## **Mexico's Second Agrarian Reform Household And Community Responses:**

Mexico's Second Agrarian Reform Alain De Janvry, Gustavo Gordillo, Elisabeth Sadoulet, 1997 This book provides a detailed quantitative characterization of the household and community responses to the rural reforms already in progress De Janvry Gordillo and Sadoulet present and analyze data from two nationwide surveys of Mexican ejidos conducted in 1990 and 1994 Land Privatization in Mexico María Teresa Vázquez Castillo, 2004 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company

**The Economics of Gender in Mexico** Elizabeth G. Katz, Maria Cecilia Correia, 2001-01-01 Extrait de la couverture Mexico has witnessed major demographic social and economic changes since the 1960s In this context the distinct roles of men and women have also changed as exemplified by female labor force participation which almost tripled in the second half of the 20th century However traditional gender roles continue to constrain men's and women's opportunities and well being in Mexico The book examines these issues from a life cycle and economic perspective It looks at the way traditional gender roles shape male and female economic activities and outcomes beginning with school age children and their education patterns continuing with the labor force participation of adults in rural and urban areas and ending with the situation of elderly men and women The book contains new material on changes in the maquiladora sector which has historically provided important work opportunities for women as well as the distinct impact of ejido reform on rural men and women Changing Structure of Mexico Laura Randall, 2006 Features a comprehensive presentation of Mexico's political social and economic issues This book covers such topics as Mexico's foreign economic policy and NAFTA maquiladoras technology policy and Asian competition as well as domestic economics such as banking tax reform and oil energy policy the environment and more

**Farewell To The Peasantry?** Gerardo Otero, 2019-03-06 Farewell to the Peasantry questions class reductionist assumptions in certain Marxist and populist approaches to political movements in twentieth century rural Mexico highlighting the interpretation of the process of political class formation

Local Governments and Rural Development Krister Andersson, Gustavo Gordillo, Frank van Laerhoven, 2009 Despite the recent economic upswing in many Latin American countries rural poverty rates in the region have actually increased during the past two decades Experts blame excessively centralized public administrations for the lackluster performance of public policy initiatives In response decentralization reforms have become a common government strategy for improving public sector performance in rural areas The effect of these reforms is a topic of considerable debate among government officials policy scholars and citizens groups This book offers a systematic analysis of how local governments and farmer groups in Latin America are actually faring today Based on interviews with more than 1 200 mayors local officials and farmers in 390 municipal territories in four Latin American nations the authors analyze the ways in which different forms of decentralization affect the governance arrangements for rural development on the ground Their comparative analysis suggests that rural development outcomes are systemically linked to locally negotiated institutional arrangements formal and informal between

government officials NGOs and farmer groups that operate in the local sphere They find that local government actors contribute to public services that better assist the rural poor when local actors cooperate to develop their own institutional arrangements for participatory planning horizontal learning and the joint production of services This study brings substantive data and empirical analysis to a discussion that has until now more often depended on qualitative research in isolated cases With more than 60 percent of Latin America s rural population living in poverty the results are both timely and crucial

Household Mobility and Persistence in Guadalajara, Mexico Monica L. Hardin, 2016-12-08 1821 Guadalajara Mexico exhibited surprising mobility within its population Using data from the back to back censuses of 1821 and 1822 this study argues that mobility affected almost every individual who lived in Guadalajara during that time period The methodology used traces individuals who persisted from one year to the next to determine overall rates of mobility An analysis of short term stability and change within this set of historically identifiable individuals families and households reveals a process of mobility that not only has been neglected by studies based on aggregate data but that is often at

variance with the findings of those studies The evidence shows that a significant portion of the extensive movement of individuals to and from the wards is short term and often cyclical rather than long term and permanent Additionally data sets from 1811 1813 and 1839 1842 are used as control groups to conclude that the mobility in 1821 1822 was not a unique historical event based on circumstances but an overarching trend throughout the nineteenth century Revolution and State in Modern Mexico Adam David Morton,2013-10-04 Now in an updated edition this groundbreaking study develops a new approach to understanding the formation of the postrevolutionary state in Mexico In a shift away from dominant interpretations Adam David Morton considers the construction of the revolution and the modern Mexican state through a fresh analysis of the Mexican Revolution the era of import substitution industrialization and neoliberalism Throughout the author makes interdisciplinary links among geography political economy postcolonialism and Latin American studies in order to provide a new framework for analyzing the development of state power in Mexico He also explores key processes in the contestation of the modern state specifically through studies of the role of intellectuals democratization and democratic transition and spaces of resistance As Morton argues all these themes can only be fully understood through the lens of uneven development in Latin America Centrally the book shows how the history of modern state formation and uneven development in Mexico is best understood as a form of passive revolution referring to the ongoing class strategies that have shaped relations between state and civil society As such Morton makes an important interdisciplinary contribution to debates on state formation relevant to Mexican studies postcolonial and development studies historical sociology and international political economy by revitalizing the debate on the uneven and combined character of development in Mexico and throughout Latin America In so doing he convincingly contends that uneven development can once again become a tool for radical political economy analysis in and beyond the region A substantive new epilogue engages the main theoretical debates that have emerged since the book was first published while also exploring the dominant geographies of power and resistance that are shaping state space in Mexico in the twenty first century And now a Spanish edition *Revoluci n y Estado en M xico moderno* M xico D F Siglo XXI 2017 is available as well Click here to see the book trailer **A Return to Servitude** María Bianet Castellanos,2010 As a free trade zone and Latin America s most popular destination Canc n Mexico is more than just a tourist town It is not only actively involved in the production of transnational capital but also forms an integral part of the state s modernization plan for rural indigenous communities Indeed Maya migrants make up over a third of the city s population A Return to Servitude is an ethnography of Maya migration within Mexico that analyzes the foundational role indigenous peoples play in the development of the modern nation state Focusing on tourism in the Yucat n Peninsula M Bianet Ca *Land Institutions and Land Markets* Klaus W. Deininger,Gershon Feder,1998 *Gender and Agrarian Reforms* Susie Jacobs,2013-05-13 The redistribution of land has profound implications for women and for gender relations however gender issues have been marginalised from both theoretical and policy discussions of agrarian reform This book presents an

