Seth, 2024-10-10 Tale of Four Indian Cities presents a vivid picture of how the British political regime reorganized the structure of the Indian economy to suit its own objectives While doing so the regime also affected the geographical distribution of economic activities This resulted in the decline of native cities and the increased

prosperity of colonial cities To reveal how British colonial power brought about such changes in the Indian subcontinent the book narrates the account of two pairs of native and colonial cities Dacca and Calcutta from the Indian Eastern coast and Surat and Bombay from the Western coast These were major centres of manufacturing shared a common history and experienced the consequences of three different political dispensations the Mughal Empire the East India Company and the British Raj Accessibly written the volume will be of great interest to students scholars and researchers of Indian colonial business and economic history It will also be of interest to the general reader *The Political Economy of Merchant Empires*

Accessions List, South Asia Library of Congress. Library of Congress Office, New Delhi, 1987-12 Records publications acquired from Afghanistan Bangladesh Bhutan India Maldives Nepal Pakistan and Sri Lanka by the U S Library of Congress Offices in New Delhi India and Karachi Pakistan **The Political Economy of NGOs** Jude L. Fernando, 2011-07-08 This book explores the paradoxical relationship between NGOs and capitalism showing that supposedly progressive organisations often promote essentially the same policies and ideas as existing governments It examines how a diverse group of NGOs have shaped state formation in Bangladesh and Sri Lanka It argues that rather than influencing state formation for the better NGOs have been integrated into the capitalist system and their language adopted to give traditional exploitative social relations a transformative appearance This enlightening study will give pause to those who see NGOs as drivers of true social change and will encourage students of development studies to make a deeper analysis of state formation *Traditional Industry in the Economy of Colonial India* Tirthankar Roy, 1999-11-04 The majority of workers in South Asia are employed in industries that rely on manual labour and craft skills Some of these industries have existed for centuries and survived great

changes in consumption and technology over the last 150 years In earlier studies historians of the region focused on mechanized rather than craft industries arguing that traditional manufacturing was destroyed or devitalized during the colonial period and that modern industry is substantially different Exploring new material from research into five traditional industries Tirthankar Roy's book contests these notions demonstrating that while traditional industry did evolve during the Industrial Revolution these transformations had a positive rather than destructive effect on manufacturing generally In fact the book suggests the major industries in post independence India were shaped by such transformations Tirthankar Roy's book offers new and penetrating insights into India's economic and social history
