Elites and the Politics of Accountability in Africa Wale Adebani, Rogers Oroch, 2021-05-24 Elites and the Politics of Accountability in Africa examines the ways that accountability offers an effective interpretive lens to the social cultural and institutional struggles of both the elites and ordinary citizens in Africa Each chapter investigates questions of power its public deliberation and its negotiation in Africa by studying elites through the framework of accountability The book enters conversations about political subjectivity and agency especially from ongoing struggles around identities and belonging as well as representation and legitimacy Who speaks to whom And on whose behalf do they speak The contributors to this volume offer careful analyses of how such concerns are embedded in wider forms of cultural social and institutional discussions about transparency collective responsibility community and public decision making processes These concerns affect prospects for democratic oversight as well as questions of alienation exclusivity privilege and democratic deficit The book situates our understanding of the emergence meaning and conceptual relevance of elite accountability to study political practices in Africa It then juxtaposes this contextualization of accountability in relation to the practices of African elites Elites and the Politics of Accountability in Africa offers fresh dynamic and multifarious accounts of elites and their practices of accountability and locally plausible self legitimation as well as illuminating accounts of contemporary African elites in relation to their socially and

historically situated outcomes of contingency composition negotiation and compromise

Indentured Muslims in the Diaspora Maurits S. Hassankhan, Goolam Vahed, Lomash Roopnarine, 2016-11-10 The focus of most studies on Indian indenture has been almost exclusively on Hindu religion and culture even though an estimated seventeen percent of migrants were Muslims This book thus fills an important gap in the indentured historiography both to understand that past as well as to make sense of the present when Muslim identities are undergoing rapid changes in response to both local and global realities The book includes a chapter on the experiences of Muslim indentured immigrants of Indonesian descent who settled

Horowitz, 2001-04-09 Drawing material from dozens of divided societies Donald L Horowitz constructs his theory of ethnic conflict relating ethnic affiliations to kinship and intergroup relations to the fear of domination A groundbreaking work when it was published in 1985 the book remains an original and powerfully argued comparative analysis of one of the most important forces in the contemporary world Currencies of the Indian Ocean World Steven Serels, Gwyn Campbell, 2019-08-24 This book is the first to trace the unique monetary history of the Indian Ocean World Long distance trade across the region was facilitated by a highly complex multi currency system undergirded by shared ideas that transcended ethno linguistic religious and class divisions Currencies also occupied key roles in local spiritual aesthetic and affective practices Foregrounding these tensions between the global universalistic and the local particularistic the volume shows how this traditional currency system remained in place until the middle of the twentieth century and how aspects of the system continue to inform monetary practices throughout the region With case studies covering China India the Arabian Sea the Red Sea East Africa Zanzibar Madagascar and Mauritius from the thirteenth to the twenty first centuries this volume explores the central role currencies played in economic exchange as well as in establishing communal bonds defining state power and expressing religious sentiments **India and the World** Claude Markovits, 2021-03-25 In this pioneering history of modern India Claude Markovits offers a new interpretation of events of world importance focusing on the multiplicity of connections between India and the world Beginning with an examination of India's evolving role in the world economy he deals successively with the movement of people out of and into India the role played by Indian soldiers in a series of conflicts from the mid eighteenth to the late twentieth century the place of India in the global circulation of ideas and cultural productions and the relationships established between Indians and others both abroad and at home Challenging dominant state centred histories by focusing on the lived experiences of people Markovits demonstrates that the multiple connections established between India and other lands did not necessarily result in mutual knowledge but were often marked by misunderstanding **Voice and Power in Africa's Democracy** Said Adejumo, 2017-08-16 Africa has made notable progress in its nascent democracy but with uneven performance across countries However across the board challenges abound Central to Africa's checkered democratic narrative is the weakness of its democratic institutions participatory mechanisms and accountability platforms This book interrogates these elements with the role and capacity of the parliament political parties media freedom of information law trade union movements gender empowerment mechanisms and accountability methods and processes all under examination The weakness of democratic institutions has had a corrosive effect on political accountability and limits the scope for popular participation in governance In many countries innovative practices and new social and political encounters are emerging that challenge old institutional cultures promote reforms and demand accountability from the governing elite The book captures these varied innovative

patterns of democratic change With first hand knowledge and expertise of the continent the contributors analyze the issues trends problems and challenges in these critical areas of Africa s democratic growth The conclusion is that strengthening democratic institutions opening up the political space for enhanced political participation and ensuring political

accountability will determine the course prospects and quality of Africa s budding democracy **Religion and the State**

Phaahla,2024-02-20 This study traces the welfare regimes of Mauritius and South Africa from the early 20th century focusing on the historical circumstances that gave rise to the dominance of state funded old age pensions within their respective welfare frameworks It highlights intersections between powerful business interests the state and social forces that sowed the seeds of social entitlements Due to different mobilisation efforts of these social actors both countries have spawned welfare regimes of different persuasions Mauritius has maintained its long standing traditions as a social democracy stretching back to the late 1950s while South Africa continues relentlessly in pursuit of a liberal welfare state a journey it has treaded since

1928 when the old age pension laws first came into effect While unravelling the innermost workings of welfare state development in Mauritius and South Africa it also probes the present political and economic circumstances that have kept these two welfare regimes resolutely unchanged Against this backdrop it draws parallels between current welfare outcomes and those of old as they continue to chart their way into the future

Handbook of Civil Society and Social Movements in Small States Lino Briguglio, Michael Briguglio, Sheila Bunwaree, Claire Slatter, 2023-02-22 This volume is unique because of its focus on small states There are many studies on civil society and social movements but none that specifically deal with this category of countries As is well known small states have particular characteristics including a limited ability to reap the benefits of economies of scale a high degree of exposure to forces outside their control and the proximity of politicians to the voters often leading to clientelistic relationships and patronage networks The small island developing states have the additional problem of high environmental vulnerability with some also dealing with disproportionate ecological footprints These factors have a bearing on the organization and performance of civil society organizations and social movements as explained in several chapters of this book The volume is organized in three parts dealing with aspects of civil society and social movements in small states in the political social and environmental spheres respectively Various definitions of civil society are proposed in the chapters but most authors associate the term with organized groups operating in the interest of citizens independently of government and commercial business including various forms of non governmental organizations NGOs Civil society also encompasses social movements which are considered to be loosely organized collective campaigns in pursuit of social goals These two terms are sometimes used interchangeably however some authors argue that social movements tend to engage in contentious politics including protests while NGOs engage through more organized and institutional routes
