Multicultural Citizenship of the European Union Juan Delgado-Moreira, 2018-02-06 This title was first published in 2000 This text deals with two intertwined dimensions of multicultural citizenship of the European Union It studies the theoretical debate over how best to reconcile multiculturalism citizenship and the need for collective identity at the European Union EU level by comparing EU citizenship with cultural citizenship and multicultural studies in the United States In addition to this through the study of EU documents the author contends that there exists such a thing as policies of multicultural citizenship at the European Union level He then goes on to analyze their key aspects such as the pursuit of symbolic forms of multiculturalism and the arguments to support affirmative action policies for women The text also examines the steps taken by certain EU institutions towards creating European identity and improving awareness of citizenship and cultural heritage while meeting the test of subsidiarity The author concludes that there are competing discourses in EU institutions concerning the best model for EU citizenship Among other concepts they construe multiculturalism and transnationalism as contested and sometimes opposing interpretations of citizenship The text goes on to reveal a lack of substantive connection between EU citizenship and identity in the European Union as well as the artificiality of EU attempts to build it anew It concludes that a plurality of cultural constructions of EU citizenship within the wider framework of liberal culturalism may be a viable model of EU citizenship

**Citizenship and Multiculturalism in Western Liberal Democracies** Leah Bradshaw, David Edward Tabachnick, 2017-03-16 This volume explores some of the tensions and pressures of citizenship in Western liberal democracies Citizenship has adopted many

guises in the Western context although historically citizenship is attached only to some variant of democracy How democracy is configured is thus at the core of citizenship Beginning in ancient Greece citizenship is attached to the notion of a public sphere of deliberation open only to a small number of males Nonetheless we take from these origins an understanding of citizenship that is attached to friendship preservation of a distinct community and adherence to law These early conceptions of citizenship in the west have been dramatically altered in the modern context by the ascendancy of individual rights and equality expanding the inclusiveness of definition of citizenship The universality of rights claims has led to debate about the legitimacy of the nation state and questioning of borders A further development in our understanding of citizenship and one that has shifted citizenship studies considerably in the last few decades is the backlash against the universalism of rights in the defense of cultural recognition within democratic polities Multiculturalism as a broad spectrum of citizenship studies defends the autonomy and recognition of cultural and sometimes religious identity within an overarching scheme of rights and equality This collection draws upon the many threads of citizenship in the Western tradition to consider how all of them are still extant and contentious in contemporary liberal democracy

**Citizenship, identity and immigration in the European Union** Theodora Kostakopoulou, 2024-07-30 European citizenship identity and immigration are constitutive issues facing the European polity and have important consequences for domestic political systems There has been a great deal published about citizenship within the setting of the nation state and comparative immigration policies but relatively little has been written on their theorisation in a post national post statist context such as the EU and on alternative European institutional designs Now available in paperback this volume blends normative political theory with European integration and develops an original theoretical framework for European Union citizenship identity and immigration as well as a set of policy proposals for institutional reform Challenging the conventionally held views in these areas the author argues that a constructive model of European citizenship and identity is vital to the construction of a democratic heterogeneous and inclusive European polity The book will appeal to academics and political actors concerned with issues of European governance as well as to undergraduate and postgraduate students of European politics European integration European Union Law political theory and sociology

Multiculturalism Observed Richard Lewis, 2006 A timely and unique perspective on a phenomenon that is highly divisive and splits academic and public opinion alike In the wake of the terrorist attacks in New York Madrid and London the question how Western society integrates its minorities has become one of the most crucial issues facing government today and excites media attention and frequent public controversy This volume presents a number of points of view both from Europe and North America by academic religious and political authors from a variety of cultures all with a very different perspective on whether multiculturalism is a valid answer to ensuring harmony in our societies

*Immigration and Citizenship in an Enlarged European Union* Simon McMahon, 2015-02-10 A distinctive contribution to the politics of citizenship and immigration in an expanding European Union this book explains how and why differences arise

in responses to immigration by examining local national and transnational dimensions of public debates on Romanian migrants and the Roma minority in Italy and Spain

**Democratizing the European Union** Catherine Hoskyns, 2000 This series provides texts central to medieval studies courses and focuses upon the diverse cultural social and political conditions that affected the functioning of all levels of medieval society Translations are accompanied by introductory and explanatory material and each volume includes a comprehensive guide to the sources interpretation including discussion of critical linguistic problems and an assessment of recent research on the topics covered From 1348 to 1350 Europe was devastated by an epidemic that left between a third and one half of the population dead This source book traces through contemporary writings the calamitous impact of the Black Death in Europe with a particular emphasis on its spread across England from 1348 to 1349 Rosemary Horrox surveys contemporary attempts to explain the plague which was universally regarded as an expression of divine vengeance for the sins of humankind Moralists all had their particular targets for criticism However this emphasis on divine chastisement did not preclude attempts to explain the plague in medical or scientific terms Also there was a widespread belief that human agencies had been involved and such scapegoats as foreigners the poor and Jews were all accused of poisoning wells The final section of the book charts the social and psychological impact of the plague and its effect on the late medieval economy

