God and the Processes of Reality David A. Pailin, 2024-12-06 Can belief in God be rational David A Pailin identifies the reasons behind this questioning of theistic faith

in his book *God and the Processes of Reality* originally published in 1989 and demonstrates how the supposed incoherences in the concept of God are due to the generalization of partial insights. He establishes the basic character of the concept of God and examines the nature of the major attributes of the divine and of the relationship of God to the processes of reality looking at God as creator, the relation of God to historical events and the role of God as the basis for individual fulfilment. The book takes up many of the insights developed by Whitehead and Hartshorne in what is commonly known as process thought. Pailin explains these insights and counters common misapprehensions about them critically, sometimes radically, so to present a credible understanding of the God of theistic belief and a coherent understanding of the relationship of that God to the processes of reality. This book will be of interest to students and researchers of religion and philosophy. *A New Handbook of Christian Theologians* Donald W. Musser, 1996. In recent years the flow of Christian theology has been channeled in diverse streams represented by such trends and movements as black theology, liberation theology, feminist theology and womanist theology. To survey this abundance and diversity of current Christian theology, this book examines the theologies of representative theologians. Particularly to help students navigate the sea of information, the editors have identified various routes for reading and have traced several threads or issues common to many of the essays, thus demarcating such recurrent concerns as the ways in which the theologians consider the sources and goals for theology, their variant assumptions and conclusions about the nature of God, their divergent approaches to understanding the person and purpose of the Christ and their distinct expectations for the destiny of history and faith. **Stages of Thought** Michael Horace Barnes, 2009-07-15. This work approaches the question of the relationship of religious to scientific thought. The author argues that they evolved together and are therefore complementary. *A Theology of Luke and Acts* Darrell L. Bock, 2015-04-28. This groundbreaking work by Darrell Bock thoroughly explores the theology of Luke's gospel and the book of Acts. In his writing, Luke records the story of God working through Jesus to usher in a new era of promise and Spirit enablement so that the people of God can be God's people even in the midst of a hostile world. It is a message the church still needs today. Bock both covers major Lukan themes and sets forth the distinctive contribution of Luke-Acts to the New Testament and the canon of Scripture, providing readers with an in-depth and holistic grasp of Lukan theology in the larger context of the Bible. I Howard Marshall. A remarkable achievement that should become the first port of call for students in this central area of New Testament Theology. Craig S. Keener. Bock's excellent exploration of Luke's theological approach and themes meets an important need in Lukan theology. **Theologies of Creation** Thomas Jay Oord, 2014-10-02. Humans have long wondered about the origin of the universe. And such questions are especially alive today as physicists offer metaphysical theories to account for the emergence of creation. Theists have attributed the universe's origin to divine activity and many have said God created something from absolute nothingness. The venerable doctrine of *creatio ex nihilo* especially emphasizes God's initial creating activity. Some contributors to this book explore new reasons *creatio ex nihilo* should continue to be embraced today. But other contributors

question the viability of creation from nothing and offer alternative initial creation options in its place These new alternatives explore a variety of options in light of recent scientific work new biblical scholarship and both new and old theological traditions
