Prophet Muhammad (Peace Be Upon Him) in the Bible Dr. S.M. Mohiuddin Habibi,Syed Ahsan Habibi,2016-05-13 The greatest hope of all the religious groups that awaited for scores of centuries with a dogma of their own Holy Books which witnessed the glory and the majesty of that personality called as Muhammad and Ahmad the Glorious and the Praised on whom be peace and lasting blessings which certainly got fulfilled when he finally arrived on the stage of the history The Scriptures of the Prophets that went before him ended their tasks by heralding the tiding of his coming Despite the textual corruption of those ancient scriptures the golden sayings were still preserved by ALLAH the One True God as a signpost for the honest and noble readers The seekers of truth Be certain of the fact that Prophet Muhammad Peace Be Upon Him was the promised Prophet and the awaited saviour whom the Jews called as the King Messiah His coming was prophesied by all the Prophets like Moses and Jesus Peace Be Upon Them long before his arrival and he was also mentioned in the Old and New Testaments Likewise the Far East Indian scriptures never failed to mention his name and praises which certainly constitute a miracle pertaining to him and confirming his Prophethood In the light of the above facts how could a man of wisdom escape from this overwhelming thought Or will he still deny this truth Or will he still await and hope that from Heaven angels would come and guide him when the final Message has already been delivered by Muhammadur Rasul ALLAH to the creation of ALLAH in general on whom be peace and lasting blessings Indeed it is ALLAH the Lord of the worlds Who Himself calls on us to acknowledge this truth in the Holy Quran O mankind The Messenger Muhammad on whom be peace and lasting blessings hath come unto you with the Truth from your Lord Therefore believe it is better for you But if ye disbelieve still lo Unto ALLAH belongeth whatsoever is in the heavens and the earth ALLAH is ever Knower Wise 4 170 *The Humanity of Muhammad* Craig Considine,2020-09-01 What makes an American Catholic of Irish and Italian descent one of the leading global voices in admiration of Prophet Muhammad In this overview of Muhammad s life and legacy prominent scholar Craig Considine provides a sociological analysis of Muhammad s teachings and example Considine shows how the Prophet embraced religious pluralism envisioned a civic nation stood for anti racism advocated for seeking knowledge initiated

women's rights and followed the Golden Rule. Considine sheds light on the side of Prophet Muhammad that is often forgotten in mainstream depictions and media narratives. The Humanity of Muhammad is Considine's contribution to the growing body of literature on one of history's most important human beings. *The Single Monad Model of the Cosmos* Mohamed Haj Yousef, 2014-06-27 Ibn Arabi is the only scholar who was able to formulate a unique cosmological model that is capable of explaining our observations as well as many phenomena in physics and cosmology and even solve some perplexing modern and historical riddles in science and philosophy such as the EPR paradox and Zeno paradoxes of motion. Moreover, the Single Monad Model explains for the first time in history the importance of the week as a basic unit of space and time together. This prodigious theory is based on the notion of the intertwining days where Ibn Arabi shows that at every instance of time there is indeed one full week of creation that takes place in the globe. Since its publication in 2008, this book has triggered an overwhelming response, and I hope this expanded edition will help promote further Ibn Arabi's wisdom that is still buried in his multitudes of books and treatises. Ibn Arabi is one of the most prominent figures in Islamic history, especially in relation to Sufism and Islamic philosophy and theology. In this book, we want to explore his cosmology and, in particular, his view of time in that cosmological context, comparing his approaches to the relevant conclusions and principles of modern physics whenever possible. We shall see that Ibn Arabi had a unique and comprehensive view of time which has never been discussed by any other philosopher or scientist before or even after Ibn Arabi. In the final two chapters, we shall discuss some of the ways his novel view of time and cosmology may be used to build a complete model of the cosmos that may deepen and extend our understanding of the world while potentially solving some of the drawbacks and paradoxes in the current cosmological models of modern physics. As we discuss in the opening chapter, there is no doubt that time is one of the most important issues in physics, cosmology, philosophy, and theology, and hundreds of books and articles have been published in these fields. However, none of these studies have fully developed Ibn Arabi's unique view of time in its cosmological dimensions, although his conception of time is indeed central to understanding, for example, his controversial theory of the oneness of being. One possible reason for this relative neglect is the difficult symbolic language he usually used. Also, he didn't discuss this subject at length in any single place in his extant works, not even in chapters 59, 291, and 390 of the *Futuh*, whose titles relate directly to time, so we must piece together his overall cosmological understanding of time from his scattered treatments in many works and different contexts within his magnum opus, the *Futuh*, and other books. Therefore, this book may be considered the first comprehensive attempt to set forth all the relevant dimensions of time in Ibn Arabi's wider cosmology and cosmogony. To start with, Ibn Arabi considers time to be a product of our human imagination without any real, separately existing entity. Nevertheless, he still considers it to be one of the four main constituents of existence. We need this imagined conception of time to chronologically arrange events and what for us are the practically defining motions of the celestial orbs and other physical objects, but for Ibn Arabi, real existence is attributable only to the actually existing thing that moves, not to motion nor

to time nor space in which this motion is observed Thus Ibn Arab distinguishes between two kinds of time natural and para natural and he explains that they both originate from the two forces of the soul the active force and the intellective force respectively Then he explains that this imaginary time is cyclical circular relative discrete and inhomogeneous Ibn Arab also gives a precise definition drawing on the specific usage of the Qur an and earlier Arab conceptions of time of the day daytime and night showing how these definitions are related to the relative motions of the celestial orbs including the earth where every orb has its own day and those days are normally measured by our normal observable day that we count on the earth
