R. Whitely, 2012-12-06 THE intention of this book is to provide a guide for potential management and supervisors and for those who wish to understand the fundamental principles of biscuit manufacture It does not set out to be a learned treatise The purpose of the book is to simplify and explain processes and materials so that the mystique is replaced by logic Once the mystique is removed the biscuit maker is one step closer to anticipating and solving problems In attempting to cover this subject within one concise volume it is difficult to avoid over simplification or generalisation and apologies must be offered in advance where these occur To wallow in the fine details of specialisation is to defeat the object of the book and less would be achieved if the issues were confused The reader s attention is drawn to the interpretation of formulae recipes Raw materials equipment methods processes and conditions vary considerably the formulae are intended as blue prints from which with a knowledge of the materials and aims of the processes and by trial and error a biscuit can be produced bearing some semblance to the original All formulae should be interpreted in conjunction with the Guide to using formulae at the beginning of Chapter 12 As the biscuit industry advances towards complete automation plant and equipment become more advanced and sophisticated Journal and Proceedings Royal Institute of Chemistry, 1925 *Baker's Digest* , 1941 *Journal and Proceedings* Institute of Chemistry of Great Britain and Ireland, 1925 Technical Education Series: Baking : a simple exposition National Joint Industrial Council for the Flour Milling Industry, 1948 **Agriculture Pakistan** , 1969
