**Exploring Intersemiotic Translation Models** Haoxuan Zhang, 2023-06-29 This volume sets out a new paradigm in intersemiotic translation research drawing on the films of Ang Lee to problematize the notion of films as the simple binary of transmission between the verbal and non verbal The book surveys existing research as a jumping off point from which to consider the role of audiovisual dimensions going beyond the focus on the verbal as understood in Jakobsonian intersemiotic translation The volume outlines a methodology comprising a system of various models which draw on both translation studies and film studies frameworks with each model illustrated with examples from Ang Lee's *Crouching Tiger Hidden Dragon* *Lust Caution* and *Life of Pi* In situating the discussion within the work of a director whose own work straddles East and West and remediates between cultures and semiotic systems Zhang argues for an understanding of intersemiotic translation in which films are not simply determined by verbal source material but through the process of intersemiotic translators mediating non verbal quality determining materials into the final film The volume looks ahead to implications for translation and film research more broadly as well as other audiovisual media This book will appeal to scholars interested in translation studies film studies media studies and cultural studies in general

**The Morph-Image** Steen Ledet Christiansen, 2024-09-12 In *The Morph Image* *The Subjunctive Synthesis of Time* Steen Ledet Christiansen argues for a new model of digital cinema that draws on Deleuzian and Whiteheadian insights into time and the future This model insists that the philosophy of time must be rethought to provide a better understanding of the future and that the digital capacities of post cinema present occasions of thought well suited to this task The figure of the morph Christiansen posits allows a conception of how post cinema expresses time as a means of capture that appears liberatory but modulates subjectivities into temporal forms of control These temporal forms include digital animacies flows loops synthetic long takes and disjunctive editing all of which are false formations of freedom Ultimately the author positions the unruly creativity of an event's potential of making the impossible possible in order to bring about true advancements into novelty as escape from this dynamic This book contributes to both Deleuzian film theory and a burgeoning Whiteheadian film philosophy through deep engagement with key post cinematic films including *Holy Motors* *Collateral* *Domino* *Limitless* *Spring Breakers* and *Everything Everywhere All at Once* In doing so important concepts of potentiality actuality and the future are considered and addressed in relation to the contemporary capitalist regime of control

**This Year's Model** Elizabeth Wissinger, 2015-09-18 Over the last four decades the fashion modeling industry has become a lightning rod for debates about Western beauty ideals the sexual objectification of women and consumer desire Yet fashion models still captivate embodying all that is cool glam hip and desirable They are a fixture in tabloids magazines fashion blogs and television Why exactly are models so appealing And how do these women succeed in so soundly holding our attention In This Year's Model Elizabeth Wissinger weaves together in depth interviews and research at model castings photo shoots and runway shows to offer a glimpse into the life of the

model throughout the 20th and 21st centuries Once an ad hoc occupation the model life now involves a great deal of physical and virtual management of the body or what Wissinger terms glamour labor Wissinger argues that glamour labor the specialized modeling work of self styling crafting a look and building an image has been amplified by the rise of digital media as new technologies make tinkering with the body's form and image easy Models can now present self fashioning self surveillance and self branding as essential behaviors for anyone who is truly in the know and in fashion Countless regular people make it their mission to achieve this ideal not realizing that technology is key to creating the unattainable standard of beauty the model upholds and as Wissinger argues this has been the case for decades before Photoshop even existed Both a vividly illustrated historical survey and an incisive critique of fashion media This Year's Model demonstrates the lasting cultural influence of this unique form of embodied labor [Computerworld](#) ,1988-02-08 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld's award winning Web site Computerworld.com twice monthly publication focused conference series and custom research form the hub of the world's largest global IT media network
