Petuch, 2013-04-02 Shallow water marine molluscan faunas are distributed in a pattern of distinct geographically definable areas This makes mollusks ideal for studying the distribution of organisms in the marine environment and the processes and patterns that control their evolution Biogeography and Biodiversity of Western Atlantic Mollusks is the first book to us Evolution and Environment in Tropical America Jeremy B. C. Jackson, Ann F. Budd, Anthony G. Coates, 1996-12-15 How were the tropical Americas formed This ambitious volume draws on extensive multidisciplinary research to develop new views of the geological formation of the isthmus linking North and South America and of the major environmental changes that reshaped the Neotropics to create its present day marine and terrestrial ecosystems Recent discoveries show that dramatic changes in climate and ocean circulation can occur very quickly and that ecological communities respond just as rapidly Abrupt changes in the composition of fossil assemblages formerly dismissed as artifacts of a poor fossil record now are seen as accurate records of swift changes in the composition of ocean communities The twenty four contributors use current work in paleontology geology

oceanography anthropology ecology and evolution to paint this challenging portrait of rapid environmental and evolutionary change Their conclusions argue for a revision of existing interpretations of the fossil record and the processes including invading Eurasian peoples that have produced it **Encyclopedia of Post-Colonial Literatures in English** Eugene Benson,L.W. S. Miles,2014-07-01 Based on three decades of fieldwork throughout the developing world Scars of Partition is the first book to systematically evaluate the long term implications of French and British styles of colonialism and decolonization for ordinary people throughout the so called Third World It pays particular attention to the contemporary legacies of artificial boundaries superimposed by Britain and France that continue to divide indigenous peoples into separate postcolonial states In so doing it uniquely illustrates how the distinctive stamps of France and Britain continue to mark daily life along and behind these inherited borders in Africa Asia Oceania and the Caribbean Scars of Partition draws on political science anthropology history and geography to examine six cases of indigenous indentured and enslaved peoples partitioned by colonialism in West Africa West Indies South Pacific Southeast Asia South India and the Indian Ocean William F S Miles demonstrates that sovereign nations throughout the developing world despite basic differences in culture geography and politics still bear the underlying imprint of their colonial pasts Disentangling and appreciating these embedded colonial legacies is critical to achieving full decolonization particularly in their borderlands It's All in the Details Tessa Eveleigh,2006 For anyone designing a new house refurbishing an old one or simply redecorating the newest addition to the House Beautiful Workshop series shows how to perfect those finishing touches and distinctive details **Nested Identities** Guntram Henrik Herb,David H. Kaplan,1999 This groundbreaking work explores the vital importance of territory and space to any genuine understanding of nationalism and identity Too often the contributors argue national identity is analyzed apart from the lands that are integral to its formation as territory is seen as a commodity to be brokered rather than as central to a group s self definition This volume combines theoretical insights with structured case studies on how national identity manifests itself in space and at different geographical scales **A Companion to Children's Literature** Karen
