Martín Fernández, José Luis Martínez Cantos, Gloria Moreno Raymundo, Constanza Tobío, 2015-03-12 La larga y compleja recesión económica actual constituye un reto para la igualdad de género. Asistimos a un retroceso respecto a los avances en la posición de las mujeres en empleo, salarios, disponibilidad de servicios públicos de cuidados y acceso al poder económico y empresarial. El progreso de las últimas décadas se sustenta en políticas públicas de igualdad de género y de desarrollo del Estado de Bienestar. Hoy ambas políticas retroceden subordinadas a los objetivos de consolidación fiscal que desafortunadamente para las mujeres no sólo se orientan a la austeridad de forma coyuntural, congelación de salarios de los empleados públicos y de las pensiones públicas hasta que se supere la crisis, sino que pretenden una reducción estructural del sector público y de la oferta de servicios públicos básicos de educación, salud y asistencia social que son esenciales para la participación laboral femenina y además constituyen una fuente de empleo para las mujeres. *Globalization, Urbanization, and the State* Satya R. Pattnayak, 1996 Comprises ten papers on the impact of globalization and neoliberal policies on economic development in Latin America between 1982 and 1990. Economic Development and Women in the World Community Hans C. Blomqvist, Kartik Roy, Clement A. Tisdell, 1996-02-16 After reviewing theories about how women are likely to fare as a result of economic development, the editors and their contributors focus on the socioeconomic status of women and changes in it as a result of processes of economic development in individual countries in five continents. Economic development is supposed to remove impediments to the improvement in women's status. In some developing countries, researchers have found that instead of lessening the forces of restrictions, economic development may in fact have strengthened them. The editors call for a greater involvement of women as active participants in the process of dismantling social, legal, and institutional barriers to women's development. **Gendered Transitions** Pierrette Hondagneu-Sotelo, 1994 Edited by a leading pioneer of immigration studies, this volume offers some of the latest and most brilliant thinking about what migrant men and women bring to the United States, leave behind, and create anew. This is a must read for those interested in immigration, gender, and the many meanings of life. Arlie Russell Hochschild, co-editor with Barbara Ehrenreich of *Global Woman: Nannies, Maids, and Sex Workers in the New Economy*. Moving between individual decisions and broad political and economic forces and focusing on family and community in Mexico and the U.S., Hondagneu-Sotelo's pathbreaking book casts new light on the centrality of gender for patterns of migration. A superb intersection of ethnography, history, and theory. Michael Burawoy, University of California, Berkeley. A pathbreaking book combining the study of gender with immigration to show how Mexican women and men continually reinvent themselves and their family lives in the U.S. *Gendered Transitions* offers rich insights into the complexities of women's settlement experiences and marks a new era in immigration studies. Maxine Baca Zinn, Michigan State University. **Global Perspectives on Gender and Work** Jacqueline Goodman, 2000-04-16 Central to all our lives, work affects our status in the state, the family, and the economy. This comprehensive reader examines the myriad ways in which work, whether it is well paid, unpaid, or underpaid, profoundly influences our roles in both the public and private spheres.

Jacqueline Goodman has selected a key set of essays that examine influential arguments on such central themes as 1 the origins of the gendered division of labor 2 historical trends and economic transformations that affect and are affected by women's position in market and non market work 3 the effects of occupational and job segregation by sex on status pay and promotion 4 the ways in which formal and informal organizational culture shape and in turn are shaped by gender in professional and managerial positions 5 class consciousness among wage earning men and women 6 the different forms of gender discrimination that women and men face in the workplace 7 the problems working parents face and the ways in which different societies subcultures and genders cope and 8 alternative approaches to improving the lives of working women and their families in the global economy With its rich interdisciplinary perspective this text is ideal for courses in sociology political science anthropology and women's and gender studies Contributions by Amel Adib Kevin Bales Dorothy Sue Cobble Sharon M Collins Ruth Schwartz Cowan Susan Eisenberg Ashley English Yen Le Espiritu Anne Fausto Sterling Nancy Folbre Carla Freeman Michele Ruth Gamburd Jacqueline Goodman Janet C Gornick Yvonne Guerrier Luigi Guiso Shannon Harper Heidi Hartmann Ariane Hegewisch Arlie Russell Hochschild Pierrette Hondagneu Sotelo Jacqueline Jones Rosabeth Moss Kanter Ivy Kennelly Alice Kessler Harris Michael Kimmel Eleanor Leacock Judith Lorber Susan E Martin Marcia K Meyers Ferdinando Monte Martha C Nussbaum Jennifer Pierce Pun Ngai Barbara Reskin Tracey Reynolds Leslie Salzinger Paola Sapienza Joan W Scott Tyson Smith Margaret Talbot Louise A Tilly Christine L Williams Muhammad Yunus and Luigi Zingales

