Thinking Through Twentieth-Century Architecture Nicholas Ray,2023-02-08 Shortlisted for the Architectural Book Awards 2024 *Thinking Through Twentieth Century Architecture* connects the practice of architecture with its recent history and its theoretical origins those philosophical ideas that lay behind modernism and its aftermath By analyzing in straightforward and jargon free language the genesis of modernism and the complex reactions to it the book clarifies a continuing debate It has been specifically written to connect issues of theory history and contemporary practice and to allow students to make these connections easily This is a history of twentieth century architecture written with close critical attention to the theories that lie behind the works described Importantly unlike other historical accounts it does not take sides and urge the reader to identify with one strand of thinking or style of architecture at the expense of others but it presents a dispassionate view with persuasive arguments on behalf of different positions It pursues the history of European and American architecture chronologically but the history is interwoven with the philosophical ideas that informed both writers and architects and are essential for its understanding The book is relevant to current issues of contemporary practice and education showing that philosophical issues are fundamental and those relating to design decisions never go away It includes 200 illustrations and will appeal to all those interested in twentieth century architecture and to architectural students **Avery Index to Architectural Periodicals** Avery Library,1995 **Michael Graves** ,1979 Michael Graves Michael Graves,1999 **Bibliographic Guide to Art and Architecture** New York Public Library. Greece Turkey Spain England Germany and France studying and recording the masterworks of both ancient and modern architecture Michael Graves Images of A Grand Tour collects for the first time the stunning artwork produced during this trip Delicate pencil sketches striking ink washes and colorful photographs show the deep connection Graves had to the places he visited from the Roman Forum to the Grecian Acropolis to Wiltshires Stonehenge They also tell something of the education of an architect bringing to light the classical buildings that caused Graves to reexamine his early devotion to modernism A foreword by Graves reflects on these travels from the distance of forty years while author Brian Ambroziak puts the tour into the context of Graves s life and work
