Michael Powell:

Michael Powell David Lazar, 2003 This collection of interviews reveals the mind and the tactics of a master filmmaker who is woefully under known even as his films are widely celebrated throughout the world **Michael Powell** Michael Powell, 1973 Hidden in Plain Sight Nathan Abrams, 2016-08-15 Hidden in Plain Sight Jews and Jewishness in British Film Television and Popular Culture is the first collection of its kind on this subject The volume brings together a range of original essays that address different aspects of the role and presence of Jews and Jewishness in British film and television from the interwar period to the present It constructs a historical overview of the Jewish contribution to British film and television which has not always been sufficiently acknowledged Each chapter presents a case study reflective of the specific Jewish experience as well as its particularly British context with cultural representations of how Jews responded to events from the 1930s and 40s including World War II the Holocaust and a legacy of antisemitism through to the new millennium **Korda** Charles Drazin, 2011-05-30 The producer behind such celebrated films as *The Four Feathers* and *The Third Man* is one of the most colourful and important figures in the history of the British cinema This gripping biography tells how with extraordinary ambition enterprise and showmanship Alexander Korda established in Britain a film industry that rivalled Hollywood built Europe's biggest studio and created world class stars including Charles Laughton and Vivien Leigh The biography traces Korda's path from his rural childhood in a remote part of Hungary to a British knighthood Korda's legacy it argues was a film industry that dared to dream on the largest possible scale But he also exemplified the pattern of boom and bust that dogged the British cinema ever since he first came into the limelight in 1933 with the international success of *The Private Life of Henry VIII* To understand his often turbulent career is to gain a profound insight into the nature of the British cinema both then and now *English Filming, English Writing* Jefferson Hunter, 2010-04-05 Jefferson Hunter examines English films and television dramas as they relate to English culture in the 20th century He traces themes such as the influence of U S crime drama on English film and film adaptations of literary works as they appear in screen work from the 1930s to the present *A Canterbury Tale* and the documentary *Listen to Britain* are analyzed in the context of village pageants and other wartime explorations of Englishness at risk English crime dramas are set against the writings of George Orwell while a famous line from Noel Coward leads to a discussion of music and image in works like *Brief Encounter* and *Look Back in Anger* Screen adaptation is also broached in analyses of the 1985 BBC version of Dickens's *Bleak House* and Merchant Ivory's *The Remains of the Day* **The Encyclopedia of Film Composers** Thomas S. Hischak, 2015-04-16 For more than a century original music has been composed for the cinema From the early days when live music accompanied silent films to the present in which a composer can draw upon a full orchestra or a lone synthesizer to embody a composition music has been an integral element of most films By the late 1930s movie studios had established music departments and some of the greatest names in film music emerged during Hollywood's Golden Age including Alfred Newman Max Steiner Dimitri Tiomkin and Bernard

Herrmann Over the decades other creators of screen music offered additional memorable scores and some composers such as Henry Mancini Randy Newman and John Williams have become household names The Encyclopedia of Film Composers features entries on more than 250 movie composers from around the world It not only provides facts about these artists but also explains what makes each composer notable and discusses his or her music in detail Each entry includes Biographical material Important dates Career highlights Analysis of the composer's musical style Complete list of movie credits This book brings recognition to the many men and women who have written music for movies over the past one hundred years In addition to composers from the United States and Great Britain artists from dozens of other countries are also represented A rich resource of movie music history The Encyclopedia of Film Composers will be of interest to fans of cinema in general as well as those who want to learn more about the many talented individuals who have created memorable scores

Zoo-A-Logical Math Thomas Kearney, 2012-04 The work for this book began with a course I created and taught called Animal Behavior I always knew that there was a strong magnetic bond between people and animals but it wasn't until I began working on my curriculum that I truly found out how strong this bond really was Millions of people young and old will visit zoos and aquariums each year People stand in front of the animals hypnotized by the every movement of the animal People seemed to be looking not just at the animal but almost as if they were looking inside these animals wondering and questioning about the lives of some of our most distant animal relatives In my classroom I found the exact same kinds of responses The discussions and questions of my students motivated me to share with you the lives and abilities of some of the most amazing living creatures in the world People realize that humans are also animals but the belief that we have superior intelligence and problem solving abilities makes us think we are far superior to all of the rest of our Animal World As I began to learn more and lead my student discussions I soon realized that maybe our intelligence was the only thing that we really did have in our superiority over the rest of our animal relatives I began to look into the idea of comparing humans to animals in a wide variety of behaviors and activities and soon a brand new window into the REAL world of animals began to open up I soon realized that even the most insignificant animals in our world were really superstars when compared to humans By using math we are able to truly get a comparison of animals and how they relate to our own human abilities As I began to create the problems and do the math it became very evident that I began to get the responses that I had hoped for I soon began to call these responses the Wow factor A number of times the teachers that have worked on the problems would actually go back and do the problems a second time because there has to be a mistake or no way that this can be true There were no mistakes and the math did not lie The math allowed us to look at the animals in a totally different way I hope that you too will be amazed and wowed by some of these amazing animals that we share our world with Reception, Appropriation, Recollection International John Bunyan Society.
