in the 1860s to its present status as the nation's fifth largest city From the beginning Phoenix sought to grow and although growth has remained central to the city's history its importance meaning and value have changed substantially over the years The initial vision of Phoenix as an American Eden gave way to the Cold War Era vision of a High Tech Suburbia which in turn gave way to rising concerns in the late twentieth century about the environmental social and political costs of growth To understand how such unusual growth occurred in such an improbable location Philip VanderMeer explores five major themes the natural environment urban infrastructure economic development social and cultural values and public leadership Through investigating Phoenix's struggle to become a major American metropolis his study also offers a unique view of what it means to be a desert city *Metropolitan Phoenix* Patricia Gober, 2013-02-12 Inhabitants of Phoenix tend to think small but live big They feel connected to individual neighborhoods and communities but drive farther to get to work feel the effects of the regional heat island and depend in part for their water on snow packs in Wyoming In *Metropolitan Phoenix* Patricia Gober explores the efforts to build a sustainable desert city in the face of environmental uncertainty rapid growth and increasing social diversity *Metropolitan Phoenix* chronicles the burgeoning of this desert community including the audacious decisions that created a metropolis of 3.6 million people in a harsh and demanding physical setting From the prehistoric Hohokam who constructed a thousand miles of irrigation canals to the Euro American farmers who converted the dryland river valley into an agricultural paradise at the end of the nineteenth century Gober stresses the sense of beginning again and building anew that has been deeply embedded in wave after wave of human migration to the region In the early twentieth century the so called health seekers asthmatics arthritis and tuberculosis sufferers arrived with the hope of leading more vigorous lives in the warm desert climate while the postwar period drew veterans and their families to the region to work in emerging electronics and defense industries Most recently a new generation of elderly seeking active retirement has settled into planned retirement communities on the perimeter of the city *Metropolitan Phoenix* also tackles the future of the city The passage of a recent transportation initiative efforts to create a biotechnology incubator and growing publicity about water shortages and school funding have placed Phoenix at a crossroads forcing its citizens to grapple with the issues of social equity environmental quality and economic security Gober argues that given Phoenix's dramatic population growth and

enormous capacity for change it can become a prototype for twenty first century urbanization reconnecting with its desert setting and building a multifaceted sense of identity that encompasses the entire metropolitan community

Bird on Fire Andrew Ross,2011-10-27 Phoenix Arizona is one of America s fastest growing metropolitan regions It is also its least sustainable one sprawling over a thousand square miles with a population of four and a half million minimal rainfall scorching heat and an insatiable appetite for unrestrained growth and unrestricted property rights In *Bird on Fire* eminent social and cultural analyst Andrew Ross focuses on the prospects for sustainability in Phoenix a city in the bull s eye of global warming and also the obstacles that stand in the way Most authors writing on sustainable cities look at places that have excellent public transit systems and relatively high density such as Portland Seattle or New York But Ross contends that if we can t change the game in fast growing low density cities like Phoenix the whole movement has a major problem Drawing on interviews with 200 influential residents from state legislators urban planners developers and green

business advocates to civil rights champions energy lobbyists solar entrepreneurs and community activists Ross argues that if Phoenix is ever to become sustainable it will occur more through political and social change than through technological fixes Ross explains how Arizona's increasingly xenophobic immigration laws science denying legislature and growth at all costs business ethic have perpetuated social injustice and environmental degradation But he also highlights the positive changes happening in Phoenix in particular the Gila River Indian Community's successful struggle to win back its water rights potentially shifting resources away from new housing developments to producing healthy local food for the people of the Phoenix Basin Ross argues that this victory may serve as a new model for how green democracy can work redressing the claims of those who have been aggrieved in a way that creates long term benefits for all Bird on Fire offers a compelling take on one of the pressing issues of our time finding pathways to sustainability at a time when governments are dismally failing in their responsibility to address climate change

necessarily entail high growth levels but instead aim to improve the quality of city life The notion of commercial urbanism is both novel and engaging since much of the vibrancy of cities comes from commerce consumption and entertainment The idea itself is a major contribution of the book Tridib Kumar Banerjee University of Southern California
