Models Of Religious Broadcasting:

Models of Religious Broadcasting J. Harold Ellens, 1974 **Models of Religious Broadcasting** J. Harold Ellens,

Challenges of Christian Communication and Broadcasting Dominic Emmanuel, 2016-07-27 The book attempts to establish historically why it became important for Christian Churches in general and the Catholic Church in particular to reconsider their communicative practices. It shows how the Churches tried to change their mode of monological communication to adopt a dialogical one including dialogue with non-Christian religions. The distinctive character of the book lies in showing that such parallel changes in communicative practices were witnessed in philosophical thinking as well as in the field of secular and religious broadcasting.

Broadcasting the Faith Michael E. Pohlman, 2021-02-02 Broadcasting the Faith tells the riveting story of the American church's embrace of radio in the early decades of the twentieth century. By investigating major radio personalities like Walter Maier Aimee Semple McPherson, Harry Emerson Fosdick, and Charles Fuller, this study considers the implications for theology in America when Christianity moved to the airwaves. In the heyday of radio, religious radio preachers sought to use their programs to counter the secularization of American culture. Ultimately, however, their programs contributed to secularization by accelerating changes already evident in both the conservative and liberal streams of American Christianity. To reach a vast American audience, radio preachers transformed their sectarian messages into a religion more suitable to the masses, thereby altering the very religion it aimed to preserve. To make religion accessible to large and diverse audiences, radio preachers accommodated their messages in ways suited to the medium of radio. Although religious radio preachers set forth to advance the influence of religion in American society, their choice to limit theological substance ironically promoted the secularization of the American church.

Between the Times William R. Hutchison, 1990-11-30 During the first six decades of this century, the so-called mainline Protestant denominations in America were compelled to accommodate to the growing influences of diverse religions and growing secularization. In this book, twelve historians examine the nature of the American Protestant establishment and its response to the growing pluralism of the times. The goals of the establishment are first examined from the inside as they were voiced from the pulpit, expressed in education and through the media, and applied in ecumenical and social reforming ventures. The establishment is then viewed through the eyes of outsiders: Jews and Catholics and those at the periphery of the establishment's core and women. The authors conclude that the period surveyed forms a distinct epoch in the evolution of American Protestantism. The days when Protestant cultural authority could be taken for granted were certainly over, but a new era in which religious pluralism would be widely accepted had not yet arrived.
