Modern Management of Water and Wastewater Utilities W. E. Korbitz, 1981 **Modern Management of Water and Wastewater Utilities** William E. Korbitz, 1981 **Risk Management for Water and Wastewater Utilities** Simon Pollard, 2016-05-15

Water risks and security are a major global hazard in the 21st century and it is essential that water professionals have a solid grounding in the principles of preventative risk management. This second edition of the key textbook *Risk Management for Water and Wastewater Utilities* extends beyond first principles and examines the practicalities of resilience and vulnerability assessment, strategic risk appraisal and the interconnectedness of water utility risks in a networked infrastructure. It provides an up-to-date overview of tools and techniques for risk management in the context of the heightened expectations for sound risk governance that are being made of all water and wastewater utilities. *Risk Management for Water and Wastewater Utilities* provides a valuable starting point for newly appointed risk managers in the utility sector and offers MSc level self-paced study with self-assessment questions and abbreviated answers, key learning points, case studies and worked examples.

Water Services Management and Governance Tapio Katko, Petri S. Juuti, Klaas Schwartz, 2012-10-14

Water Services Management and Governance focuses on water services, water supply, wastewater services and deals with connections between water resources and services and water resources. It covers water supply mainly in urban communities, sanitation and pollution control and water resources and their linkages to water services. This book is divided into four key sections relating to governance, frameworks, technology and socio-ecological interactions, government and governance and long-term policies. The chapters analyse the complexity of the water services sector based on a historical analysis of developments within the sector. The underlying conviction is that only by understanding past trends, processes and developments can the current situation in the water services be understood. Only through this understanding can policies for sustainable water services in the future be formulated. The four key sections relate to governance, frameworks, technology and socio-ecological interactions, government and governance and long-term policies.

Water Services Management and Governance raises awareness that an understanding of the past is a necessity to explore potential, probable and preferable futures. It is an essential basis for water sector reforms in any country, region or community. The book is written for experts in water utilities, ministries, municipalities, NGOs, donor agencies, private companies and regulators, as well as students and researchers in water policy and governance and the management of water resources, services and infrastructure.

Editors: Dr Petri S. Juuti is a historian and Adjunct Professor in the universities of Tampere, Oulu and Turku. Tapio S. Katko is a Civil engineer, Adjunct Professor, UNESCO Chairholder in Sustainable Water Services at Tampere University of Technology, Finland. Klaas Schwartz is a Senior Lecturer in Urban Water Governance in the Department of Integrated Water Systems and Governance at the UNESCO IHE Institute for Water Education, Delft, the Netherlands. Assistant Editor: Riikka P. Rajala is an Environmental Engineer, Post Doctoral researcher in University of Tampere, Finland.
