**International Relations and the Problem of Time** Andrew R. Hom, 2020-05-26 What is time and how does it influence our knowledge of international politics For decades International Relations IR paid little explicit attention to time Recently this began to change as a range of scholars took an interest in the temporal dimensions of politics Yet IR still has not fully addressed the issue of why time matters in international politics nor has it reflected on its own use of time how temporal ideas affect the way we work to understand political phenomena Moreover IR remains beholden to two seemingly contradictory visions of time the time of the clock and a longstanding tradition treating time as a problem to be solved International Relations and the Problem of Time develops a unique response to these interconnected puzzles It reconstructs IR's temporal imagination by developing an argument that all times from natural rhythms to individual temporal experience spring from social and practical timing activities or efforts to establish meaningful and useful relationships in complex and dynamic settings In IR's case across a surprisingly wide range of approaches scholars employ narrative timing techniques to make sense of confounding processes and events This innovative account of time provides a more systematic and rigorous explanation for time in international politics It also develops provocative insights about IR's own history its key methodological commitments supposedly timeless statistical methods historical institutions and the critical vanguard of time studies This book invites us to reimagine time and in so doing to significantly rethink the way we approach the analysis of international politics

### **The Will of Change**

Eva-Maria Maggi, 2015-10-13 In this book Eva Maria Maggi argues that the European Union EU had an impact on institutional reform processes in North Africa in cases where major domestic actors agreed She analyzes how political actors in Morocco used EU neighborhood policies to shape economic and environmental policy between 1995 and 2008 Maggi argues that it was not the design of the EU s neighborhood policies but rather the will of change of domestic actors in Morocco that determined the pace direction of reform and the extent to which the EU continues to play a role in them While Moroccan politics were indeed europeanized Maggi highlights the role of domestic actors who so effectively managed to put forth their own policy priorities and essentially moroccanized the ENP

### **The Politics of Environmental Performance**

Detlef Jahn, 2016-10-27 Machine generated contents note 1 Introduction Part I Approach Method and Concepts 2 Explaining environmental performance 3 Preferences in environmental politics 4

The institutional settings in 21 OECD countries Part II Environmental Performance in 21 OECD Countries 5 Measuring environmental performance 6 Aggregating environmental performance data Part III Analysis 7 Domestic politics 8 International politics 9 The nexus of domestic and international politics 10 Conclusion      *Symbolic Power in the World Trade Organization* Matthew Eagleton-Pierce, 2013 Questions of power are central to understanding global trade politics and no account of the World Trade Organization WTO can afford to avoid at least an acknowledgment of the concept A closer examination of power can help us to explain why the structures and rules of international commerce take their existing forms how the actions of countries are either enabled or disabled and what distributional outcomes are achieved However within conventional accounts there has been a tendency to either view power according to a single reading namely the direct coercive sense or to overlook the concept entirely focusing instead on liberal cooperation and legalization In this book Matthew Eagleton Pierce shows that each of these approaches betray certain limitations which in turn have cut short or worked against more critical appraisals of power in transnational capitalism To expand the intellectual space the book investigates the complex relationship between power and legitimation by drawing upon Pierre Bourdieu's notion of symbolic power A focus on symbolic power aims to alert scholars to how the construction of certain knowledge claims are fundamental to and entwined within the material struggle for international trade Empirically the argument uncovers and plots the recent strategies adopted by Southern countries in their pursuit of a more equitable trading order By bringing together insights from political economy sociology and law *Symbolic Power in the WTO* not only enlivens and enriches the study of diplomatic practice within a major multilateral institution it also advances the broader understanding of power in world politics

agreement The multi country analysis reveals the roles played by key actors namely China Japan South Korea Indonesia Malaysia and Thailand in shaping the agreement terms The book goes on to argue that preventing a stalemate or succeeding in concluding arrangements like the CMIM is a product of various strategies and tactics employed by negotiators These include employing bargaining strategies and tactics that help avoid a negotiation deadlock and assessing the conditions under which such strategies and tactics are likely or unlikely to achieve the objective of avoiding bargaining failure As a study of East Asian economic negotiation processes this book will be of huge interest to students and scholars of East Asian cooperation and regionalism as well as finance international business international relations and international political economy

**The Philosophy of Causality in Economics** Mariusz Maziarz,2020-05-13 Approximately one in six top economic research papers draws an explicitly causal conclusion But what do economists mean when they conclude that A causes B Does cause say that we can influence B by intervening on A or is it only a label for the correlation of variables Do quantitative analyses of observational data followed by such causal inferences constitute sufficient grounds for guiding economic policymaking The Philosophy of Causality in Economics addresses these questions by analyzing the meaning of causal claims made by economists and the philosophical presuppositions underlying the research methods used The book considers five key causal approaches the regularity approach probabilistic theories counterfactual theories mechanisms and interventions and manipulability Each chapter opens with a summary of literature on the relevant approach and discusses its reception among economists The text details case studies and goes on to examine papers which have adopted the approach in order to highlight the methods of causal inference used in contemporary economics It analyzes the meaning of the causal claim put forward and finally reconstructs the philosophical presuppositions accepted implicitly by economists The strengths and limitations of each method of causal inference are also considered in the context of using the results as evidence for policymaking This book is essential reading to those interested in literature on the philosophy of economics as well as the philosophy of causality and economic methodology in general

**Reframing the Social** Poe Yu-ze Wan,2011 Poe Yu ze Wan

argues for a critical realist and systemist social ontology designed to shed light on current debates in social theory concerning the relationship of social ontology to practical social research and the nature of the social. It explores the works of the systems theorist Mario Bunge in comparison with the approach of Niklas Luhmann and critical social systems theorists to challenge the commonly held view that the systems based approach is holistic in nature and necessarily downplays the role of human agency.

*Political Science Research in Practice* Akan Malici, Elizabeth Sue Smith, 2013. Nothing rings truer to those teaching political science research methods than students' hate taking this course. Tackle the challenge and turn the standard research methods teaching model on its head with *Political Science Research in Practice*. Akan Malici and Elizabeth Smith engage students first with pressing political questions and then demonstrate how a researcher has gone about answering them walking through real political science research that contributors have conducted. Through the exemplary use of survey research, experiments, field research, case studies, content analysis, interviews, document analysis, statistical research, and formal modeling, each chapter introduces students to a method of empirical inquiry through a specific topic that will spark their interest and curiosity. Each chapter shows the process of developing a research question, how and why a particular method was used, and the rewards and challenges discovered along the way. Students can better appreciate why we need a science of politics, why methods matter, with these first-hand, issue-based discussions. The following features make this an ideal teaching tool: An introductory chapter that succinctly introduces key terms in research methodology. Key terms bolded throughout and defined in a glossary. Broad coverage of the most important methods used in political science research and the major subfields of the discipline. A companion website designed to foster online active learning. An instructor's manual and testbank to help incorporate this innovative text into your syllabus and assessment.
