

The background of the book cover is a detailed illustration in a medieval manuscript style. It depicts a busy workshop or market scene. In the foreground, a man in a blue tunic and a woman in a red dress are engaged in a transaction. The man is holding a small object, possibly a coin or a piece of goods, while the woman looks on. In the background, other figures are visible, including a man in a red tunic and a woman in a blue dress. There are also various objects and structures, such as a large wooden barrel, a small table, and a building with a thatched roof. The overall color palette is muted, with earthy tones and some brighter colors for the clothing.

Modelling the Middle Ages John Hatcher (historicus.),2002 Modelling the Middle Ages John Hatcher,Mark Bailey,2001 This book surveys the most influential theoretical approaches adopted for the study of medieval economy and society It offers an accessible introduction to medieval economic history an up to date critique of established models and a succinct treatise on historiographical method **Modelling the Middle Ages** John Hatcher,2001 This text surveys the most influential theoretical approaches adopted for the study of medieval economy and society It offers an accessible introduction to medieval economic history an up to date critique of established models and a succinct treatise on historiographical method

Modelling the Middle Ages John Hatcher,Mark Bailey,2001-05-03 Most of what has been written on the economy of the middle ages is deeply influenced by abstract concepts and theories The most powerful and popular of these guiding beliefs are derived from intellectual foundations laid down in the eighteenth and nineteenth centuries by Adam Smith Johan von Th nen Thomas Malthus David Ricardo and Karl Marx In the hands of twentieth century historians and social scientists these venerable ideas have been moulded into three grand explanatory ideas which continue to dominate interpretations of economic development These trumpet in turn the claims of commercialization population and resources or class power and property relations as the prime movers of historical change In this highly original book John Hatcher and Mark Bailey examine the structure and test the validity of these conflicting models from a variety of perspectives In the course of their investigations they provide not only detailed reconstructions of the economic history of England in the middle ages and sustained critical commentaries on the work of leading historians but also discussions of the philosophy and methods of history and the social sciences The result is a short and readily intelligible introduction to medieval economic history an up to date critique of established models and a succinct treatise on historiographical method **Introduction to Medieval Europe 300-1500** Wim Blockmans,Peter Hoppenbrouwers,2017-11-03 Introduction to Medieval Europe 300 1500 provides a comprehensive survey of this complex and varied formative period of European history covering themes as diverse as barbarian migrations the impact of Christianisation the formation of nations and states the emergence of an expansionist commercial economy the growth of cities the Crusades the effects of plague and the intellectual and cultural life of the Middle Ages The book explores the driving forces behind the formation of medieval society and the directions in which it developed and changed In doing this the authors cover a wide geographic expanse including Western interactions with the Byzantine Empire and the Islamic World This third edition contains a wealth of new features that help to bring this fascinating era to life including In the book A number of new maps and images to further understanding of the period Clear signposting and extended discussions of key topics such as feudalism and gender Expanded geographic coverage into Eastern Europe and the Middle East On the companion website An updated comparative and interactive timeline highlighting surprising synchronicities in medieval history and annotated links to useful websites A list of movies television series and

novels related to the Middle Ages accompanied by introductions and commentaries Assignable discussion questions and the maps plates figures and tables from the book available to download and use in the classroom Clear and stimulating the third edition of Introduction to Medieval Europe is the ideal companion to studying Europe in the Middle Ages at undergraduate level

Peasants and historians Phillipp Schofield,2016-09-01 Peasants and historians is an examination of historical discussion of the medieval English peasantry In this book the first such study of its kind the author traces the development of historical research aimed at exploring the nature of peasant society In separate chapters the author examines the three main defining themes which have been applied to the medieval economy in general including change affecting the medieval peasantry In subsequent chapters debates in relation to demography family structure women in rural society and the nature of village community are each considered in turn A final chapter on peasant culture also suggests areas of development and potentially at least future directions in research and writing Offering an informed grounding in the main areas of historical writing in this area it will be of interest to researchers as well as to those coming new to the topic including undergraduate and postgraduate students

Conflict and Compromise in the Late Medieval Countryside Peter L. Larson,2012-12-06 Larson examines the changing relations between lords and peasants in post Black Death Durham This was a time period of upheaval and change part of the transition from medieval to modern Many historians have argued about the nature of this change and its causes often putting forth a single all encompassing model Larson presses for the importance of individual choice and action resulting in a flexible human framework that provides a more appropriate explanation for the many paths followed in this period The theoretical side is balanced by an on the ground examination of rural life in Durham an attempt to capture the raw emotions and decisions of the period No one has really examined this most studies are speculative relying on theory or statistics rather than tracing the history of real people both in the immediate aftermath of the plague and in the longer term Durham is fortunate in that records survive in abundance for this period most other studies of rural society end at 1300 or 1348 As such this book fills a major gap in medieval English history while at the same time grappling with major theories of change for this transformative period

Accounting at Durham Cathedral Priory Alisdair Dobie,2016-04-29 This study utilizes the rich archives which survive at Durham Cathedral to examine the way in which accounting methods and systems were adopted and adapted to manage income and expenses assets and liabilities in changing economic environments

