Measuring Damages in the Law of Obligations Sirko Harder,2010-07-12 This book challenges certain differences between contract tort and equity in relation to the measure in a broad sense of damages Damages are defined as the monetary award made by a court in consequence of a breach of contract a tort or an equitable wrong In all these causes of action damages usually aim to put the claimant into the position the claimant would be in without the wrong Even though the main objective of damages is thus the same for each cause of action their measure is not While some aspects of the measure of damages are more or less harmonised between contract tort and equity e g causation in fact and mitigation significant differences exist in relation to 1 remoteness of damage which is the question of whether when and to which degree damage needs to be foreseeable to be recoverable 2 the compensability of non pecuniary loss such as pain and suffering distress and loss of reputation 3 the effect of contributory negligence which is the victim s contribution to the occurrence of the wrong or the ensuing loss through unreasonable conduct prior to the wrong 4 the circumstances under which victims of wrongs can claim the gain the wrongdoer has made from the wrong and 5 the availability and scope of exemplary or punitive damages For each of the five topics this book examines the present position in contract tort and equity and establishes the differences between the three areas It goes on to scrutinise the arguments in defence of existing differences The conclusion on each topic is that the present differences between contract tort and equity cannot be justified on merits and should be removed through a harmonisation of the relevant principles Law in Transition Ferdinand J.M. Feldbrugge,2021-10-25 The states of Central and Eastern Europe have to different extents and with varying levels of success engaged in the transition from authoritarian rule The re construction of democratic law based governance has turned out to be a lengthy and at times frustrating process The agenda for post communist reform contains many entries yet a transition blue print is not available The papers collected in this volume explore the implications of the transition process in various areas While not all aspects of post communist law are covered several crucial issues receive an in depth treatment These are the development of supra governmental systems the procuracy minority rights contract law land ownership and industrial property rights Displaying remarkable scholarly as well as practical legal expertise the various contributors to this volume illustrate the problems in and the potential of these policy areas

wrong explaining the nature and need for such a remedy and the scope of civil wrongs The core thesis of the book is that two different forms of such gain based damages exist the first is concerned with restitution of a defendant s gains wrongfully transferred from a claimant the second is concerned only with stripping profits from the defendant s hands Once these two gain based damages awards are separated they can be shown to be based upon different rationales and the basis for their availability can be easily understood The second part of the book considers and applies this approach demonstrating its operation throughout the cases of civil wrongs The operation of the two forms of gain based damages is demonstrated in cases in the area of tort chapter 4 contract chapter 5 equitable wrongs chapter 6 and intellectual property wrongs chapter 7 It is shown that these gain based damages awards have long been available in these areas and their operation has conformed to clear principle The difficulty that has obscured the principle is the nomenclature which has hidden the true gain based nature of many of these damages awards
