Mezhbiudzhetye Otnosheniia

Peter Reddaway, Robert W. Ortung

Mezhbiudzhetye Otnosheniia:

Post-Soviet Social Stephen J. Collier, 2011-08-08 The Soviet Union created a unique form of urban modernity developing institutions of social provisioning for hundreds of millions of people in small and medium sized industrial cities spread across a vast territory After the collapse of socialism these institutions were profoundly shaken casualties in the eyes of many observers of market oriented reforms associated with neoliberalism and the Washington Consensus In Post Soviet Social Stephen Collier examines reform in Russia beyond the Washington Consensus He turns attention from the noisy battles over stabilization and privatization during the 1990s to subsequent reforms that grapple with the mundane details of pipes wires bureaucratic routines and budgetary formulas that made up the Soviet social state Drawing on Michel Foucault's lectures from the late 1970s Post Soviet Social uses the Russian case to examine neoliberalism as a central form of political rationality in contemporary societies The book's basic finding that neoliberal reforms provide a justification for redistribution and social welfare and may work to preserve the norms and forms of social modernity lays the groundwork for a critical revision of conventional understandings of these topics

The Challenges for Russia's Politicized Economic System Susanne Oxenstierna, 2015-04-10 During the early 2000s the market liberalization reforms to the Russian economy begun in the 1990s were consolidated But since the mid 2000s economic policy has moved into a new phase characterized by more state intervention with less efficiency and more structural problems Corruption weak competitiveness heavy dependency on energy exports an unbalanced labour market and unequal regional development are trends that have arisen and which this book argues will worsen unless the government changes direction The book provides an in depth analysis of the current Russian economic system highlighting especially structural and institutional defects and areas where political considerations are causing distortions and puts forward proposals on how the present situation could be remedied

The Dynamics of Russian Politics Peter Reddaway, Robert W. Orttung, 2004 Who rules Russia This question is generated by President Vladimir Putin's most ambitious reform program to date_his attempt since 2000 to reshape the Russian federation centralize much of the power lost by the Kremlin to the eighty nine regional governors during the 1990s and strengthen his weak grip on Russia's institutions and political elite In The Dynamics of Russian Politics Russian and Western authors from the fields of political science economics ethnology law and journalism examine the reform's impact on key areas of Russian life including big business law enforcement corruption political party development health care local government small business and ethnic relations Volume I presents the historical context and an overview of the reforms then tracks how Putin's plans were implemented and resisted across each of the seven new federal okrugs or megaregions into which he divided Russia In particular the authors analyze the goals and contrasting political styles of his seven commissars and how their often concealed struggles with the more independent and determined governors played out Volume II examines the impact of these reforms on Russia's main political institutions the increasingly assertive business community and the defense police and

security ministries It also analyzes how the reforms have affected such key policy areas as local government health care political party development the battle against corruption small business ethnic relations and the ongoing Chechen war Together the two volumes simultaneously reveal that Putin s successes have been much more limited and ambiguous than is widely believed in the West while offering detailed and nuanced answers to the difficult but crucial question Who rules Russia
