Modelling Interestfree Economy A Study In Macroeconomics And Development:

Modelling Interest-free Economy Muhammad Anwar, 1987 General equilibrium macroeconomic models are considered essential for evaluating the impact of monetary and fiscal policies in an economy. This aspect has not received until now significant attention. This present work by Dr Muhammad Anwar develops general equilibrium models of income determination suitable for interest free economies. It can be used to understand several implications of making a transition from the conventional financial system to an interest free financial system. There are numerous Muslim countries seeking to adopt the new interest free system. These countries may find it useful to utilize the insights gained from such study to facilitate the establishment of an Islamic interest free financial system. The economic model offered in this book also shows clearly and scientifically that if the interest based financial system is replaced by the interestfree financial system then the real rates of return for savers and investors in the economy will be preserved during inflationary and deflationary periods. On the other hand financial repression results when savers are badly hurt during inflationary periods in an interest bearing economy. This study demonstrates that the inflation ridden developing countries would be definitely better off if they adopt the interest free financial system in place of the prevalent interest bearing system. This pioneering work is a new addition to the library of Islamic Economics and an important aid to economic planners and students of Islamic Economics. **Modeling**

Interest-free Economy Muhammad Anwar, 1992 **Handbook of Analytical Studies in Islamic Finance and Economics** Zamir Iqbal, Tarik Akin, Nabil El Maghrebi, Abbas Mirakhor, 2020-08-10 This handbook offers a unique and original collection of analytical studies in Islamic economics and finance and constitutes a humble addition to the literature on new economic thinking and global finance. The growing risks stemming from higher debt, slower growth and limited room for policy maneuver raise concerns about the ability and propensity of modern economies to find effective solutions to chronic problems. It is important to understand the structural roots of inherent imbalance, persistence in error patterns, policy and governance failures as well as moral and ethical failures. Admittedly finance and economics have their own failures with abstract theory bearing little relation with the real economy, uncertainties and vicissitudes of economic life. Economic research has certainly become more empirical despite or perhaps because of the lack of guidance from theory. The analytics of Islamic economics and finance may not differ from standard frameworks, methods and techniques used in conventional economics but may offer new perspectives on the making of financial crises, nature of credit cycles, roots of financial system instability and determinants of income disparities. The focus is placed on the logical coherence of Islamic economics and finance, properties of Islamic capital markets, workings of Islamic banking, pricing of Islamic financial instruments and limits of debt financing, fiscal stimulus and conventional monetary policies inter alia. Readers with investment regulatory and academic interests will find the body of analytical evidence to span many areas of economic inquiry, refuting thereby the false argument that given its religious tenets Islamic economics is intrinsically narrative, descriptive and not amenable to testable

implications Thus the handbook may contribute toward a redefinition of a dismal science in search for an elusive balance between rationality ethics and morality and toward a remodeling of economies based on risk sharing and prosperity for all humanity *American Journal of Islamic Social Sciences 7:1* Anwar Ibrahim,Taha J. al-Alwani,Mna Abul-Fadl,Mohammud Hashim Kamali,Kathleen Moore, The American Journal of Islamic Social Sciences AJISS established in 1984 is a quarterly double blind peer reviewed and interdisciplinary journal published by the International Institute of Islamic Thought IIIT and distributed worldwide The journal showcases a wide variety of scholarly research on all facets of Islam and the Muslim world including subjects such as anthropology history philosophy and metaphysics politics psychology religious law and traditional Islam

Islamic Monetary Economics and Institutions Muhamed Zulkhibri,Turkhan Ali Abdul Manap,Aishath Muneeza,2019-10-01 This edited volume explores theoretical and empirical issues related to monetary economics and policy in the Islamic financial system Derived from the Conference on Islamic Monetary Economics and Institutions Theory and Practice 2017 held in Mal Maldives the enclosed papers highlights several option for authorities and regulatory bodies regarding monetary policy and regulation as well as discussing how Islamic monetary policy effects growth financial stability and resilience to shocks in practice The inter linkage between Islamic monetary policy and other markets are also explored The subject of Islamic economics has gained considerable attention in the last four decades with the emergence of Islamic financial institutions around the world This phenomenon has motivated economists to develop a comprehensive theoretical framework of modern monetary economics for Islamic economic system An important characteristic of the Islamic economic system is the abolition of interest from the financial system Islamic monetary economics is distinguished from conventional monetary economics due to the absence of interest Therefore under the Islamic economic system monetary policy has to depend on other tools In the early theoretical literature on Islamic monetary economics many have discussed the role of money in Islamic economics system while the number of empirical studies on Islamic monetary economics is a relatively new phenomenon According to Islamic scholars there are three main goals of Islamic monetary policy a economic well being with full employment and optimum rate of economic growth b socioeconomic justice and equitable distribution of income and wealth and c stability in the value of money Hence the Islamic monetary policy has several socioeconomic and ethical implications Featuring regional case studies this book serves as a valuable resource for academics scholars practitioners and policy makers in the areas of Islamic economics and finance

The Islamic Quarterly, 1994 Islamic Economics Taha Eğri, Necmettin Kizilkaya, 2015-06-18 Studies conducted in the field of Islamic economics lose their relevance over time Works examining Islamic economics since the 1970s have been co

opted by the existing economic system and have become limited to a large extent as they are now only concerned with financial transactions. In fact, Islamic economics as a concept should actually be conceptualized as an alternative economic system. However, because of the financial and commercial transactions implemented in daily economic life, An Islamic Model for Stabilization and Growth Adama Dieye, 2020-07-16. This book argues that the macroeconomic policy adjustment models recommended by the IMF and the World Bank for implementation in many Muslim countries with substantial donor financial support have not been effective. Economic indicators show low economic growth, persistent fiscal and external deficits, and limited industrialization. Also, these countries are experiencing increases in unemployment, poverty, and substantial growth in income and wealth inequalities. These facts underline an urgent need to produce an alternative to the failed conventional macroeconomic model in order to address the challenge of macroeconomic and social adjustment policies. The project posits and investigates the idea that the Islamic economic model prescribed in the Quran and applied by the Prophet sawa could be the ideal model for Muslim as well as non-Muslim countries.