**From Migrants to Citizens** T. Alexander Aleinikoff, Douglas Klusmeyer, 2013-01-25 Citizenship policies are changing rapidly in the face of global migration trends and the inevitable ethnic and racial diversity that follows The debates are fierce What should the requirements of citizenship be How can multi ethnic states forge a collective identity around a common set of values beliefs and practices What are appropriate criteria for admission and rights and duties of citizens This book includes nine case studies that investigate immigration and citizenship in Australia the Baltic States Canada the European Union Israel Mexico Russia South Africa and the United States This complete collection of essays scrutinizes the concrete rules and policies by which states administer citizenship and highlights similarities and differences in their policies From Migrants to Citizens the only comprehensive guide to citizenship policies in these liberal democratic and emerging states will be an invaluable reference for scholars in law political science and citizenship theory Policymakers and government officials involved in managing citizenship policy in the United States and abroad will find this an excellent accessible overview of the critical dilemmas that multi ethnic societies face as a result of migration and global interdependencies at the end of the twentieth century

The Legitimacy of The European Union through Legal Rationality Richard Ball, 2013-10-15 Third country nationals TCNs play an important part in the economy of the European Union reflected in the rights granted to them under European Union Law Political expediency is however shaped by world regional and domestic influences that in turn determine policy towards third country nationals and their legal rights to freedom of movement This book examines the concept of political legitimacy within the European Union through the principles of legal rationality focusing in particular on the European Union s policy towards third country nationals Richard Ball argues that for

legal doctrine to be rational it must display the requirements of formal instrumental and substantive rationality each mutually exclusive and essential In taking this position of legal rationality the book focuses on free movement rights of TCNs within EU treaties and implementing legislation the Area of Freedom Security and Justice and Association Agreements Ball concludes that the stance of European Union Law towards third country nationals lacks legitimacy and suggests possible new directions that EU policy should take in the future Regional Language Policies in France during World War II A.

Amit,2014-11-24 During Germany's occupation of France in WWII French regional languages became a way for people to assert their local identities This book offers a detailed historical sociolinguistic analysis of the various language policies applied in France's regions Brittany Southern France Corsica and Alsace before during and after WWII *National Identity in EU Law* Elke Cloots,2015-02-12 Despite nearly sixty years of European integration neither nations nor national loyalties have withered away On the contrary national identity rhetoric seems on the rise not only in politics but also in legal discourse Lately we have seen a rise in the number of Member States invoking their national identity in an attempt to justify a derogation from a requirement imposed on them by a Treaty article or an EU legislative act or to legitimize a particular national reading of such an EU norm Despite this the European Court of Justice ECJ has yet to develop a coherent approach to such arguments or express a vision of the role national identity should play in EU law Elke Cloots undertakes this task by providing a principled and coherent scheme for the adjudication of disputes involving claims based on the national identity of a Member State Should arguments involving national identity be legally relevant If yes how should the ECJ approach such identity related interests Cloots crafts a normative framework to assist the ECJ in striking the right balance between European integration and respect for the identity concerns at issue The book combines rigorous theoretical inquiry with thorough analysis of the European Treaties and case law with particular attention paid to litigation involving domestic measures concerning the national system of government constitutional rights protections and language policy Clarifying the issues at stake and presenting a solution to these problems this book will be an invaluable resource for the academics lawyers and policy makers in the field *Theorizing European Integration* Dimitris N. Chryssochoou,2008-10-02 Fully revised and updated throughout *Theorizing European Integration* 2nd edition provides a comprehensive introduction to the theoretical study of European integration Combining perspectives from international relations comparative politics and social and political theory Dimitris N Chryssochoou offers a complete overview of the many competing approaches that have sought to capture and explain the evolving political nature of the European Union EU and its qualitative transition from a union of states to a polity in its own right Contemporary issues themes and theories addressed include the different uses and current state of EU theorizing statecentric accounts of integration and their critics new normative challenges to the study of the EU the political dynamics of European treaty reform new forms of democracy citizenship and governance the limits and possibilities of EU constitutionalism interdisciplinary understandings of EU polityhood the introduction of a theory of

