Global Cities, Governance and Diplomacy Michele Acuto, 2013-02-11 This book illustrates the importance of global cities for world politics and highlights the diplomatic connections between cities and global governance While there is a growing body of literature concerned with explaining the transformations of the international order little theorisation has taken into account the key metropolises of our time as elements of these revolutions The volume seeks to fill this gap by demonstrating how global cities have a pervasive agency in contemporary global governance The book argues that looking at global cities can bring about three fundamental advantages on traditional IR paradigms First it facilitates an eclectic turn towards more nuanced analyses of world politics Second it widens the horizon of the discipline through a multiscalar image of global governance Third it underscores how global cities have a strategic diplomatic positioning when it comes to core contemporary challenges such as climate change This book will be of much interest to students of urban studies global governance diplomacy and international relations in general

*Death and Survival in Urban Britain* Bill Luckin, 2015-05-19 The narratives of disease hygiene developments in medicine and the growth of urban environments are fundamental to the discipline of modern history Here the eminent urban historian Bill Luckin re introduces a body of work which published together for the first time along with new material and contextualizing notes marks the beginning of this important strand of historiography Luckin charts the spread of cholera fever and the everyday but frequently deadly infections that afflicted the inhabitants of London and its new manufacturing districts between the 1830s and the end of the nineteenth century A second part Pollution and the Ills of Urban Industrialism concentrates on the water and smoke problems and the ways in which they came to be perceived defined and finally brought under a degree of control *Death and Survival in Urban Britain* explores the layered and interacting narratives within the framework of the urban revolution that transformed British society between 1800 and 1950

**Semi-Detached Empire** Todd Kuchta, 2010-04-29 In the first book to consider British suburban literature from the vantage point of imperial and postcolonial studies Todd Kuchta argues that suburban identity is tied to the empire s rise and fall He takes his title from the type of home synonymous with suburbia Like the semi detached house which joins separate dwellings under one roof suburbia and empire were geographically distinct but imaginatively linked Yet just as the semi conceals two homes behind a single facade suburbia s apparent uniformity masks its defining oppositions between country and city civilization and savagery master and slave While some people saw the suburbs as homegrown colonies others viewed them as a terra incognita beyond the pale of British culture Surveying a range of popular and canonical texts Kuchta reveals the suburban foundations of a variety of unexpected fictional locales the Thames Valley of H G Wells s Martian attack and the gaslit London of Arthur Conan Doyle s Sherlock Holmes but also the tropical backwaters of Joseph Conrad s Malay Archipelago and the imperial communities of Raj fiction by E M Forster and George Orwell This capacious view demonstrates suburbia s vital role in science fiction detective tales condition of England novels modernist narratives of

imperial decline and contemporary multicultural fiction Drawing on postcolonial theory urban studies and architectural scholarship this book will appeal to readers interested in Victorian modern and contemporary British literature and cultures especially those concerned with how place shapes class and masculine identity in the nineteenth and twentieth centuries

*The European City and Green Space* Peter Clark, 2016-12-05 Recent years have seen sustained public debate and controversy over the greening of European cities associated with the environmental movement pressures of urban redevelopment and the promotional strategies of cities competing in a global market But the European debate over urban green space has a long history dating back to Victorian concerns for the green lungs of the city to combat the health and social problems caused by rapid population and industrial growth This book explores the multiplicity of green space developments in the modern city ranging over parks and commons garden suburbs and the cities in the park allotment gardens green belts and national urban parks It is concerned not only with the different types of green space but the many influences shaping their evolution from international planning ideas to the rise of modern day sport and leisure and the effects of the transport revolution No less vital in this story is the interaction of the many actors involved in the often fractious political process of creating green spaces architects and planners politicians developers and other businessmen NGOs and local residents This volume is particularly concerned with contexts how international planning ideas are transmitted and adapted in different European cities how the construction of green space is affected by local power structures and relationships and how ordinary people perceive and use green spaces quite often at variance with official designs *The European City and Green Space* looks at these and other issues through the prism of four metropolises London Stockholm Helsinki and St Petersburg All represent different types of North European city yet each has experienced distinctive economic political and cultural trajectories whilst also facing powerful challenges and problems of similar kinds with regard to green space This volume examines how each has

