Modern classics in regional science , *Handbook on Transport and Land Use* João de Abreu e Silva, Kristina M. Currans, Veronique Van Acker, Robert J. Schneider, 2023-06-01 Synthesizing current understandings on the relationship between transport and land use this timely Handbook proposes an agenda for research and practice that leads toward more human centered communities within an increasingly urbanized world facing rapid technological change Chapters explore the role of institutional policies and informal cultural contexts in influencing transport and land use systems before examining the impacts of transportation and land use decisions across multiple areas including equity public health climate environment and lifestyle preferences *The City and Its Sciences* Cristoforo S. Bertuglia, Giuliano. Bianchi, Alfredo Mela, 2012-12-06 Recent developments in the field of urban analysis and management are investigated in this book It is a wide ranging collection of essays on the subject drawn from a long term project and seminar held in Italy to review the state of the art and speculate on the future influence on the sciences of the city of the complexity concept Of particular interest is the variety of points of view often contrasting and the attempt to go beyond the conventional approaches to the analysis and the planning of the city While focussing mainly on the European and in particular Italian context the discussion is of general relevance and valuable to anyone concerned with the prospects for the city in the new millenium *Spatial Economic Science* Aura Reggiani, 2012-12-06 With the dawn of the twenty first century comes the awareness that current rapid political economic social and technological transformations will affect our of living by producing new forms of information communications common way market work style and leisure In this context human behaviour will certainly change its fixed parameters It is likely that the relationships between internal structures and external influences between individual components and collective behaviour as well as between multi scale networks and interrelated dynamics will show spatio temporal patterns which will be difficult to predict by means of our usual tools As a consequence academic research is increasingly being required to play an active role in addressing new ways of understanding and forecasting the sets of interacting structures ranging from the technical to the organizational and from the social to the economic and political levels while at the same time incorporating concerns about the new economy environment society information and technology It is now evident that social science especially spatial and economic scienc needs innovative paths together with continuous cross fertilization among the many disciplines involved In order to investigate these intriguing perspectives we seem to have embarked on an era of methodological reflections rather than developing strong theoretical foundations This volume aims to provide an overview of these new insights and frontiers for theoretical methodological studies and research applications in the space economy **Regional Dynamics** Kingsley E. Haynes, Kenneth Button, Peter Nijkamp, 1996 This series brings together major previously published contributions to the field of regional science Regional dynamics refers to the processes of change that occur within and among regions with emphasis on the internal dynamics of regions but also including the interaction among

regions induced by change Fifty two papers from such publications as J of Economic Literature Urban Geography and International Regional Science Review address the causes and consequences of regional change resulting from human activities especially those related to economic and social behavior the process of integration across regions and the role of specific national policies are addressed elsewhere in the series No subject index Annotation copyrighted by Book News Inc Portland OR

Conway Jr., 2022-04-23 This textbook offers an introduction to empirical regional economics including a comprehensive and systematic overview of the fundamentals history development and applications of economic base models It not only provides a sound basis for regional economics and regional economic analysis but it also includes numerous applications of the underlying theory The book has an empirical orientation highlighting the value of observation and testing in order to explain regional economic behavior Theory plays an important role in this study but it is only a starting point The book is divided into three parts the first discusses the economic base theory of regional growth and the empirical evidence supporting it while the second part covers the specification and application of four increasingly complex regional economic models the economic base model the input output model the interindustry econometric model and the structural time series model Lastly the third part presents forty eight regional economic case studies organized under seven headings including economic cycles economic policy and regional forecasting Given its scope the book appeals to upper undergraduate and graduate students majoring in economics economic geography and business as well as to anyone in the private or public sector interested in gaining a better understanding of practical methods of regional economic forecasting and analysis For additional course material please check the author's website <https://www.empiricalregionaleconomics.com>

My Los Angeles Edward W. Soja, 2014-03-14 At once informative and entertaining inspiring and challenging *My Los Angeles* provides a deep understanding of urban development and change over the past forty years in Los Angeles and other city regions of the world Once the least dense American metropolis Los Angeles is now the country's densest urbanized area and one of the most culturally heterogeneous cities in the world Soja takes us through this urban metamorphosis analyzing urban restructuring deindustrialization and reindustrialization the globalization of

capital and labor and the formation of an information intensive New Economy By examining his own evolving interpretations of Los Angeles and the debates on the so called Los Angeles School of urban studies Soja argues that a radical shift is taking place in the nature of the urbanization process from the familiar metropolitan model to regional urbanization By looking at such concepts as new regionalism the spatial turn the end of the metropolis era the urbanization of suburbia the global spread of industrial urbanism and the transformative urban industrialization of China Soja offers a unique and remarkable perspective on critical urban and regional studies

Location Theory Jacques-François Thisse, Kenneth John Button, Peter Nijkamp, 1996 In recent years a growing number of social scientists have become increasingly interested in the study of location problems This interest has been fostered by the integration of national economies within broader spaces such as the EU or NAFTA as well as by their impact on the development of regions and cities Another important reason for this attention is the growing awareness among economists that a comprehensive economic theory can no longer put space aside Most economic activities are distributed over space and for such activities space moulds the very nature of competition between firms This major collection of classic articles demonstrates the important contribution of location theory and will be an essential source of reference for students or researchers of modern regional science or economic theory
