Metropolitan Problems Ibues Confronting New York And Tokyo:

Metropolitan Problems S. Miles, 2013-05-13 *Metropolitan Problems* is the end product of one of the most dynamic research programmes of its kind ever conceived and executed The book which took three years to complete represents the culmination of a two year study that was highlighted by a conference held in Toronto in 1967 In the early 1960s the Bureau of Municipal Research in Metropolitan Toronto decided that a significant way for it to celebrate Canada's centennial would be to initiate a systematic international study of the world's metropolitan areas The study with the official cooperation of the United Nations was designed to produce positive insights into the methods of coping with the interlocking sets of problems associated with the expansion of the modern metropolis Twelve papers on various aspects of metropolitan problems were commissioned from an international body of experts Working with these experts were study groups drawn from forty major metropolitan centres throughout the world After making exhaustive studies of their respective urban centres the groups reported their findings and submitted detailed briefs through their representatives at the conference Throughout the symposium a conscious effort was made to examine single aspects of social economic and physical change within the overall perspective of the metropolis The book reflects this approach Each chapter directs attention to specific problems of the metropolis problems resulting from the contradiction between accelerating technology and our ability to cope with the incredible pace and rate of change Together they prove that despite differences in technology culture and political and social matters the major urban areas of the world do have much in common Emerging tendencies can be analysed and corrective and preventative measures be made through comparative analysis This book was first published in 1970 **Metropolitan Problems**

Tōkyō Shisei Chōsakai, 1992 *Scaling Urban Environmental Challenges* Peter J Marcotullio, Gordon McGranahan, 2012-06-25 *Think globally act locally* emphasizes the importance of scale in dealing with environmental challenges but not how to factor it in This major new book focuses on the spatial dimensions of urban environmental burdens showing how important it is to take these into account when pursuing environmental justice and good governance whether in the context of the sanitary risks of slum living the pollution of uncontrolled industrialization and motorization or the enormous ecological footprints of affluent urban lifestyles Written by leading experts in the fields of urban development and environmental planning the book reviews the urban environmental shifts that have shaped today's challenges and examines conditions and problems in the urban centres of low middle and high income countries Case studies address such economically diverse cities as Accra New Delhi Mexico City and Manchester while thematic chapters explore issues including water sanitation and transportation The book concludes by exploring and analysing different scales of governance The editors argue that we should not rely solely on local governance to address local burdens like poor sanitation nor depend only on global governance for global challenges such as greenhouse gas emissions but that scale is crucial in both understanding the problems and devising successful responses Published with UNU IAS and IIED **Urban Development Challenges,**

Risks and Resilience in Asian Mega Cities R.B. Singh, 2014-10-16 In this book an interdisciplinary research group of faculty members researchers professionals and planners contributed to an understanding of the dynamics and dimensions of emerging challenges and risks in megacities in the rapidly changing urban environments in Asia and examined emerging resilience themes from the point of view of sustainability and public policy The world's urban population in 2009 was approximately 3.4 billion and Asia's urban population was about 1.72 billion Between 2010 and 2020 411 million people will be added to Asian cities 60 % of the growth in the world's urban population By 2020 of the world's urban population of 4.2 billion approximately 2.2 billion will be in Asia China and India will contribute 31.3 % of the total world urban population by 2025 Developing Asia's projected global share of CO2 emissions for energy consumption will increase from 30 % in 2006 to 43 % by 2030 City regions serve as magnets for people enterprise and culture but with urbanisation the worst form of visible poverty becomes prominent The Asian region with a slum population of an estimated 505.5 million people remains host to over half of the world's slum population The book provides information on a comprehensive range of environmental threats faced by the inhabitants of megacities It also offers a wide and multidisciplinary group of case studies from rapidly growing megacities with populations of more than 5 million from developed and developing countries of Asia Globalization and Urban Development

Harry W. Richardson, Chang-Hee C. Bae, 2006-03-30 Most research on globalization has focused on macroeconomic and economy wide consequences This book explores an under researched area the impacts of globalization on cities and national urban hierarchies especially but not solely in developing countries Most of the globalization urban research has concentrated on the global cities e.g New York London Paris Tokyo that influence what happens in the rest of the world In contrast this research looks at the cities at the receiving end of the forces of globalization The general finding is that large cities on balance benefit from globalization although in some cases at the expense of widening spatial inequities

Challenges of Urban Mobility, Transport Companies and Systems Michał Suchanek, 2019-05-18 This proceedings volume examines individual city transports transport companies and entire transport systems Featuring select contributions presented at the 2018 TranSopot Conference in Sopot Poland this book provides an analysis of transportation solutions both at the micro level single city or single company as well as the macro level whole transportation systems The enclosed research and case studies provide a theoretical background for transport analysis but also new innovative and sustainable solutions to transportation while also increasing the efficiency of transport operations Transportation is a very specific area of social and economic life It creates countless opportunities and fulfills the need for mobility while also generating significant cost direct for the company or indirect to societies Planning and organizing transport is a task which requires a multi level approach with a focus on operational ecological and financial aspects At a time in which many transport systems are unable to grow extensively due to lack of space or increased cost these activities are even more crucial The enclosed research from researchers scholars and practitioners provides not only new theories but also empirical data and practical

experience The TranSopot 2018 conference is a continuation of a long series of conferences devoted to the topic of transport sector development The goal of the conference is to exchange current trends and spread the results of current research into the fields of transport growth development and management