responded to them and what patterns emerge

**Half a Century of Municipal Decline** Martin Louglin, M. David Gelfand, Ken Young, 2013-06-17 Local government passed unscathed through the political and economic upheavals which followed the Great Depression Contemporary commentators had every reason to look forward to continued growth and expansion in the role of local government which was seen as the main vehicle for the social programmes of the coming Welfare State That optimism was misplaced Many of the trends of the early twentieth century have been reversed From the vantage point of 1985 local government was in crisis so severe that its continued existence was called into question In this unique book eleven authors explain what happened and how the local government system weakened Political financial economic and legal issues are explored as are factors such as housing planning and social welfare This book was first published in 1985

**Slow Train to Arcadia** Duncan Gager, 2024-11-12 Railway commuting is today a mundane and routine necessity yet for the Victorians it was a novel experience It opened up new possibilities of living at a remove from the crowded urban centre while staying connected to its places of work Commuting helped transform London's urban landscape as the compact city of Dickens's London gave way to the suburban sprawl of the British capital in the early twentieth century Slow Train to Arcadia is a history of London's suburban railway network from the 1830s to 1921 and its impact on urban mobility The book charts the relationship between the three main actors in the formation of the suburban railway the state the railway companies and the travelling public While the railway age came quickly to Victorian Britain commuting took a slower journey to commonplace status In the 1840s William Gladstone sought to make railway travel accessible to all but commuting was experienced differently according to class and gender Slow Train to Arcadia explains why the democratization of commuting proved to be an elusive goal Today's workers are living through a fundamental reversal in the relationship between home and the workplace For many a daily commute is being consigned to history a shift that will have long term social and economic consequences Slow Train to Arcadia is a timely exploration of the origins of mass commuting a similarly transformative period for the daily patterns of working life

The Greening of London, 1920-2000 Matti O. Hannikainen, 2017-05-15 The long term development of public green spaces such as parks public gardens and recreation grounds in London during the twentieth century is a curiously neglected subject despite the fact that various kinds of green spaces cover huge areas in cities in the UK today This book explores how and why public green spaces have been created and used in London and what actors have been involved in their evolution during the course of the twentieth century Building on case studies of the contemporary boroughs of Camden and Southwark and making use of a wealth of archival material the author takes us through the planning and creation stages to the intended and actual uses and ongoing management of the spaces By highlighting the rise and fall of municipal authorities and the impact of neo liberalism after the 1970s the book also deepens our understanding of how London has been governed planned and ruled during the twentieth century It makes a crucial contribution to academic as well as political discourse on the history and present role of green space in sustainable

cities     **An Economic History of London 1800-1914** Professor Michael Ball, David T Sunderland, 2001-04-26 This is the first comprehensive survey of the economic development of the world's first great industrial metropolis. Modern theories of urban economics are used to shed new light on the process of change in the city     Leading the Localities Colin Copus, 2013-02-28 This book now available in paperback is the result of national research conducted amongst England's directly elected mayors and the councillors that serve alongside them. It is the first such major publication to assess the impact on local politics of this new office and fills a gap in our understanding of how the Local Government Act 2000 has influenced local governance. The book also draws from a range of research that has focused on elected mayors in England and overseas to set out how the powers, roles and responsibilities of mayors and mayoral councils would need to change if English local politics is to fundamentally reconnect with citizens. It not only explores how English elected mayors are currently operating but how the office could develop and as such is a major contribution to the debate about the governance of the English localities     *Modernity and Metropolis* P. Brooker, 2001-12-17 A study of urban identity and community looks at selected twentieth-century literary and film texts in the context of theorizations of modernism, postmodernism, postcoloniality and globalization. Brooker draws on Beck and Giddens to propose a reflexive modernism which rewrites and reimagines the urban scene. The principal cities considered are London and New York, Tokyo, Hong Kong and Bangkok. Writers considered include Ezra Pound and T. S. Eliot, Langston Hughes, Hanif Kureishi, Iain Sinclair, Paul Auster, Sarah Schulman and William Gibson. Filmmakers include Patrick Keiller and Wong Kar Wai     *Routledge Library Editions: Urban Planning* Various, 2021-06-23 The volumes in this set originally published between 1970 and 1998 draw together research by leading academics in the area of urban planning and provide a rigorous examination of related key issues. The volumes examine teaching, urban markets, planning, transport, planning, poverty, politics, forecasting techniques and an examination of the inner city in Europe and the US whilst also exploring the general principles and practices of planning. This set will be of particular interest to students of sociology, geography, planning and urbanization respectively     The Victorian Music Hall Dagmar Kift, 1996-10-24 With the exception of the occasional local case study, music hall history has until now been presented as the history of the London halls. This book attempts to redress the balance by setting music hall history within a national perspective. Kift also sheds a new light on the roles of management, performers and audiences. For example, the author confutes the commonly held assumption that most women in the halls were prostitutes and shows them to have been working women accompanied by workmates of both sexes or by their families. She argues that before the 1890s the halls catered predominantly to working-class and lower middle-class audiences of men and women of all ages and were instrumental in giving them a strong and self-confident identity. The hall's ability to sustain a distinct class awareness was one of their greatest strengths but this factor was also at the root of many of the controversies which surrounded them. These controversies are at the centre of the book and Kift treats them as test cases for social relations which provide fresh insights

