## **Models Of Nature Ecology Conservation And Cultural Revolution In Soviet Russia:**

*Models Of Nature* Douglas R. Weiner, 2000-08-15 With a new afterword by the author A study of the early and turbulent years of the Soviet conservation movement Focusing on the period from the October Revolution to the mid 1930s from Lenin's rule to the rise of Stalin Douglas R Weiner studies the divergence between the growing ecological movement in the country and the state's social and economic policies The book offers a view of both sides of this dispute scientific conservation movements on the one hand and an industrializing nation's attitude toward science scientists nature and massive development on the other Weiner explains the development of pioneering conservation institutions state practices and ecological theory in the Soviet Union during the 1920s and why those developments were sidelined or quashed by Stalin The book provides a telling example of the social construction of science showing how the perceived political implications of rival ecological theories influenced Soviet scientists and chronicles the nature protection movement's conflicts with both the vigilantes of the Cultural Revolution and Stalin's first Five Year Plan which blatantly ignored potential environmental consequences in its quest to industrialize on a large scale The new afterword reflects upon the study's impact and discusses advances in the field since the book was first published Now in paperback this classic text is well suited for course use in Russian history environmental studies and history of science

an der sowjetischen Modernisierung die in der Perestrojkazeit an Fahrt aufnahm Letztendlich trugen die ökologischen und ökonomischen sowie sozialen Folgewirkungen der wachstumsfixierten Modernisierung zum Zusammenbruch des kommunistischen Regimes bei

Officials engineers and scientists in the Russian Empire and later the Soviet Union envisaged the expansion and modernization of irrigation systems and cotton growing in Central Asia Focusing on the region of today's Uzbekistan and Turkmenistan this book highlights the continuities in discourse and policies beyond the historical divide of 1917 One of the central topoi was the transformation of dead lands into blossoming oases High modernism policies hit their peak in the post war decades From the 1970s an ecological critique evolved which gained momentum in the Perestroika period Ultimately the grave ecological economic and social consequences of the growth fixated modernization contributed to the downfall of the Communist regime *Civilizing Nature* Bernhard Gissibl,,Sabine Höhler,Patrick Kupper,2012-01-15

Since their first designation in the United States in the 1860s and 1870s they have become a global phenomenon Siberia, Siberia Valentin Rasputin,1997-10-29 This work offers an account of the Russians 400 years of experience in Siberia Rasputin looks at the the peculiar physical and character traits of the Siberian Russian type and at the gap between dreams and reality that have plagued Russians in Siberia *Imperial Russia* Jane Burbank,David L. Ransel,1998-09-22 On the basis of the work presented here one can say that the future of American scholarship on imperial Russia is in good hands American Historical Review innovative and substantive research The Russian Review Anyone wishing to understand the state of the field in Imperial Russian history would do well to start with this collection Theodore W Weeks H Net Reviews The essays are impressive in terms of research conceptualization and analysis Slavic Review Presenting the results of new research and fresh approaches the historians whose work is highlighted here seek to extend new thinking about the way imperial Russian history is studied and taught Populating their essays are a varied lot of ordinary Russians of the 18th and 19th centuries from a luxury loving merchant and his extended family to reform minded clerics and soldiers on the frontier In contrast to much of traditional historical writing on Imperial Russia which focused heavily on the causes of its demise the contributors to this volume investigate the people and institutions that kept Imperial Russia functioning over a long period of time Stalin and the Scientists Simon Ings,2017-02-21 One of the finest most gripping surveys of the history of Russian science in the twentieth century Douglas Smith author of *Former People* The Final Days of the Russian Aristocracy *Stalin and the Scientists* tells the story of the many gifted scientists who worked in Russia from the years leading up to the revolution through the death of the Great Scientist himself Joseph Stalin It weaves together the stories of scientists politicians and ideologues into an intimate and sometimes horrifying portrait of a state determined to remake the world They often wreaked great harm Stalin was himself an amateur botanist and by falling under the sway of dangerous charlatans like Trofim Lysenko who denied the existence of genes and by relying on antiquated ideas of biology he not only destroyed the lives of hundreds of brilliant scientists he caused the death of millions through famine But from atomic physics to management theory and from

