

A Model Student

The purpose of education is to produce ideal persons to face the responsibilities of the future. This aim can be achieved only when the students are sincere and they acquire education in the real sense. Just copying a few questions and passing the examination is not an education. A student can never be educated until and unless he does not put his heart and should to the cause of education. A student is a person, who devotes himself to the pursuits of knowledge and learning. It is, therefore, the first and foremost duty of an ideal student to seek knowledge.

What should do to be an ideal student?

The pursuit of knowledge demands hard work and full devotion. Unfortunately, students do not realize their duties. They have confined education. Their greatest purpose is to get a good grade in the examination by hook or by crook. They adopt all the foul means to get through the examinations. The ideal student enriches himself with knowledge. In practical life, only those students come out with the best colours, who had to acquire knowledge. An ideal student enjoys learning. He goes deep and deep in search of knowledge.

He is not a bookworm. He knows that a healthy body is necessary for a healthy mind. He takes interest in all the activities that promote his physical health. He goes to the playground with the same pleasure and enthusiasm with which he studies in the library. An ideal student is not unsocial. He loves his fellow students and takes part in all the collective activities. The ideal student respects and honours his teachers. He knows the place of teachers, who are opening the gate of glories for him. He is humble and obedient.

The more he learns from his teachers, the more grateful he is to them. The more knowledge he gets, the more humble he becomes. An ideal student is not a frog in a well but a person with greater visions and ideals. He is regular and punctual. He does not participate in adverse and negative activities. He confines himself to his studies and task. He does not waste his time in useless deeds. He does not keep an association with such elements whose purpose is to damage the cause of education. He believes in simple and plain living. He is kind and generous.

The responsibility of a student school is very important. If something, where to happen to him/her the person's life at school, could be majorly affected. There is a way through to help: the person can work at getting good grades, studying hard, and facing the consequences of his action. Some people say that their responsibility at school isn't to be worried about, but it is, and here are few ways to help. First, is getting good grades. If students don't have good grades, or the responsibility to get them, they can be in a lot of trouble.

Grigorenko,2012 This book captures the diversity and richness of writing as it relates to different forms of abilities skills competencies and expertise Psychologists educators researchers and practitioners in neighboring areas are interested in exploring how writing develops and in what manner this development can be fostered but they lack a handy unified and comprehensive source of information to satisfy their interest The goal of this book is to fill this void by reflecting on the phenomenon of writing from a developmental perspective It contains an integrated set of chapters devoted to issues of writing how writing develops how it is and should be taught and how writing paths of development differ across writing genres Specifically the book addresses typologies of writing pathways of the development of writing skills stages of the development of writing individual differences in the acquisition of writing skills writing ability and disability teaching writing and the development and demonstration of expertise in writing **In the Best Interest of Students** Kelly Gallagher,2015 What is in the best interest of our students Is it teaching to the newest standards movement like the Common Core Teaching that prepares students to take a test Or is it something more meaningful and authentic In his new book In the Best Interest of Students Kelly Gallagher notes that there are real strengths

in the Common Core standards and there are significant weaknesses as well He takes the long view reminding us that standards come and go but what remains constant is the need to stay true to what we know works in the teaching of reading writing speaking and listening Instead of blindly adhering to the latest standards movement Kelly advocates Dialing up the amount of reading and writing students are doing Balancing rigorous high quality literature and non fiction with high interest student selected titles Giving students much more choice when it comes to reading and writing activities Encouraging readers to deepen their comprehension by moving beyond the four corners of the text Using modeling to enrich students writing skills in the prewriting drafting and revision stages Helping young writers to achieve more authenticity through the blending of genres Resisting the de emphasis of narrative and imaginative reading and writing Providing students with more opportunities to sharpen their listening and speaking skills Planning lessons that move beyond Common Core expectations In this provocative and insightful new book Kelly surveys the teaching landscape since the publication of his highly regarded book *Readicide* and finds that although some progress has been made more needs to be done Amid the frenzy of trying to teach to a new set of standards Kelly Gallagher is a strong voice of reason reminding us that instruction should be anchored around one guiding question What is in the best interest of our students
