Modern Architecture Romanticism And Reintegration:

Modern Architecture Henry Russell Hitchcock, 1929 Originally published in 1929 this book demonstrates the architecture of the 1920s as the product of over a century of architectural development despite the visual evidence that seemed to indicate that it had made a radical break with the past This book crystallized the history and theories behind the international style for an American audience The author was only 27 at the time and this was his first book yet it would substantially reshape the way subsequent generations would view modern architecture and its history This is also the book that established Henry Russell Hitchcock as a pre eminent American historian of modern architecture Modern Architecture Vincent Scully (Jr.), 1968 *Modern Architecture*, 1929 **Philip Johnson and the Museum of Modern Art** Philip Johnson, 1998 This volume focuses on the architect Philip Johnson's long association with The Museum of Modern Art with essays examining his roles as patron as curator and as the institution's unofficial architect from the late 1940s to the early 1970s **Summerson and Hitchcock** Frank E. Salmon, 2006 Publisher description The Historiography of Modern Architecture Panayotis Tournikiotis, 2001-02-27 The history of modern architecture as constructed by historians and key texts Writing according to Panayotis Tournikiotis has always exerted a powerful influence on architecture Indeed the study of modern architecture cannot be separated from a fascination with the texts that have tried to explain the idea of a new architecture in a new society During the last forty years the question of the relationship of architecture to its history of buildings to books has been one of the most important themes in debates about the course of modern architecture Tournikiotis argues that the history of modern architecture tends to be written from the present projecting back onto the past our current concerns so that the beginning of the story really functions as a representation of its end In this book the buildings are the quotations while the texts are the structure Tournikiotis focuses on a group of books by major historians of the twentieth century Nikolaus Pevsner Emil Kaufmann Sigfried Giedion Bruno Zevi Leonardo Benevolo Henry Russell Hitchcock Reyner Banham Peter Collins and Manfredo Tafuri In examining these writers' thoughts he draws on concepts from critical theory relating architecture to broader historical models **Modern Architecture** Henry-Russell Hitchcock, 1929 *Arquitectura y virtualidad* Josep Muntanola Thonberg, 2010-12-15 Es bien sabido que la arquitectura es un tipo muy específico de arte de ciencia o de acto ético porque los edificios las ciudades y los territorios son artefactos físicos y sociales no representaciones virtuales como sucede en el cine en la literatura etc Mijail Bajtin era consciente de esta especificidad cuando afirmaba que la arquitectura toda la arquitectura solamente tiene sujetos estéticos potenciales no héroes estéticos reales 1 Sin embargo estas cualidades específicas de la arquitectura no significan que el proyecto arquitectónico virtual es decir un proyecto aun no construido aun no usado sea real See more at <http://ebooks.upc.edu/product/arquitectura-y-virtualidad-architecture-virtuality> sthash qKiK1LUK dpuf **Modern Architecture of Quito** Christian Parreno, 2024-08-22 Situated at the crossroads of the foreign and the vernacular Quito the capital of Ecuador with its world famous yet

understudied built environment stands as a testament to architectural in betweenness This book interweaves history and theory to explore how near and far influences have shaped its unique character Case studies present diverse and unexpected episodes in the architectural history of this city spanning the intricacies of its topography the design of modernist houses and the appropriation of the motel typology Together they show how fluxes of different origins have created an architecture marked by diversity and interrelation To theoretically frame these investigations this anthology readdresses the notions of the global and the local examining their tension and unavoidable coexistence while introducing the in between as a phenomenon with many variations and embodiments increasingly referenced in architectural thinking This book not only furthers the evolution of these concepts but also demonstrates their value as tools for analyzing the architectures of Latin America and the Global South more broadly With contributions from both international experts and a new generation of Ecuadorian scholars *Modern Architecture of Quito* is an indispensable resource for students and researchers investigating the development of architectural modernism in Latin America

Modernism in Late-Mao China Ke Song, 2023-04-28 This book investigates the architectural history of China in the Mao era 1949-1976 focusing on the rise of modernism in the last seven years of the

