Research Methodologies and Practical Applications of Chemistry Lionello Pogliani, A. K. Haghi, Nazmul Islam, 2019-05-08 This new volume *Research Methodologies and Practical Applications of Chemistry* presents a detailed analysis of current experimental and theoretical approaches surrounding chemical science With an emphasis on multidisciplinary as well as interdisciplinary applications the book extensively reviews fundamental principles and presents recent research to help show logical connections between the theory and application of modern chemistry concepts It also emphasizes the behavior of materials from the molecular point of view The burgeoning field of chemistry and chemical science has led to many recent technological innovations and discoveries Understanding the impact of these technologies on business science and industry is an important first step in developing applications for a variety of settings and contexts The aim of this book is to present research that has transformed this discipline and aided its advancement The book examines the strengths and future potential of chemical technologies in a variety of industries

Modern Applications Frank Rösch, 2016-08-08 Nuclear chemistry represents a vital field of basic and applied research Modern applications cover for example fundamental aspects of energetics and high sensitive high selective and non destructive analytical technologies Nuclear chemistry and

radiopharmaceutical chemistry are increasingly used to bridge pharmaceutical and medical research with state of the art non invasive molecular diagnosis as well as with patient individual treatment While volume I on Introduction to Nuclear Chemistry describes the origin of unstable atoms and their pathways to stabilize this volume II illustrates the spectrum of modern applications of nuclear and radiochemistry In various chapters leading scientists address the measurement of radiation the dosimetric action of radioactive radiation and radiation safety nuclear dating elemental analysis by neutron activation radiation mass spectroscopy and chemicals speciation radiochemical separations applications of radiochemistry to life sciences the chemistry of radioelements Tc and At actinides and the transactinides fundamentals of modern nuclear energy

Practical Applications of Physical Chemistry in Food Science and Technology Cristóbal Noé Aguilar, Jose Sandoval Cortes, Juan Alberto Ascacio-Valdés, A. K. Haghi, 2021-01-11 Practical Applications of Physical Chemistry in Food Science and Technology provides comprehensive information original research and reports on scientific advances in practical applications of physical chemistry in food science and technology making a special emphasis on incorporating sustainable development goals This book demonstrates the potential and actual developments in the design and development of physical chemistry strategies and tools for the food science and technology Chapters cover many topics in this field including nutritional and pharmaceutical properties and analysis electroanalytical and electrochemical techniques valorization of food residues bioactives and bioactivities separative extraction microencapsulation nanoemulsions and much more Several chapters address how the food industry generates a large amount of agroindustrial waste that seriously affects the environment and present mitigation strategies and technology to use these agroindustrial waste products to produce bioactive compounds that can add value to food products Certain fruit and vegetable species are discussed as a potential new source for its use their raw materials of use in the pharmaceutical cosmetic and food industries

Modern Applications of High Throughput R&D in Heterogeneous Catalysis Alfred Hagemeyer, Anthony F. Volpe, 2014-04-04 This eBook covers the application of high throughput R D to both fundamental and applied catalysis including catalyst synthesis characterization and testing in various reactor types Chapters include topics such as applications ranging from optimizations of established industrial catalysts to the discovery of innovative new materials examples of the development of innovative parallel characterization methods and cases of real catalyst testing in small scale reactor systems Readers will also find chapters that cover commodity chemicals produced using continuous gas phase processes as well as fine chemicals produced in liquid phase batch reactors The potential of

industrial chemicals production from biorenewable feedstocks is also presented The steadily improving high throughput workflows are today being applied to relevant reactions and targets such as hydrotreating Deacon oxidation Fischer Tropsch propane dehydrogenation C4 oxidation methane coupling exhaust gas catalysis bio based Nylon fuel cells and vitamins The topics presented in this eBook have been contributed by researchers from academia as well as industry making this eBook a well balanced reference which could be of particular interest to professional industrial or service R D labs
