Multi-image Media Robert V. Bullough, 1981 Abstract Three definitive characteristics are associated with multi image media signal programmed presentation the use of 3 screens by multi image producers and an intimate integration of audio with the multi image Aspects of this instructional and educational tool are discussed for educators Topics include the multi image as a communication medium the proper utilization of multi image presentation and the details of planning and producing the presentation Case studies and student projects are discussed lists of equipment and materials manufacturers and distributors and of media on multi image are appended Information on scripts storyboards and inexpensive equipment also is included wz **Navy Photographer's Mate Training Series** Tom Regina, 1983 **Navy Photographer's Mate Training Series**, 1989 **Multi-image Design and Production** Phiz Mezey, 1988 Tells you everything you need to know to create one two and three projector productions and prepares you to tackle larger projects *The Democratic Surround* Fred Turner, 2013-12-04 A smart and fascinating reassessment of postwar American culture and the politics of the 1960s from the author of *From Counterculture to Cyberculture* Reason Magazine We tend to think of the sixties as an explosion of creative energy and freedom that arose in direct revolt against the social restraint and authoritarian hierarchy of the early Cold War years Yet as Fred Turner reveals in *The Democratic Surround* the decades that brought us the Korean War and communist witch hunts also witnessed an extraordinary turn toward explicitly democratic open and inclusive ideas of communication and with them new flexible models of social order Surprisingly he shows that it was this turn that brought us the revolutionary multimedia and wild eyed individualism of the 1960s counterculture In this prequel to his celebrated book *From Counterculture to Cyberculture* Turner rewrites the history of postwar America showing how in the 1940s and 50s American liberalism offered a far more radical social vision than we now remember He tracks the influential mid century entwining of Bauhaus aesthetics with American social science and psychology From the Museum of Modern Art in New York to the New Bauhaus in Chicago and Black Mountain College in North Carolina Turner shows how some of the best known artists and intellectuals of the forties developed new models of media new theories of interpersonal and international collaboration and new visions of an open tolerant and democratic self in direct contrast to the repression and conformity associated with the fascist and communist movements He then shows how their work shaped some of the most significant media events of the Cold War including Edward Steichen's *Family of Man* exhibition the multimedia performances of John Cage and ultimately the psychedelic *Be Ins* of the sixties Turner demonstrates that by the end of the 1950s this vision of the democratic self and the media built to promote it would actually become part of the mainstream even shaping American propaganda efforts in Europe Overturning common misconceptions of these transformational years *The Democratic Surround* shows just how much the artistic and social radicalism of the sixties owed to the liberal ideals of Cold War America a democratic vision that still underlies our hopes for digital media today Brilliant an excellent and thought provoking book