Cultural Revolution from 1969 to 1976 It highlights the new architecture of this period exemplified by three clusters of buildings for foreign affairs namely buildings for foreign diplomacy in Beijing buildings for foreign trade in Guangzhou and China's foreign aid projects overseas The emergence of new architecture in the early 1970s is closely associated with China's political and diplomatic shift of the time from a radical emphasis on ideological struggle to a dynamic balance between leftist ideology and pragmatic concerns In this context China's relations with the West quickly improved culminating with American president Richard Nixon's visit to China in 1972 The increasing foreign affairs brought new opportunities to Chinese architects who referenced both Western modernism and Chinese architectural traditions to create a new version of Chinese modernism The book brings dimensions of form politics and knowledge to the analysis of architecture to construct an understanding of architectural design as an aesthetic political and intellectual practice Modernism in Late Mao China will be an enriching and useful reference for students and scholars who are interested in the global architectural history of the twentieth century especially Cold War modernism

Lineages of the Global City Shiben Banerji, 2025 The forgotten history of the occult foundations of the early twentieth century global city The History of the Home in Colonial America and in the United States United States. Works Progress Administration (Pa.). Museum Extension Project, 1930 *On the Wings of Modernism* Robert Allen Nauman, 2004 Nauman argues that contrary to the technological and teleological interpretations presented by the polemicists of international style modernism the academy's actual production was squarely grounded in bureaucratic and political processes He demonstrates that selection of both the site and the design firm was the result of political maneuverings involving the U.S. military leadership **BOOK JACKET** **Visualizing Fascism** Julia Adeney Thomas, Geoff Eley, 2020-03-13 The contributors to *Visualizing Fascism* examine the imagery and visual rhetoric of interwar fascism in East Asia southern Africa and Europe to explore how fascism was visualized as a global and aesthetic phenomenon

Hut Pavilion Shrine: Architectural Archetypes in Mid-Century Modernism Miles David Samson,2016-03-09 The phase of American architectural history we call mid century modernism 1940 1980 saw the spread of Modern Movement tenets of functionalism social service and anonymity into mainstream practice It also saw the spread of their seeming opposites Temples arcades domes and other traditional types occur in both modernist and traditionalist forms from the 1950s to the 1970s Hut Pavilion Shrine examines this crossroads of modernism and the archetypal and critiques its buildings and theory The book centers on one particularly important and omnipresent type the pavilion a type which was the basis of major work by Louis I Kahn Paul Rudolph Philip Johnson Minoru Yamasaki and other eminent architects While focusing primarily on the architecture culture of the United States it also includes the work of British European Team X and Scandinavian designers and writers Making connections between formal analysis historical context and theory the book continues lines of inquiry which have been pursued by Neil Levine and Anthony Vidler on representation and by Sarah Goldhagen and Alice Friedman on modernism s forbidden elements of the honorific and the visually pleasurable It highlights the significance of pavilionizing mid century designers such as Victor Lundy John Johansen Eero Saarinen and Edward Durell Stone and shows how frequently essentialist and traditionalist types appeared in the roadside vernacular of drive in restaurants gas stations furniture and car showrooms branch banks and motels The book ties together the threads in mid century architectural theory that addressed aspects of type essential structure and primal humanistic aspects of environment making and discusses how these concerns outlived the mid century moment and in the designs and writings of Aldo Rossi and others they paved the way for Post Modernism

American Architects and the Mechanics of Fame Roxanne Kuter Williamson,2014-03-07 Why does one talented individual win lasting recognition in a particular field while another equally talented person does not While there are many possible reasons one obvious answer is that something more than talent is requisite to produce fame The something more in the field of architecture asserts Roxanne Williamson is the association with a famous architect at the moment he or she first receives major publicity or designs the building for which he or she will eventually be celebrated In this study of more than six hundred American architects who have achieved a place in architectural histories Williamson finds that only a small minority do not fit the right person right time pattern She traces the apprenticeship connection in case studies of Louis Sullivan Frank Lloyd Wright Henry Hobson Richardson the firm of McKim Mead White Latrobe and his descendants the Bulfinch and Renwick Lines the European immigrant masters and Louis Kahn Although she acknowledges and discusses the importance of family connections the right schools self promotion scholarships design competition awards and promotion by important journals Williamson maintains that the apprenticeship connection is the single most important

predictor of architectural fame She offers the intriguing hypothesis that what is transferred in the relationship is not a particular style or approach but rather the courage and self confidence to be true to one s own vision Perhaps she says this is the case in all the arts American Architects and the Mechanics of Fame is sure to provoke thought and comment in architecture and other creative fields
