Modern Dictators A History Of Tyranny In The Third World:

Modern Dictators Barry Rubin, Barry M. Rubin, 1987 **Bridling Dictators** Graeme Gill, 2021-11-20 Galtieri Lukashenka and Putin are some of the dictators whose untrammelled personal power has been seen as typical of the dog eat dog nature of leadership in authoritarian political systems This book provides an innovative argument that rather than being characterised by permanent insecurity fear and arbitrariness the leadership of dictatorships is actually governed by a series of rules The rules are identified and their operation is shown in a range of different types of authoritarian regime The operation of the rules is explained in ten different countries across five different regime types the Soviet Union and China as communist single party regimes Argentina Brazil and Chile as military regimes electoral authoritarian Malaysia and Mexico personalist dictatorships in Belarus and Russia and the Gulf monarchies Through close analysis of the way leadership functions in these different countries the book shows how the rules have worked in different institutional settings It also shows how the power distribution in authoritarian oligarchies is related to the rules The book transforms our understanding of how authoritarian systems work African Dictators Arthur Agwuncha Nwankwo, 1990 *The United States and the Rise of Tyrants* Lawrence E. Gelfand, John Day Tully, 2019-10-17 Nationalist dictatorships proliferated around the world during the interwar years of the 1920s and 1930s Policymakers in Washington D C reasoning that non Communist regimes were not necessarily a threat to democracy or national interests found it expedient to support them People living under these governments associated the United States with their oppressors with long term negative consequences for U S policy American policymakers were primarily concerned with fostering stability in these countries The dictatorships eager to maintain political order and create economic growth looked to American corporations and bankers whose heavy investments cemented the need to support the regimes Through an examination of consular records in nine countries the author describes the logistics and consequences of these relationships **Third World Resources**, 1987 **Dictators and Dictatorships** Natasha M. Ezrow, Erica Frantz, 2011-02-24 Dictators and Dictatorships is a qualitative enquiry into the politics of authoritarian regimes It argues that political outcomes in dictatorships are largely a product of leader elite relations Differences in the internal structure of dictatorships affect the dynamics of this relationship This book shows how dictatorships differ from one another and the implications of these differences for political outcomes In particular it examines political processes in personalist military single party monarchic and hybrid regimes The aim of the book is to provide a clear definition of what dictatorship means how authoritarian politics works and what the political consequences of dictatorship are It discusses how authoritarianism influences a range of political outcomes such as economic performance international conflict and leader and regime durability Numerous case studies from around the world support the theory and research presented to foster a better understanding of the inner workings of authoritarian regimes By combining theory with concrete political situations the book will appeal to undergraduate students in comparative politics international relations
