The British Prime Minister in the Core Executive Birgit Bujard, 2018-07-21 This book examines the UK prime minister's political leadership in the domestic executive By offering a comparative study of the political leadership of James Callaghan Margaret Thatcher John Major and Tony Blair with regard to European monetary policy it challenges the thesis that British prime ministers today have more power resources and autonomy than their predecessors giving them a greater capacity to act Taking key European monetary policy decisions by the British government between 1976 and 2007 as empirical cases the book assesses the extent to which the political leadership of each prime minister was affected by the cabinet the parliamentary party as well as the media and the extent to which he or she was able to manage these factors It becomes clear from this analysis that prime ministerial predominance is not as frequent as suggested while collective leadership does not represent a return to cabinet government Moreover particularly the party in government affects the prime minister's leadership by shaping his or her options on appointments and therefore the composition of the core executive and through its behaviour in parliament e.g. through rebellions or the threat of them Chinese Models of

Development Tse-Kang Leng, Yu-Shan Wu, 2014-11-20 Discussion of the Chinese Model abounds with the rise of China This volume analyzes the Chinese case in a theoretical framework provides an evolutionary perspective and compares it with other models of development Instead of focusing on one specific case the book's contributors shed light on the application of theories of international relations comparative politics and development studies to the topic under deliberation This book reflects that the uniqueness of the Chinese model should also be put in an historical and evolutionary context It also provides insights into comparisons with other models of development such as the East Asian model and experiences of the former Soviet Union The authors in the book argue that while globalization constrains state power it may also open new windows of accommodation and adjustments Linkages between the domestic dynamics of development and external forces of change
