**Rise of French Laicity** Stephen M. Davis, 2020-08-07

Americans are often baffled by France's general indifference to religion and laws forbidding religious symbols in public schools full face veils in public places and even the interdiction of burkinis on French beaches An understanding of laïcité provides insight in beginning to understand France and its people Laïcité has been described as the complete secularization of

institutions as a necessity to prevent a return to the Ancien Régime characterized by the union of church and state To understand the concept of laïcité one must begin in the sixteenth century with the Protestant Reformation and freedom of conscience recognized by the Edict of Nantes in 1598 This has been called the period of incipient laïcité in the toleration of Protestantism The Revocation of the Edict of Nantes in 1685 reestablished the union of the throne and altar which resulted in persecution of the Huguenots who fought for the principle of the freedom of conscience French laïcité presents a specificity in origin definition and evolution which led to the official separation of church and state in 1905 The question in the early twentieth century concerned the Roman Catholic Church's compatibility with democracy That same question is being asked of Islam in the twenty first century

**Public Commissions on Cultural and Religious Diversity** Katayoun Alidadi, Marie-Claire Foblets, 2018-06-13 In several Western countries expert commissions composed of academics public figures politicians and community organisers have been established by governments or civil society to reflect on the changes and challenges of an increasingly plural society Commission recommendations on how to manage diversities successfully have shaped national narratives and affected law and public policies yet research on the workings of such commissions remains rare This book focuses on the experiences of expert commissions in the UK France Quebec and Belgium Furthering the debate on commissions potential and limitations it draws on the first hand experiences and introspection of former commission members and close observers along with outside perspectives and critique from independent scholars Building on its companion volume Public Commissions on Cultural and Religious Diversity Analysis Reception and Challenges this book engages with core concepts of identity nationality citizenship freedom equality and accommodation It will appeal to researchers and students of public policy sociology anthropology law religion politics history and migration studies as well as policymakers and anyone with a general interest in current debates on ethnic cultural and religious diversity

**Religion in Modern Europe** Grace Davie, 2000-08-03 Religion in Modern Europe examines religion as a form of collective memory This is a memory held in place by Europe's institutional churches educational systems and the mass media all of which are themselves responding to rapid social and economic change Europe's religious memory is approached in the following ways as vicarious a particularly European characteristic as precarious especially among young

people and as it is portrayed by the media The memory may fragment be disputed and in extreme cases disappear Alternatives may emerge The challenge for European societies is to affirm healthy mutations in religious memory and discourage others The book also examines the increasing diversity of Europe s religious life European Societies Series Series Editor Colin Crouch Very few of the existing sociological texts which compare different European societies on specific topics are accessible to a broad range of scholars and students The European Societies series will help fill this gap in the literature and attempt to answer questions such as Is there really such a thing as a European model of society Do the economic and political integration processes of the European Union also imply convergence in more general aspects of social life like family or religious behaviour What do the societies of Western Europe have in common with those further to the east This series will cover the main social institutions although not every author will cover the full range of European countries As well as surveying existing knowledge in a way that will be useful to students each book will also seek to contribute to our growing knowledge of what remains in many respects a sociologically unknown continent *The Reconciliation of Humanity in Christ* Peter Y. Hong, 2024-12-10 The Reconciliation of Humanity in Christ is essential reading for Christians who wish to lead and serve the globalized world This book is about theological engagement with globalization Although people are now living in a world in which a universal and inclusive society has emerged the church has remained powerless in uniting peoples nations and civilizations as one in Christ In order for the church to regain its credibility and confidence it must address three theological issues social justice religious pluralism and ethics and the missional method The rationale for this book is that the power of true religion becomes evident in the world when all Christians are engaging with globalization to reconcile humanity with God and with each other in preparation for the consummation of God s kingdom In response to the problems of globalization Christians can become agents of renewal for globalization by administering God s grace and peace for humanity This book will educate and equip the readers to engage with the issues of globalization in the public arena Readers will gain a biblical understanding of the church s role in fulfilling God s plan and purpose for humanity through globalization
