Tribbe, 2014-06-06 During the summer of 1969 the summer Americans first walked on the moon musician and poet Patti Smith recalled strolling down the Coney Island Boardwalk to a refreshment stand where pictures of Jesus President Kennedy and the astronauts were taped to the wall behind the register Such was the zeitgeist in the year of the moon Yet this holy trinity of 1960s America would quickly fall apart Although Jesus and John F Kennedy remained iconic by the time the Apollo Program came to a premature end just three years later few Americans mourned its passing Why did support for the space program decrease so sharply by the early 1970s Rooted in profound scientific and technological leaps rational technocratic management and an ambitious view of the universe as a realm susceptible to human mastery the Apollo moon landings were the grandest manifestation of postwar American progress and seemed to prove that the United States could accomplish anything to which it committed its energies and resources To the great dismay of its many proponents however NASA found the ground shifting beneath its feet as a fierce wave of anti rationalism arose throughout American society fostering a cultural environment in which growing numbers of Americans began to contest rather than embrace the rationalist values and vision of progress that Apollo embodied Shifting the conversation of Apollo from its Cold War origins to larger trends in American culture and society and probing an eclectic mix of voices from the era including intellectuals religious leaders rock musicians politicians and a variety of everyday Americans Matthew Tribbe paints an electrifying portrait of a nation in the midst of questioning the very values that had guided it through the postwar years as it began to develop new conceptions of progress that had little to do with blasting ever more men to the moon No Requiem for the Space Age offers a narrative of the 1960s and 1970s unlike any told before with the story of Apollo as the story of America itself in a time of dramatic cultural change **Alternative Alternatives** Sona Blessing, 2011-10-14 In the aftermath of the financial crisis investors are searching for new opportunities and products to safeguard their investments for the future Riding high on the wave of new financial opportunities are Alternative Alternatives AA However there is a

dearth of information on what Alternative Alternatives are how they work and how they can be profited from The book defines what Alternative Alternatives are based on research and the following hypothesis If the source origin of the risk lies outside of the financial markets then it should be insulated from the vagaries of those markets The book identifies and examines such and other unique idiosyncratic and difficult to replicate sources of risk assets and strategies The recent credit and sovereign debt crisis have served to defend the hypothesis and have upheld the conclusion that alternative alternative assets and strategies offer a risk return profile that is distinct to those offered by traditional and main stream hedge fund strategies These strategies include timberland investing insurance risk transfer asset loan based lending aviation shipping trade entertainment litigation financing etc collectables and extraction strategies such as volatility and behaviour finance This book will be a one stop resource to the new investment class known globally as Alternative Alternatives AA and will provide a comprehensive but accessible introduction to these assets It provides an in depth analysis of the assets and strategies which will leave investors with everything they need to identify and allocate to the best AA for them It reviews the asset on a standalone basis providing an explanation of the product its characteristics a SWOT analysis and details its risk reward drivers The book also looks at how to integrate the asset within a portfolio its peculiarities the challenges and the constraints of each Next the book shows how Alternative Alternatives are used in the real world how they are implemented and the results that they have achieved Finally the book looks at the scope scalability and prospects for each asset in the future

Ancient DNA Elizabeth D. Jones, 2022-01-01 The untold story of the rise of the new scientific field of ancient DNA research and how Jurassic Park and

popular media influenced its development. Fun and thought provoking, Jones builds a wry, often wise study of science as a very human endeavor. She makes a powerful case that ancient DNA research feeds off media attention as much as the media feeds off it. Victoria L. Herridge, *Nature*. Ancient DNA research: the recovery of genetic material from long dead organisms is a discipline that developed from science fiction into a reality between the 1980s and today. Drawing on scientific, historical, and archival material as well as original interviews with more than fifty researchers worldwide, Elizabeth Jones explores the field's formation and explains its relationship with the media by examining its close connection to de-extinction, the science and technology of resurrecting extinct species. She reveals how the search for DNA from fossils flourished under the influence of intense press and public interest, particularly as this new line of research coincided with the book and movie *Jurassic Park*. *Ancient DNA* is the first account to trace the historical and sociological interplay between science and celebrity in the rise of this new research field. In the process, Jones argues that ancient DNA research is more than a public-facing science; it is a celebrity science.

Science on Screen and Paper Mariana Ivanova, Juliane Scholz, 2024-08-01. During the Cold War, scientific discoveries were adapted and critiqued in many different forms of media across a divided Europe. Now, more than 30 years since the end of the Cold War, *Science on Screen and Paper* explores the intersections between scientific research and media by drawing from media history, film studies, and the history of science. From public relations material to educational and science films, from children's magazines to television broadcasts, the contributions in this collected volume seek to embrace medial differences and focus on intersectional themes and strategies for the representation of science.