radiation biology to neuroscience and psychology these Soviet experts also made breakthroughs that forever changed agriculture education and medicine A masterful book that deepens our understanding of Russian history Stalin and the Scientists is a great achievement of research and storytelling and a gripping look at what happens when science falls prey to politics Longlisted for the Baillie Gifford Prize for Non Fiction in 2016 A New York Times Book Review Paperback Row selection Ings s research is impressive and his exposition of the science is lucid Filled with priceless nuggets and a cast of frauds crackpots and tyrants this is a lively and interesting book and utterly relevant today The New York Times Book Review A must read for understanding how the ideas of scientific knowledge and technology were distorted and subverted for decades across the Soviet Union The Washington Post Foreign Direct Investment and Regional Development in East Central Europe and the Former Soviet Union David Turnock,2017-11-28 With the achievement of further EU and NATO enlargement a critical political and economic lens is now focused on East Central Europe and to a lesser extent the other former communist states Economic growth in each transition state and more broadly the region pivots around the prospects for foreign direct investment FDI with decisions on where foreign investors will locate their projects now vitally important This book the first one devoted to a geographical survey concentrating specifically on FDI in the region brings together a wide range of prominent authors from the US and Europe including the late Frank Carter to provide a timely and critical examination of the importance of foreign investment It presents a detailed analysis of location patterns and their significance for regional development with particular emphasis given to the important socioeconomic and political consequences of uneven distribution of FDI across the region and its constituent countries Divided into two parts the book first deals with general overarching themes and issues before applying these to more specific country case studies The second part deals with regional studies focusing broadly on the Western Balkans and Bulgaria before looking at specific economic sectors in individual countries *Nature, Production, Power* Fred P. Gale,R. Michael M'Gonigle,2000-01-01 This work sets out to conceptualize an ecological political economy The collection of essays offers a range of innovative analyses that highlight how changing rationalities and systems of governance production reproduction and exchange are implicated in the generation of ecological problems **A Different Nature** David Hancocks,2001 A well written and provocative opinion rich account of zoos their history and their goals and purposes Hancocks has earned the right to speak authoritatively about these subjects thanks to his tenure as director of two leading U S zoos This book will appeal to general readers and to all persons interested in zoos and their role in conservation and education John Alcock author of *Animal Behavior An Evolutionary Approach* Giraffes elephants gorillas snakes and toucans respond poorly to the usual conventions of human architecture Zoo architects usually respond no less poorly to the needs of animals David Hancocks draws on a lifetime s experience working as a zoo director and zoo architect to explore this dilemma and offers a compelling vision for the future This is an important book for those interested in conservation as well as for zoo and museum buffs William Conway former President and General

Director of the Wildlife Conservation Society and the Bronx Zoo For over two decades David Hancocks has fervently tried to reform the fundamental character and mission of zoos This book is his most thorough analysis of what is wrong with them and his most detailed and compelling plea for improvement Every conscientious zoo administrator curator and keeper should read it from cover to cover with an open mind Professionals in botanical gardens museums and nature parks should also consider this treatise because Hancocks advocates that a fusion of all of these institutions into a new entity better positioned to interpret the entire biosphere Mark A Dimmitt Director of Natural History Arizona Sonora Desert Museum *Speaking with Nature* Norman Wirzba,2024-10-29 From one of the world s leading historians comes the first substantial study of environmentalism set in any country outside the Euro American world By the canons of orthodox social science countries like India are not supposed to have an environmental consciousness They are as it were too poor to be green In this deeply researched book Ramachandra Guha challenges this narrative by revealing a virtually unknown prehistory of the global movement set far outside Europe or America Long before the publication of Rachel Carson s *Silent Spring* and well before climate change ten remarkable individuals wrote with deep insight about the dangers of environmental abuse from within an Indian context In strikingly contemporary language Rabindranath Tagore Radhakamal Mukerjee J C Kumarappa Patrick Geddes Albert and Gabrielle Howard Mira Verrier Elwin K M Munshi and M Krishnan wrote about the forest and the wild soil and water urbanization and industrialization Positing the idea of what Guha calls livelihood environmentalism in contrast to the full stomach environmentalism of the affluent world these writers activists and scientists played a pioneering role in shaping global conversations about humanity s relationship with nature Spanning more than a century of Indian history and decidedly transnational in reference this book offers rich resources for considering the threat of climate change today