into nineteenth century British society and politics      *Cities for the New Millennium* Marcial Echenique, Andrew Saint, 2014-04-04 *Cities for the New Millennium* is the outcome of a joint conference held in Salford in July 2000 by the Royal Institute of British Architects and the University of Cambridge's Department of Architecture. It tackles these questions in the light of the Urban Task Force's report about the future of Britain's cities and communities but sets them in an international and historical context. Professionals, architects, engineers and developers as well as academics from different countries and disciplines here lavish their expertise on issues of transportation, density, land use, risk and energy saving. Others present urban scale buildings or landscapes that have been judged inspirational or inventive. This book therefore is not just about theories of urbanism. It reveals how co-operation and debate between different parties and professions can illuminate the creative kind of urban development we should be aiming for.

*A Mobile Century?* Colin G. Pooley, Jean Turnbull, Mags Adams, 2017-03-02 For most people in the developed world the ability to travel freely on a daily basis is almost taken for granted. Although there is a large volume of literature on contemporary mobility and associated transport problems, there are no comprehensive studies of the ways in which these trends have changed over time. This book provides a detailed empirical analysis of mobility change in Britain over the twentieth century. Beginning with an explanatory theoretical overview setting the UK case studies within an international context, the book then analyses changes in the journey to school, the journey to work and travelling for pleasure. It also looks at the ways in which changes in mobility have interacted with changes in the family life cycle and assesses the impact of new transport technologies on everyday mobility. It concludes by examining the implications of past mobility change for contemporary transport policy.

*The Culture of Property* Jordanna Bailkin, 2004-07-15 What kind of property is art? Is it property at all? Jordanna Bailkin's *The Culture of Property* offers a new historical response to these questions, examining ownership disputes over art objects and artifacts during the crisis of liberalism in the United Kingdom. From the 1870s to the 1920s Britons fought over prized objects from ancient gold ornaments dug up in an Irish field to a portrait of the Duchess of Milan at the National Gallery in London. They fought to keep these objects in Britain, to repatriate them to their points of origin and even to destroy them altogether. Bailkin explores these disputes in order to investigate the vexed status of property within modern British politics as well as the often surprising origins of ongoing institutional practices. Bailkin's detailed account of these struggles illuminates the relationship between property and citizenship, which has constituted the heart of liberal politics as well as its greatest weakness. Drawing on court transcripts, gallery archives, exhibition reviews, private correspondence and a striking series of cartoons and photographs, *The Culture of Property* traverses the history of gender, material culture, urban life, colonialism, Irish and Scottish nationalism and British citizenship. This fascinating book challenges recent scholarship in museum studies in light of ongoing culture wars. It should be required reading for cultural policy makers, museum professionals and anyone interested in the history of art and Britain.