organized synarchy the transformations of state sovereignty in late modern Europe      *Religion and European Society* Ben Schewel, Erin K. Wilson, 2019-04-17 A contemporary examination of the role of religion in the European public sphere and beyond Although the role of religion has arguably declined in the societies of Western and Northern Europe religious participation in other parts of the continent and among growing immigrant communities remains an important aspect of daily life Recent years have seen a resurgence of religion in the public sphere prompting many researchers to view European secularism as an outlier in this global trend *Religion and European Society A Primer* presents recent academic literature that explores key developments and current debates in the field covering topics such as changing patterns of belief religion across the political spectrum and development and humanitarian aid Articles written by leading scholars draw from well established findings to help readers contemplate the role of religion in public life understand the assumptions and underpinnings of the secular worldview and develop new ways of thinking about global issues relevant to contemporary global affairs Each theme is addressed by several articles to provide readers with diverse sometimes competing perspectives This volume offers concepts and ideas that can be used in various policy practitioner and academic settings clarifying overarching concepts and trends rather than analyzing specific policy issues that can quickly become outdated Addresses issues of contemporary importance such as demographic changes in religious observance increased immigration the emergence of new religious movements and changes in more established religions Explores the ethical and philosophical concepts as well as the practical everyday consequences of European post secularism Challenges widespread assumptions about the secular nature of the modern public sphere Offers analytical tools as well as practical policy recommendations on a range of issues including media regulation gender conflict and peacebuilding immigration and humanitarianism Designed to move research findings from academic journals to the realm of public discourse *Religion and European Society A Primer* is a valuable source of information for practitioners within and outside of Europe of religious studies politics and international affairs      **Negotiating Unity and Diversity in the European Union** Florian Bieber, Roland Bieber, 2020-10-21 This book explores how the European Union has been responding to the challenge of diversity In doing so it considers the EU as a complex polity that has found novel ways for accommodating diversity Much of the literature on the EU seeks to identify it as a unique case of cooperation between states that moves past classic international cooperation This volume argues that in order to understand the EU s effort in managing the diversity among its members and citizens it is more effective to look at the EU as a state While acknowledging that the EU lacks key aspects of statehood the authors show that looking at the EU efforts to balance diversity and unity through the lens of state policy is a fruitful way to understand the Union Instead of conceptualising the EU as being incomparable and unique which is neither an international organisation nor a state the book argues that EU can be understood as a polity that shares many approaches and strategies with complex and diverse states As such its effort to build political structures to accommodate diversity offers lessons to other such polities The experience of

the EU contributes to the understanding of how states and other polities can respond to challenges of diversity including both the diversity of constituent units or of sub national groups and identities

*Multiculturalism in a Global Society* Peter Kivisto, 2008-04-30 Multiculturalism in Global Society explores the concepts and debates surrounding the complex modern phenomenon of multiculturalism and its varied effects on the advanced industrial nations of the world With remarkable clarity and concision it focuses on the interrelated ties of ethnicity race and nationalism in a world where globalizing processes have made such ties increasingly important in economic political and cultural terms Students and scholars looking for the most up to date approach to understanding multiculturalism in a global perspective will find this to be an engaging penetrating and illuminating text

*The Struggle for the European Constitution* Michael O'Neill, 2008-11-28 The European Union EU Constitution was one of the most important developments in the history of the EU aiming to make the EU more transparent relevant and accountable to the citizens of its member states Current anxieties over the pace and direction of EU integration place this comprehensive study at the forefront of the EU governance debate O'Neill goes far beyond a simple account of the EU Constitution focussing also on the response to the current crisis of confidence between the Union and its citizens and how those in power have responded to the challenge Making a substantial contribution to literature on the EU key discussion points include The political crisis behind the Constitution The power politics at work in the negotiations How the Constitution affects EU policymaking The impact on the citizens of the EU This is essential reading for all those wishing to understand the background to one of the key areas within European Politics Michael O'Neill is Jean Monnet Professor in EU Politics at Nottingham Trent University

*Racism and Equality in the European Union* Mark Bell, 2009-01-08 The European Union has committed itself to combating racism as a general objective of law and policy EU legislation requires Member States to introduce laws prohibiting racial discrimination in many aspects of everyday life including employment education healthcare and housing Alongside legislation requiring action at national level the EU institutions have also made periodic commitments to mainstream racial equality taking anti racism objectives into account within all areas of EU law and policy This book analyses the extent to which the objectives of combating racism and promoting ethnic equality have been effectively mainstreamed throughout a wide range of EU policy fields It begins by considering what combating racism means in the contemporary context of the enlarged EU Bell explores what mainstreaming ethnic equality objectives entails and whether the priorities and instruments differ from those adopted in the earlier mainstreaming of gender equality or those used on other discrimination grounds The second part of the book examines the extent to which EU law and policy objectives have in practice been integrated exploring the effects in the key areas of employment social inclusion including education health and housing immigration and criminal law

*Who is the European?* Michael Kuhn, 2007 Textbook