*Soviet Science on the Edge of Reform* Harley D. Balzer,2019-06-04 It is my sincere hope that the reforms currently being introduced in the USSR will render much of this book obsolete Yet even if perestroika brings significant change to the Soviet Union historians will want a record of what existed before After four years it has become apparent that perestroika is a painful long term process In such a large and diverse country even the reforms that are successful cannot take place everywhere at once One major goal in publishing this book is to make data from a major interview project on Soviet science and technology available to a broader audience Despite the changes taking place many of the features illuminated by these unique data persist *Dacha Idylls* Melissa L. Caldwell,2011 Anyone who has spent time in Russia knows the importance of going to the dacha In this ethnography Melissa Caldwell reveals the mystique of rural life by exploring the social nature of gardening and making food and Russian relationships to the land It s truly an innovative study Catherine Wanner author of *Communities of the Converted Ukrainians and Global Evangelism* In this engaging ethnography Melissa Caldwell brilliantly demonstrates what is peculiarly Russian about the dacha long an object of literary and nostalgic imagining while simultaneously situating the vacation cottage within larger histories of leisure consumption home and post socialist transition

A must read for scholars of Russia or tourism Pamela Ballinger author of *History in Exile Memory and Identity at the Borders of the Balkans*

**Aleksandr Rodchenko** Aglaya K. Glebova, 2022-01-01 Through the lens of Aleksandr Rodchenko's photography a new and provocative understanding emerges of the troubled relationship between technology modernism and state power in Stalin's Soviet Union Tracing the shifting meanings of photography in the early Soviet Union Aglaya K Glebova revises the relationship between art and politics during what is usually considered the end of the critical avant garde

Aleksandr Rodchenko 1891-1956 was a highly versatile Russian artist and one of Constructivism's founders His photographic work between 1928 when Stalin rose to power and the late 1930s reveals a wide ranging search for a different pictorial language in the context of the extreme transformations carried out under the Five Year Plans In response to forced modernization Rodchenko's photography during this time questioned his own modernist commitments At the heart of this argument is Rodchenko's infamous 1933 photo essay on the White Sea-Baltic Canal site of one of the first gulags Glebova's careful reading of Rodchenko's oeuvre yields a more diverse practice than has been generally acknowledged and brings to light new aspects of his work in adjacent media including the collaborative design work he undertook with Varvara Stepanova

[The Reenchantment of Nature](#) Alister McGrath, 2002-09-17 In this provocative assessment of the world's current ecological crisis the author of the critically acclaimed *In the Beginning* exposes the false assumptions underlying the conflicts between science and religion and proposes an innovative approach to saving the planet Traditionally science and religion have been thought of as two distinct and irreconcilable ways of looking at the world and scientists have often chastised the world's religions for keeping their eyes on the heavens and paying scant attention to the destruction of Earth's precious resources and its natural wonders In *The Reenchantment of Nature* Alister McGrath who holds doctorates in both molecular biology and divinity challenges this long held and dangerously misguided dichotomy Arguing that Christianity and other great religions have always respected and revered the bounty and beauty of the earth McGrath calls for a radical shift in perspective He shows that by defining the world in the narrowest of scientific terms and viewing it as a collection of atoms and molecules governed by unchanging laws and forces we have lost our ability to appreciate nature's enchantments In order to address the threats to our environment he maintains it is essential to reawaken our sense of awe and look at the world as a glorious creation an irreplaceable gift of God In setting forth a new framework for the debate between science and religion on ecological theory *The Reenchantment of Nature* points the way to integrating two different traditions in a sane and productive effort to rescue the natural world from its present environmental decline

**Saving Nature Under Socialism** Julia E. Ault, 2021-09-09 When East Germany collapsed in 1989-1990 outside observers were shocked to learn the extent of environmental devastation that existed there *Saving Nature Under Socialism* introduces readers to environmentalism in Cold War East Germany and traces the evolution of environmental policy and protest in East Germany and central Europe from the 1960s
