The Arms Race in Asia Andrew T.H. Tan, 2013-12-13 This book is the first systematic examination of the emerging arms race in Asia The global trade in arms is to a large degree underpinned by the strong demand for arms in Asia and the Middle East the two largest arms export markets in the world Of these two regions Asia has become particularly significant led by the emergence of China and India as major powers It is therefore not surprising that the rapid military modernisation in Asia accompanied by significant increases in the size and sophistication of armed forces has generated attention as to its trends key characteristics causes and implications This phenomenon which has become evident since the end of the Cold War has also been widely described as an Asian arms race This book evaluates the key conceptual ideas which can shed light on this phenomenon as well as examining the complex mix of internal external and technological factors

that have led to its emergence The volume explores the way in which the arms race is leading ultimately to three distinctive blocs in the emerging geostrategic landscape a loose bloc of US allies in the region a counter bloc of potential US adversaries and a neutral bloc of states with industrial age armed forces whose allegiances will vary according to circumstances and geostrategic developments The Arms Race in Asia concludes that if the emerging arms race is left unchecked it is likely that Asia will increasingly become a region of instability marked by conflicts and interstate wars The book will be of great interest to students of Asian politics strategic studies defence studies security studies and IR in general **U.S. Air Force Fighting**

Tomajczyk,2008-02-11 Warspeak the language of the military can be for many civilians and for members of differing services an unintelligible hodgepodge of acronyms slang terms and field operation expressions Few laypersons may know that the Five F s is a derogatory expression though Army Navy Marine Air Force Coast Guard and others know or can infer that chairborn commandos are administrative and support personnel The more than 15 000 entries in this comprehensive dictionary provide an inside look at the United States military Weapons systems governmental agencies electronic warfare medical terms military infrastructure communications satellites and intelligence systems are among the topics covered in depth Also detailed are the acronyms and slang terms used by the soldiers in the field The work provides numerous cross

references for ease of use along with a bibliography of over 2 200 sources **Flying Magazine** ,1985-05 Fire on the Water Robert Haddick,2014-09-15 The main theme of Fire on the Water is that conventional measures of military balance employed by both the general public and many policy experts underestimate the threat that China s military modernization poses to the U S position in the Asia Pacific region Within a decade China s leaders will have the military power to hold at risk U S interest in East Asia The U S needs to fashion a new and competitive strategy one that better matches the strengths of the U S and its allies against China s vulnerabilities in order to maintain a balance of power in the region and convince China s leaders to pursue a cooperative course It is not obvious to many observers why a conflict in the region is plausible or why the U S should bear the responsibility for maintaining a forward military presence in the region China has rapidly emerged as a great power and by doing so has acquired many vital interests around the world Following the pattern set by other such episodes in history China is also acquiring the military means to protect its new interests a development that puts at risk the interests of China s neighbors and the United States The U S forward military presence in the region is an increasingly difficult burden to sustain But in the long run this approach will be less costly and less risky than encouraging China s neighbors to balance China by themselves an alternative that will very likely result in an unstable arms race and a conflict that will damage America s interests While it will be in America s interest to maintain its position in the Asia Pacific region China s military modernization is making it much more difficult for the U S to do so China s military strategy centered on its rapidly expanding land based and anti ship missile forces is exploiting weaknesses in long standing U S force structure and doctrine Due to a variety of institutional barriers the U S has been slow to adapt to China s military modernization Current efforts to respond are impractical in that they expend U S resources against China s strengths rather than its vulnerabilities The U S needs a new and competitive strategy that will strengthen its alliances in the region and convince China s leaders that cooperation rather than military expansion and an attempt at regional hegemony will be China s best course Fire on the Water proposes reforms to U S diplomacy military programs and strategy that will offer a better chance at preserving stability The goal of these reforms is to thwart China s well designed military modernization plan bolster the confidence and credibility of U S alliances in the region and thus persuade China s leaders that China s best course is cooperation rather than conflict the outcome that has usually occurred in history when a new great power has rapidly emerged **Air Force Magazine** ,2015 **Library of Congress Subject Headings** Library of Congress,1990 Library of Congress Subject Headings Library of Congress.