overview of gender and agrarian reform experiences globally Jacobs highlights case studies from Latin America Asia Africa and eastern Europe and also compares agrarian and land reforms organised along collective lines as well as along individual household lines This volume will be of interest to scholars in Geography Women s Studies and Economics      *Conversations with Tocqueville* Aurelian Craiutu, Sheldon Gellar, 2009-02-16 The questions and issues raised by Tocqueville in his monumental studies of France and America are just as crucial for understanding the evolution of democracy in the West and the development of democracy in the non western world They clearly show the breadth of Tocqueville s contributions to the development of modern social sciences Among the questions addressed by Tocqueville were How does the weight of the past affect the evolution of political institutions and political behavior What impact do differences in physical environment have on the organization of society What are the relationships between social equality freedom and democracy To what extent does centralization destroy the capacity for local initiative and self governance What conditions are needed to nurture the flourishing of self governing communities What safeguards are needed to preserve freedom and to prevent incipient democracies from becoming dictatorships Why has democracy had such a problem taking hold in many parts of the non western world How should one study democracy in non western settings Tocquevillian analytics can help us provide answers Addressed to a wider audience than Tocqueville scholars the book argues that Tocquevillian analytics can be used to understand developments in non western as well as western societies and be updated to address such issues as globalization ethnicity New World Old World comparisons and East West dynamics The first part of the book examines the basic components of Tocquevillian analytics outlining its stepwise interdisciplinary approach to understanding societies and nations The second part applies the Tocquevillian conceptual framework to the contemporary world and contains individual chapters on various regions of the world North America Russia Western Europe Asia Africa and Latin America Unlike previous collective works on Tocqueville *Conversations with Tocqueville* does not offer a survey of the authors views but instead focuses on presenting a cohesive      Weathering Risk in Rural Mexico Hallie Eakin, 2022-03-29 From floods and droughts to tsunamis and hurricanes recent years have seen a distressing and often devastating increase in extreme climatic events While it is possible to study these disasters from a purely scientific perspective a growing preponderance of evidence suggests that changes in the environment are related to both a shift in global economic relations and these weather related disasters In *Weathering Risk in Rural Mexico* Hallie Eakin draws on ethnographic data collected in three agricultural communities in rural Mexico to show how economic and climatic change not only are linked in cause and effect at the planetary scale but also interact in unpredictable and complex ways in the context of regional political and trade relationships national economic and social programs and the decision making of institutions enterprises and individuals She shows how the parallel processes of globalization and climatic change result in populations that are doubly exposed and thus particularly vulnerable Chapters trace the effects of El Ni o in central Mexico in the late 1990s alongside some of the

principal changes in the country's agricultural policy Eakin argues that in order to develop policies that effectively address rural poverty and agricultural development we need an improved understanding of how households cope simultaneously with various sources of uncertainty and adjust their livelihoods to accommodate evolving environmental political and economic realities

**Agricultural and Rural Development Policy in Latin America** Alain De Janvry, Nigel David Key, Elisabeth Sadoulet, 1997-01-01 This study analyzes the significance of new economic context in Latin America and the Caribbean for the design of policies for the agricultural sector In addition it analyzes and assesses recent trends in agricultural development policy in Latin America to identify and synthesize new policy directions and to highlight emerging challenges and avenues for policy innovation The main conclusion of the study is that Latin American agricultural and rural development policy is at a turning point that will require bold new initiatives to improve the production performance of agriculture reduce rural poverty protect the natural resource base of the sector and ensure the political sustainability of economic growth This will require a pro active set of interventions designed at restoring the specificity of sectoral agricultural policy while maintaining consistency with the macro reforms Publisher's description [Agricultural Research and Poverty Reduction](#)