Handbook of the Sociology of Gender Janet Saltzman Chafetz,2006-11-22 During the past three decades feminist scholars have successfully demonstrated the ubiquity and omnirelevance of gender as a sociocultural construction in virtually all human collectivities past and present Intrapsychic interactional and collective social processes are gendered as are micro meso and macro social structures Gender shapes and is shaped in all arenas of social life from the most mundane practices of everyday life to those of the most powerful corporate actors Contemporary understandings of gender emanate from a large community of primarily feminist scholars that spans the gamut of learned disciplines and also includes non academic activist thinkers However while incorporating some cross disciplinary material this volume focuses specifically on sociological theories and research concerning gender which are discussed across the full array of social processes structures and institutions As editor I have explicitly tried to shape the contributions to this volume along several lines that reflect my long standing views about sociology in general and gender sociology in particular First I asked authors to include cross national and historical material as much as possible This request reflects my belief that understanding and evaluating the here and now and working realistically for a better future can only be accomplished from a comparative perspective Too often American sociology has been both tempero and ethnocentric Second I have asked authors to be sensitive to within gender differences along class racial ethnic sexual preference and age cohort lines

Development in Theory and Practice Ronald H. Chilcote,2003 This definitive reader brings together seminal articles on development in Latin America Tracing the concepts and major debates surrounding the issue the text focuses on development theory through three contrasting historical perspectives imperialism underdevelopment and dependency and globalization By offering a rich array of essays from Latin American Perspectives the book allows students to sample all the important trends in the field A new general introduction and conclusion along with part introductions contextualize each selection One of the leading figures in development studies Ronald Chilcote shows in this text why work on imperialism dating to the turn of the twentieth century informs the controversies on dependency and underdevelopment during the 1960s and 1970s as well as the globalization debates of the past decade If students are to understand development in Latin America

they must not only be familiar with historical examples and recognize that various theoretical perspectives affect our interpretation of events they must be willing to keep an open mind Thus rather than setting out established premises this reader offers different points of view raising provocative questions about Latin America that remain largely unanswered even today Students will come away from this rewarding collection ready to pursue new understanding through critical inquiry and thinking

After Revolution Florence E. Babb, 2010-01-01 Nicaragua's Sandinista revolution 1979-1990 initiated a broad program of social transformation to improve the situation of the working class and poor women and other non elite groups through agrarian reform restructured urban employment and wide access to health care education and social services This book explores how Nicaragua's least powerful citizens have fared in the years since the Sandinista revolution as neoliberal governments have rolled back these state supported reforms and introduced measures to promote the development of a market driven economy Drawing on ethnographic research conducted throughout the 1990s Florence Babb describes the negative consequences that have followed the return to a capitalist path especially for women and low income citizens In addition she charts the growth of women's and other social movements neighborhood lesbian and gay indigenous youth peace and environmental that have taken advantage of new openings for political mobilization Her ethnographic portraits of a low income barrio and of women's craft cooperatives powerfully link local cultural responses to national and global processes

Crossing Borders Kimberly M. Grimes, 1998-07 Defining borders is a complex task especially today as globalization accelerates at an unprecedented rate We have entered a transnational age one in which borders are more porous So says Kimberly M Grimes in *Crossing Borders Changing Social Identities in Southern Mexico* her investigation of migration to the United States from Putla de Guerrero Oaxaca Featuring testimonies of residents and migrants Grimes allows local voices to describe the ways in which Putlecans find themselves negotiating among competing social values The testimonies of the Putlecans indicate that the changes occurring in their small town as a result of the circular migration to and from such immigrant enclaves as Atlantic City New Jersey are viewed with mixed emotions Putlecans recognize the financial need to migrate north but they rue the increased consumerism pollution and trash that comes with the rising wealth Men show off by driving their fancy cars with New Jersey tags around the tiny Mexican town but influenced by Anglo culture they also provide greater assistance in child care and housework Women find the sexual and social freedoms of the United States liberating but they still return home to baptize their babies Grimes reminds us however that the Putlecans are not passive recipients of change but are actively embracing it creating it and mediating it By reaching across the border to investigate migration Grimes shows us that social and cultural change are not just the result of national and transnational influences but are also locally negotiated phenomena
