19 subject areas published between 1985 and 1999. Intended as a reference and collection development tool, this bibliography provides a guide for women's studies information for each title along with a detailed, often evaluative review. The annotations summarize each work's content, its importance or contribution to women's studies, and its relationship to other titles on the subject. Most reviews cite and describe similar and contrasting titles, substantially extending the coverage. Core titles and titles that are out of print are noted, and reviews indicate which titles are appropriate as texts or supplemental texts. Taking up where the previous volume by Loeb Searing and Stineman left off, this is the definitive guide to the literature of women's studies. It is a must purchase for academic libraries that support women's studies programs and a welcome addition to any academic or public library that endeavors to represent the field.

Early Psychological Research Contributions from Women of Color, Volume 1 Jon Grahe, Michelle Ceynar, Rihana S. Mason, 2023-03-10. Early Psychological Research Contributions from Women of Color, Volume I collects the dissertations of 20 cultural pioneers, women of color who were among the first to earn their doctorate degrees in psychology. Collectively, these chapters offer an important resource to diversify the history of psychology. This book is structured so that each chapter provides a biographical sketch of the woman, a summary of the dissertation, a reproducibility critique, a discussion about a modern alternative theory or methodological approach associated with the work, feminist theory, ethnopsychology, liberation psychology, etc., and examples of how the dissertation can be used as instructional content in psychology and related disciplines. Offers suggestions for classroom use. The dissertations were completed as early as 1912 and as late as 1979, with the range reflecting differences in when women of certain groups could access education. The topics also range broadly across the breadth of the field of psychology, including physiological, cognitive, developmental, social, clinical, and more topics. The diversity of the work collected here will allow this book to be used to augment coursework, either as a complete collection or as individual chapters. Instructors and students in undergraduate and graduate Research Methods courses will find this a crucial text in maintaining a true and inclusive historical perspective of psychological research. Additionally, due to the inclusion of research spanning the breadth of Psychology, this edited volume will appeal to scholars both across the discipline and in related fields such as Women's Studies, Cognitive Science, Education, and Cultural Studies.

What the Children Told Us Tim Spofford, 2022-08-09. Does racial discrimination harm Black children's sense of self? The Doll Test illuminated its devastating toll. Dr. Kenneth Clark visited rundown and under-resourced segregated schools across America, presenting Black children with two dolls: a white one with hair painted yellow and a brown one with hair painted black. "Give me the doll you like to play with," he said. "Give me the doll that is a nice doll." The psychological experiment Kenneth developed with his wife Mamie designed to measure how segregation affected Black children's perception of themselves and other Black people was enlightening and horrifying. Over and over again, the young children, some not yet five years old, selected the white doll as preferable and the brown doll as bad. Some children even denied their race. Yes, said brown-skinned Joan W, age six, when questioned about her affection for the light-skinned doll. I

would like to be white What the Children Told Us is the story of the towering intellectual and emotional partnership between two Black scholars who highlighted the psychological effects of racial segregation The Clarks story is one of courage love and an unflinching belief that Black children deserved better than what society was prepared to give them and their unrelenting activism played a critical role in the landmark Brown v Board of Education case The Clarks decades of impassioned advocacy their inspiring marriage and their enduring work shines a light on the power of passion in an unjust world *Academic Paths* Peter A. Keller,2016-01-28 This book contains the intimate autobiographies of 13 psychologists who work in academic settings Their experiences are as diverse as their specializations and the academic institutions from which they come However all of the contributors have in common an infectious enthusiasm for their academic experiences and the unique opportunities provided by their careers Psychology students often have only vague notions about the career experiences and personal lives of academic psychologists The autobiographies in this book open special windows onto the lives of psychologists in academic settings The contributions range from a description of experiences at a two year community college through discussions of the demands at high powered doctoral level research institutions The authors offer intimate glimpses of experiences in their lives that paved the way to academia Although this book is in a sense about career planning in academic settings there is no pretense about it being a career planning guide The editor s goal was to give readers some sense of what motivates academic psychologists and what their personal as well as professional lives are like The editor also makes clear his belief that there is no single pathway to a successful academic career in psychology Although each contributor describes what most would see as a successful career the academic paths taken and the personal and professional rewards received are often quite different This book will provide encouragement to students contemplating a career in academia as well as interesting reading for psychologists curious about what makes their academic colleagues tick