Governing Urban Indonesia Edward Aspinall,Amalinda Savirani,2024-08-28 Indonesia has become a majority urban society Despite the classic images of rice fields volcanoes and rural life we often associate with the country now almost 60 per cent of Indonesia s people live in cities towns suburbs gated communities and other urban areas Urbanisation has brought with it a familiar range of problems including some of the worst traffic jams and air pollution in the world housing scarcity periodic flooding and dramatic land subsidence These problems pose massive challenges to Indonesian governments as they try to provide clean water public transport housing garbage disposal and other services to urban dwellers Governing Urban Indonesia brings together scholars and practitioners with diverse backgrounds to examine how urbanisation is remaking Indonesia and how governments are responding It focuses on how varied political patterns are shaping urban governance enabling some cities to pioneer improved service delivery and better public amenities for their citizens while others stagnate And it brings to bear multiple perspectives on how historical legacies changing residential patterns social inequality and myriad other factors are combining to produce a new social and political landscape across urban Indonesia

Migration and Urbanization: Local Solutions for Global Economic Challenges Ushakov, Denis,2019-08-16 International migration and urbanization as economic processes can provide great opportunities to solve local and regional economic and social problems and lead to the leveling of global economic unfairness and multi complexity However uncontrolled migration and urbanization can easily destroy market stability and create many new social and economic problems both in developed due to migration and developing due to urbanization countries Migration and Urbanization Local Solutions for Global Economic Challenges is a collection of innovative research that sets basic rules and patterns for state regulation of urbanization and international migration and for increasing the economic efficiency of developed and developing countries Additionally the book evaluates the economic impact of urbanization and international migration at the global national and regional levels While highlighting topics including economic security modern mechanisms and migration policy this book is ideally designed for government officials economists educators policymakers industry leaders business managers academicians researchers and students

Rise Of Megacities, The: Challenges, Opportunities And Unique Characteristics Jerzy Kleer,Katarzyna Anna

Nawrot,2018-02-13 Megacities of over 10 million inhabitants are unique entities in their own right both challenging and supporting the policies governance and cohesion of states In developing and developed economies the rise of megacities can be seen to have negative and positive effects from exacerbating and deepening societal problems inherent in inequality and poverty to increasing opportunities for innovation education interconnectivity and development The Rise of Megacities takes a multidisciplinary and interdisciplinary approach to analysis of their growth It examines both the major new challenges that

the expansion of megacities brings for development at large and the opportunities they might create for the public good In addition it shows how more established cities such as Tokyo New York or European examples can provide lessons for governance and development of rapidly urbanizing populations Using case studies and academic theory it takes into account both the similarities and differences of megacities and gives a comprehensive study of them This book is perfect for students and researchers of development economics urban studies international relations and the social sciences as well as those interested in how the world economy is changing through globalization *Encyclopedia of Global Justice* Deen K.

Chatterjee,2011-10-06 This two volume Encyclopedia of Global Justice published by Springer along with Springer s book series Studies in Global Justice is a major publication venture toward a comprehensive coverage of this timely topic The Encyclopedia is an international interdisciplinary and collaborative project spanning all the relevant areas of scholarship related to issues of global justice and edited and advised by leading scholars from around the world The wide ranging entries present the latest ideas on this complex subject by authors who are at the cutting edge of inquiry The Encyclopedia sets the tone and direction of this increasingly important area of scholarship for years to come The entries number around 500 and consist of essays of 300 to 5000 words The inclusion and length of entries are based on their significance to the topic of global justice regardless of their importance in other areas **Managing Global Risks in the Urban Age** Yee-Kuang

Heng,2016-03-03 The first full length exposition of what it terms a global city global risks nexus this volume crosses disciplinary boundaries to draw upon research from Security Studies Geography Sociology and Urban Studies Innovative in its approach integrating theories about Global Cities with those positing a Global Risk Society Yee Kuang Heng positions this research in the midst of two concurrent global trends that will gain more significance in coming years The world is experiencing the consequences of not only rapid globalisation but also urbanization In 2008 the UN declared that more than half the world s population was now urban At the same time highly connected global cities like New York London Tokyo and Singapore also face rapidly spreading global risks such as pandemics and financial crises Unique in developing a typology of global risks that threaten a global city like Singapore beyond its Asian focus the book also draws out thematic and policy lessons pertinent to other global cities Global cities do not simply materialize They are dependent on a range of stakeholders at various levels that produce and re produce its command and control capabilities in the face of global risks Singapore s experiences managing global risks in the financial aviation and maritime domains are common concerns shared by many countries and cities that have or aspire to develop similar critical infrastructure Cities in Transition Nirmala

Rao,2008-01-07 This is an up to date and topical treatment of how six major cities in Europe North America and Asia are coping with the new demands on urban government Population expansion the migration of new peoples and disparities between cities and suburbs are longstanding features of the urban crisis Today city governments also face demands for popular participation and better public services while they struggle to position themselves in the new world economy While

each of the cities is located in its unique historical setting the emphasis of the book is upon the common dilemmas raised by major planning problems and the search for more suitable approaches to governance and citizen involvement A principal theme is the re engineering of institutional structures designed to foster local responsiveness and popular participation The discussion is set in the context of the globalizing forces that have impacted to different degrees at different times upon London Tokyo Toronto Berlin Hyderabad and Atlanta Cities in Transition is a major and original addition to the comparative literature on urban governance
