Ford, 1990 Covering the period 1890-1932 this book focuses on various recognised masters explaining the detailing and construction techniques used in their buildings **Modern movements in architecture** C. An Architecture of Immanence Mark A. Torgerson, 2007-01-22 Torgerson begins by discussing God s transcendence and immanence and showing how church architecture has traditionally interpreted these key concepts He then traces the theological roots of immanence s priority from liberal theology and liturgical innovation to modern architecture Next Torgerson illustrates this new architecture of immanence through particular practitioners focusing especially on the work of theologically savvy architect Edward Anders S vik Finally he addresses the future of church architecture as congregations are buffeted by the twin forces of liturgical change and postmodernism

Architecture Martin van der Linden, 2021-03-12 The question of what architecture is answered in this book with one sentence Architecture is space created for human activities The basic need to find food and water places these activities within a larger spatial field Humans have learned and found ways to adjust to the various contextual difficulties that they faced as they roamed the earth Thus rather than adapting humans have always tried to change the context to their activities Humanity has looked at the context not merely as a limitation but rather as a spatial situation filled with opportunities that allows through intellectual interaction to change these limitations Thus humanity has created within the world their own contextual bubble that firmly stands against the larger context it is set in The key notion of the book is that architecture is space carved out of and against the context and that this process is deterministic

Architecture, Crisis and Resuscitation Tahl Kaminer, 2011-01-20
