Functional Communication Quality, 2021-11-22 In this volume, researchers from American and European universities and institutes present their recent research on Functional Communication Quality. Functional refers to the purposes of the communication process. The relations between these purposes and the best way to describe them are some of the topics discussed. Communication refers to a complex interactive process. Relevant variables include the speech act of the participants, features of the message, chosen channel, moment, duration, frequency, environment. The participants in this process are individuals and groups as well as organizations and parts of organizations. Quality can be described from several points of view: a technical point of view with efficiency as its goal, an operative point of view which aims for effectiveness, or an aesthetic point of view. This volume shows that a multi-perspective approach to Functional Communication Quality (FCQ) is the only way to obtain a better insight into this area of communication studies. The papers are grouped in four different chapters, each dealing with a different perspective on the theme: FCQ in an organizational context, FCQ and research methods, FCQ and text analysis, FCQ and electronic tools.