The Origin of Capitalism in England, 1400-1600 Spencer Dimmock,2014-06-05 Incorporating original archival research and a series of critiques of recent accounts of economic development in pre modern England in The Origin of Capitalism in England 1400 1600 Spencer Dimmock has produced a challenging and multi layered account of a historical rupture in English feudal society which led to the first sustained transition to agrarian capitalism and consequent industrial revolution Genuinely integrating political social and economic themes Spencer Dimmock views capitalism broadly as a form of society rather than narrowly as an economic system He firmly locates its beginnings with conflicting social agencies in a closely

defined historical context rather than with evolutionary and transhistorical commercial developments and will thus stimulate a thorough reappraisal of current orthodoxies on the transition to capitalism

Mortality, Trade, Money and Credit in Late Medieval England (1285-1531) Pamela Nightingale, 2020-07-21 The eleven articles in this volume examine controversial subjects of central importance to medieval economic historians Topics include the relative roles played by money and credit in financing the economy whether credit could compensate for shortages of coin and whether it could counteract the devastating mortality of the Black Death Drawing on a detailed analysis of the Statute Merchant and Staple records the articles chart the chronological and geographical changes in the economy from the late thirteenth to the early sixteenth centuries This period started with the triumph of English merchants over alien exporters in the early 1300s and concluded in the early 1500s with cloth exports overtaking wool in value The articles assess how these changes came about as well as the degree to which both political and economic forces altered the pattern of regional wealth and enterprise in ways which saw the northern towns decline and London rise to be the undisputed financial as well as the political capital of England

A Companion to Medieval Poetry Corinne Saunders, 2010-02-12 A Companion to Medieval Poetry presents a series of original essays from leading literary scholars that explore English poetry from the Anglo Saxon period up to the 15th century Organised into three parts to echo the chronological and stylistic divisions between the Anglo Saxon Middle English and Post Chaucerian periods each section is introduced with contextual essays providing a valuable introduction to the society and culture of the time Combines a general discussion of genres of medieval poetry with specific consideration of texts and authors including Beowulf Sir Gawain and the Green Knight Chaucer Gower and Langland Features original essays by eminent scholars including Andy Orchard Carl Schmidt Douglas Gray and Barry Windeatt who present a range of theoretical historical and cultural approaches to reading medieval poetry as well as offering close analysis of individual texts and traditions

World of the Small Farmer Patricia Croot, 2017-06-01 This detailed and original study of early modern agrarian society in the Somerset Levels examines the small landholders in a group of sixteen contiguous parishes in the area known as Brent Marsh These were farmers with lifehold tenures and a mixed agricultural production whose activities and outlook are shown to be very different from that of the small peasant farmers of so many general histories Patricia Croot challenges the idea that small farmers failed to contribute to the productivity and commercialization of the early modern economy While the emergence of large capitalist farms was an important development these added to the production of existing small cultivators rather than replacing them The idea that only large scale specialized farmers were involved in agricultural progress or that their contribution alone was enough to account for the great increase in food production by the late 17th century is questioned small farmers continued to make a living contributed to the market and survived alongside the new bigger farms Croot's in depth study not only adds to our knowledge of agrarian society generally but shows that far from being backward and interested primarily in subsistence farming small producers in this area sought profit in making the

best use of their resources however limited being flexible in their production and growing new or unusual crops The main land tenures copy and lease for lives are also covered in detail contributing to current debates on landholding and sub tenancy The author shows the uses to which lifehold tenures could be put resulting in the increasing financial strength of copyholders and their dominance in local society The effects of the tenure and profits of farming can be seen in the way that families were provided for as well as in the roles that women played and the responsibility they had in economic and social life while the wider interests of the inhabitants are shown in their religious and political engagement in events of the 17th century Patricia Croot s meticulous study is a valuable contribution to English agrarian history and in particular to the history of this under researched region

Medieval Statistics Mark Casson,John S. Lee,2024-12-26 This book is the first to systematically examine the sources of medieval statistics It will be useful as a handbook for researchers in financial and cultural history as a history of financial record keeping and as a review of recent research into medieval finance and accounting based on statistical sources Medieval statistics provide a unique window on the past Medieval documents produced by royal governments monastic and ecclesiastical institutions urban boroughs and legal cases for debt recovery provide a mine of useful information on economic life and financial affairs They show that medieval administration was far more numerate and far more sophisticated than is usually recognized This book provides a comprehensive review of the key sources written by leading experts in the field The strengths and weaknesses of each source are reviewed using original documents for illustration and discussing examples from the recent literature The book is mainly concerned with English statistics as they have survived particularly well in both state and private records but which showcase the potential of digital technology in enabling systematic study of medieval primary sources where large databases can now be compiled from original manuscripts This edited volume will be a valuable tool for those working in financial cultural and political history as it seeks to analyse the various ways in which medieval life was documented numerically and the ways in which this information was used within existing power structures The Routledge Handbook of Medieval Rural Life Miriam Müller,2021-10-26 The Routledge Handbook of Medieval Rural Life brings together the latest research on peasantry in medieval Europe The aim is to place peasants as small scale agricultural producers firmly at the centre of this volume as people with agency immense skill and resilience to shape their environments cultures and societies This volume examines the changes and evolutions within village societies across the medieval period over a broad chronology and across a wide geography Rural structures families and hierarchies are examined alongside tool

use and trade as well as the impact of external factors such as famine and the Black Death The contributions offer insights into multidisciplinary research incorporating archaeological as well as landscape studies alongside traditional historical documentary approaches across widely differing local and regional contexts across medieval Europe This book will be an essential reference for scholars and students of medieval history as well those interested in rural cultural and social history
