corpus linguistic methodologies have favoured de contextualized analytical perspectives on contemporary and historical language data and on the mechanisms and processes guiding grammatical variation and change From a range of different perspectives the contributions to this volume take up the challenge of contextualization in the investigation of grammatical variation and change in different stages of English language history and discuss central theoretical notions such as gradable grammaticality motivation in hypervariation and hypercharacterization The book will be relevant to students and linguists working in the field of diachronic and variational linguistics and English language history
